I am writing to urge you to reject the Final Environmental Impact Report (FEIR) for the proposed Significant Natural Resource Areas Management Plan (SNRAMP), unless and until the Sharp Park Golf Course redevelopment is removed from the plan. The vast majority of California's wetlands have been drained, degraded and destroyed. Sharp Park is home to federally protected, endangered California Red-Legged Frogs (*Rana draytonii*), California's official state amphibian. The Board of Supervisors should work to protect, rather than to kill, harm and harass these frogs, which is what happens when the City pumps the Sharp Park Wetlands out to sea, causing the frogs' egg masses to be stranded on dry land. I wholeheartedly oppose any usage of taxpayer funds that results in the destruction of rare wetland ecosystems or the degradation of important wildlife habitat. Using taxpayer dollars to drain wetlands for non-essential purposes is thoroughly unethical. As such, I again request that you not approve any version of a Significant Natural Resource Areas Management Plan that condones or funds such activities. Please see www.savethefrogs.com/sharp-park for more info, and remember that there are over 1,000 other golf courses in California.

Speak up at San Francisco City Hall [February 28th, 2017](#)

Our Appeal hearing before the SF Board of Supervisors is [on Tuesday, February 28th at 3:00pm](#) in San Francisco City Hall, Room 250. We need you there [at 3:00pm](#) so that you can speak in support of our appeal and protecting Sharp Park wildlife! Please email Julia Chang Frank at Julia4th@yahoo.com if you can be there, and she will provide you with talking points. Thank you for taking action for amphibians!

California Red-Legged Frog eggs stranded on land.

Thank You for Speaking up for the Frogs in California!

SAVE THE FROGS! depends on the dedication, passion and action of our frog-loving supporters to stand up for the rights of amphibians around the globe. Thank you for being an active part of our movement to protect amphibian populations!

Sincerely,

Koyomi Waki

Dear Supervisor,

I am a golfer and a city taxpayer as I have a vacation property on Powell St. that I stay at each summer. However I oppose any action to drain Sharp Park of its strip of marsh/wetland. I was there a few summers ago and saw the little CA red legged frogs under the bridge. They deserve protection, not only because they're our state amphibian (extinct for years now from the Santa Rosa Plateau in Riverside County near my main home), but also because they are a food source for the rare SAN Francisco garter snake, a snake of the most beautiful colors, IMHO. There must be a better solution than destroying the habitat of the state amphibian.

V. Haddad

Btw did you know that no other group of animals is going extinct faster than the amphibians? Habitat loss is reason #1.

Dear Board of Supervisors,

I am writing to ask you to please reject the proposed draining of the Sharp Park wetlands. The Red-Legged frogs are an important California native amphibian who depend on wetland areas for existence. The continued draining of wetlands is unwise for many reasons. To destroy Sharp Park wetlands for a non essential golf course is unconscionable. Undoubtedly you have heard the Save the Frogs presentations on the folly of draining Sharp Park. Please do not ignore the science behind their presentation. Please consider that your decision will deprive future generations of their natural heritage. Please do not use taxpayer money to fund the destruction of this important wetland environment.

Sincerely,

Gail Gester

I live in Australia and dream of the day that I'll travel to California and see all the beautiful natural wonders in California. Please don't destroy a beautiful home for these iconic frogs just so that you can build a boring golf course that is the same as any other golf course. Californian wetlands are unique don't jeopardize that uniqueness for a stretch of grass with holes in it.

Sincerely,
Kimberly

Dear San Francisco Board of Supervisors:

I am writing to urge you to reject the Final Environmental Impact Report (FEIR) for the proposed Significant Natural Resource Areas Management Plan (SNRAMP), unless and until the Sharp Park Golf Course redevelopment is removed from the plan. The vast majority of California's wetlands have been drained, degraded and destroyed. Sharp Park is home to federally protected, endangered California Red-Legged Frogs (*Rana draytonii*), California's official state amphibian. The Board of Supervisors should work to protect, rather than to kill, harm and harass these frogs, which is what happens when the City pumps the Sharp Park Wetlands out to sea, causing the frogs' egg masses to be stranded on dry land. I wholeheartedly oppose any usage of taxpayer funds that results in the destruction of rare wetland ecosystems or the degradation of important wildlife habitat. Using taxpayer dollars to drain wetlands for non-essential purposes is thoroughly unethical. As such, I again request that you not approve any version of a Significant Natural Resource Areas Management Plan that condones or funds such activities. Please see www.savethefrogs.com/sharp-park for more info, and remember that there are over 1,000 other golf courses in California.

Sincerely,

Natalie Van Leekwijck

Re: Please remove Sharp Park Golf Course from the Natural Resource Areas
Management Plan EIR

Dear President Breed & the San Francisco Board of Supervisors,

Friends of the Earth appreciates all of your work to promote environmental stewardship in San Francisco. Now we are urging you to remove the Sharp Park Golf Course redevelopment project from the Natural Resource Areas Management Plan Environmental Impact Report (EIR). The Sharp Park Golf Course is plagued with controversy, is a liability for San Francisco taxpayers and the General Fund, and deserves closer scrutiny by the public and the Board of Supervisors, as previously promised in writing by the San Francisco Recreation and Park Department (RPD).

Friends of the Earth is deeply concerned about the inclusion of a Pacifica-based Sharp Park Golf Course redevelopment project within what is supposed to be a San Francisco “natural areas plan.” The golf course has lost more than \$1.75 million in the last 11 years, drawing scarce resources away from San Francisco coffers that could instead be invested in San Francisco neighborhood-based recreation and parks, including the five golf courses within the City.

In 2009, in response to public scoping comments on the EIR, the RPD stated:

“Because redesigning or eliminating the Sharp Park Golf Course is a separate proposal being studied by SFRPD, it will not be included or evaluated as part of the proposed SNRAMP project analyzed in the EIR. Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review” (emphasis added)

However, when the RPD released its Draft EIR, it included a golf course redevelopment project that would redesign golf course holes, redevelop numerous areas of the course, and dredge the wetlands. This redevelopment is projected to cost San Francisco \$11 million, and is expected to lead to the future armoring of the sea wall to protect this significant investment, costing San Francisco millions of more dollars. Less expensive alternatives exist, including options created by RPD and the engineering firm that helped develop the Ocean Beach Master Plan, but those were not reviewed in this EIR.

Scientists from institutions such as the University of California and San Francisco State University have criticized the Sharp Park Golf Course redevelopment project, stating that it harms endangered species and damages the wetlands. The golf course was built upon wetlands, and the RPD pumps freshwater from the natural areas into the ocean, wasting more than 100 million gallons of fresh water each year.

The Sharp Park Golf Course is a burden on the San Francisco General Fund, and highlights the misalignment of funds towards recreational activities that are close to San Francisco neighborhoods and provide recreation that is in demand by our communities.

We urge the San Francisco Board of Supervisors to remove the Sharp Park Golf Course Redevelopment from the EIR on February 28.

Sincerely,

A handwritten signature in black ink, appearing to read 'MKeever'.

Good afternoon, Supervisors:

Thank you for your leadership in San Francisco and your support of our City's neighborhood, youth, social, and recreational services. We are writing to urge you to vote to remove the Sharp Park Golf Course Redevelopment from the Natural Resource Areas Management Plan's EIR.

We are organizations that support and prioritize a healthy and equitable San Francisco budget – one that supports those in our society who are most at-risk of being left behind by anticipated budget cuts. In the next budget, San Francisco-based recreation centers, youth services, after-school programs, and services for the homeless and the elderly may be cut.

We are concerned that a multi-million dollar redevelopment plan for Sharp Park Golf Course has been inserted into a Natural Areas Resource Management Plan. By approving the plan, the City is committing to spend even more taxpayer dollars on a Pacifica-based golf course that loses up to several hundred thousand dollars a year. (See attached table)

We do not support a proposal to spend more City resources in places that provide little benefit to San Francisco residents. We ask that fiscally responsible decisions be made to protect San Francisco's neighborhood services.

Please remove the Sharp Park Golf Course redevelopment from the Natural Resource Areas Management Plan.

Sincerely,

Jackie Manion
Executive Director

Sharp Park Golf Course Operating Costs

Fiscal Year	RPD Sharp Park Golf Course Losses
04/05	– \$110,299.00
05/06	– \$338,025.60
06/07	– \$64,685.80
07/08	– \$119,758.00
08/09	\$29,446.40
09/10	– \$134,699.80
10/11	– \$161,217.20
11/12	– \$245,007.40
12/13	– \$111,289.20
13/14	– \$151,269.80
14/15	– \$358,333.40*
TOTALS	– \$1,765,138.80

*Based on additional payroll records for FY 14/15 obtained from Recreation and Park, losses in 14/15 may be as high as \$757,641.

Projected Costs of Golf Course Redevelopment:

\$6 to \$11 million for proposed project in Natural Areas Management Plan
Eventual additional costs of \$8.5 million for eventual seawall repair

Dear Ms. Calvillo and Mr. Jalipa,

Please find attached over 330 letters of support for removing the Sharp Park Golf Course redevelopment from the Natural Resource Areas Management Plan's EIR.

We urge the supervisors to vote to remove the multi-million golf course redevelopment that harms endangered species from the EIR. Sharp Park golf course has been losing money for years, and since it's located in Pacifica, it provides little recreational benefit to San Francisco residents.

Thank you for your consideration.

Best,

Virginia Reinhart

Angela Calvillo, Clerk, and Board of Supervisors
1 Dr. Carlton B. Goodlett Place
City Hall, Room 244
San Francisco, CA 94102-4689

Dear Ms. Calvillo and Supervisors:

Both frogs and the golf course can exist together.

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

William McGuire

Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Sarah Letoile

City Hall, Room 244
San Francisco, CA 94102-4689

Dear Ms. Calvillo and Supervisors:

I'm a native to the Bay Area and take pride in our physical landscape as well as all the species that live here. This is very important to me.

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Stephen Gold

Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Diana Goldstein

San Francisco, CA 94102-4689

Dear Ms. Calvillo and Supervisors:

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Barbara Samii

Dear Ms. Calvillo and Supervisors:

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Matthew Iribarne

San Francisco, CA 94102-4689

Dear Ms. Calvillo and Supervisors:

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Ray Min

1 Dr. Carlton B. Goodlett Place
City Hall, Room 244
San Francisco, CA 94102-4689

Dear Ms. Calvillo and Supervisors:

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Alvin Sion

San Francisco, CA 94102-4689

Dear Ms. Calvillo and Supervisors:

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Aaron Goodman

Dear Ms. Calvillo and Supervisors:

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Joyce Farber
2874 Jackson St

Dear Ms. Calvillo and Supervisors:

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Kathleen And Corey Raffel

Dear Ms. Calvillo and Supervisors:

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Dusty Lombardo

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Jordan Winehouse

Dear Ms. Calvillo and Supervisors:

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Leah Olson
756 Page Street

Dear Ms. Calvillo and Supervisors:

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Greg Pennington

Dear Ms. Calvillo and Supervisors:

Please remove the Sharp Park Golf Course redevelopment project from the environmental review for San Francisco's Significant Natural Resource Areas Management Plan ("SNRAMP"). If you do not, you must reject the entire SNRAMP and its accompanying environmental review.

The environmental review for SNRAMP is inadequate because it contains a golf course redevelopment that was inserted years after the public process that defined the scope of the project. Thus the Sharp Park golf course redevelopment project was never subjected to mandatory public hearings, and did not benefit from early, formal oversight by other public agencies with subject matter jurisdiction.

Importantly, a Recreation and Park Department Scoping Report promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Despite this promise, the environmental review for SNRAMP included the golf course redevelopment project.

Sharp Park is home to two endangered species: the San Francisco garter snake and the California red-legged frog. Development has reduced the habitat for these species to just a fraction of what once existed. The golf course redevelopment would further jeopardize the survival of these endangered species and many others in a rare and important ecosystem.

Please preserve the public trust in City government and ensure that San Francisco is making the most informed environmental decisions possible.

I strongly urge you to remove the Sharp Park golf course redevelopment from the Significant Natural Resource Areas Management Plan.

Sincerely,

Ben Holmes

Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Subject:Re: RPD's Natural Areas Plan

Date:Fri, 27 Jan 2017 11:13:23 -0800

From:Derek Drish <derekdrish@gmail.com>

To:Jeff.Sheehy@sfgov.org

Dear Supervisor Sheehy,

I am a San Francisco resident in your District, a Sharp Park golfer, and a supporter of the Rec & Park Department's Natural Areas Plan, which among other things includes the Department's Laguna Salada Restoration Plan, to improve habitat in the Sharp Park wetlands for frogs and snakes, while maintaining the historic 18-hole golf course.

The Natural Areas Plan was approved December 15 by the Planning and Rec & Park Commissions, following a 20-year process of study, public input, and environmental review. But now the same anti-golf groups that have for years been trying unsuccessfully to close the golf course, have appealed the Commissions' decisions to your Board. Please vote to deny that appeal.

Sharp Park is a beautiful, historic public course, built by one of history's greatest golf architects, Alister MacKenzie. Each year since 1932 it has provided reasonably-priced enjoyment, healthy outdoor exercise and a community gathering-place for tens of thousands of diverse men, women, senior, and junior golfers. It is also convenient—just a 15-minute freeway drive from the City's southern neighborhoods. Please do not allow the anti-golf groups to obstruct the City's plans to improve habitat while maintaining the golf course. Their delaying tactics have been going on for years, and their arguments have been repeatedly rejected -- by the Rec & Park and Planning Departments, as well as the Corps of Engineers, the US Fish & Wildlife Service, the California Coastal Commission, and state and federal trial and appellate courts in San Francisco and San Mateo County.

It is time to move forward. Please vote to deny the appeal, and to approve the Natural Areas Plan on February 28th. Support your Recreation and Park Department's carefully-developed and balanced plan to recover frog and snake habitat in the Sharp Park wetlands, while saving the beautiful, popular, and historic 18-hole golf course. The course, unlike a lot of other park properties, accrues revenue.

Thank you for your service to the community and for considering my request.

Sincerely,

Derek Drish

From:Carol Kaufman <ckaufman@cooperco.com>

To:Board.of.Supervisors@sfgov.org <Board.of.Supervisors@sfgov.org>

CC:info@sfpublicgolf.org <info@sfpublicgolf.org>, Carol Kaufman <ckaufman@cooperco.com>

Dear SF Supervisors,

I am writing to you in support of Sharp Park Golf and express my concern over frustrating, never-ending efforts that could overturn the Supervisors' decision and harm the city's historic golf course. We are so fortunate to have Sharp Park, one of SF's treasures, a stunningly beautiful, affordable, and accessible golf course and I hope to will help protect SF golfers and this very special and historic place for all SF residents.

I am a San Francisco resident, a Sharp Park golfer, and a supporter of the Rec & Park Department's Natural Areas Plan, which among other things includes the Department's Laguna Salada Restoration Plan, to improve habitat in the Sharp Park wetlands for frogs and snakes, while maintaining the historic 18-hole golf course.

The Natural Areas Plan was approved December 15 by the Planning and Rec & Park Commissions, following a 20-year process of study, public input, and environmental review. But now the same anti-golf groups that have for years been trying unsuccessfully to close the golf course, have appealed the Commissions' decisions to your Board. Please vote to deny that appeal.

Sharp Park is a beautiful, historic public course, built by one of history's greatest golf architects, Alister MacKenzie. Each year since 1932 it has provided reasonably-priced enjoyment, healthy outdoor exercise and a community gathering-place for tens of thousands of diverse men, women, senior, and junior golfers. It is also convenient—just a 15-minute freeway drive from the City's southern neighborhoods. Please do not allow the anti-golf groups to obstruct the City's plans to improve habitat while maintaining the golf course. Their delaying tactics have been going on for years, and their arguments have been repeatedly rejected -- by the Rec & Park and Planning Departments, as well as the Corps of Engineers, the US Fish & Wildlife Service, the California Coastal Commission, and state and federal trial and appellate courts in San Francisco and San Mateo County.

It is time to move forward. Please vote to deny the appeal, and to approve the Natural Areas Plan. Support your Recreation and Park Department's carefully-developed and balanced plan to recover frog and snake habitat in the Sharp Park wetlands, while saving the beautiful, popular, and historic 18-hole golf course.

Thank you for your service to the community and for considering my request.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

City Hall, Room 244
2 Dr. Carlton B. Goodlett Pl.
San Francisco, CA. 94102

Re: Northern California Golf Association supports
Natural Areas Plan and Sharp Park Golf Course, and
urges San Francisco Supervisors to deny the appeal from
the Planning Commission's Certification of the Final EIR.
Case No. 2005.0912E
Hearing: February 28, 2017

Honorable Supervisors,

Sharp Park is a unique, highly-significant golf course and historic resource, whose preservation is of highest priority for the NCGA and for the world of golf. It is also a significant coastal recreational asset, providing healthful, scenic, reasonably-priced public seaside recreation and a popular community gathering place for residents and visitors to San Francisco and the Peninsula.

For these reasons, and as explained further below, the Northern California Golf Association ("NCGA") supports San Francisco's Natural Areas Program, which includes certain habitat enhancements for endangered species at Sharp Park in the context of maintaining the 85-year-old, 18-hole Sharp Park Golf Course.

Accordingly we urge Your Board to deny the appeal of Wild Equity Institute and other organizations from the Planning Commission's December 15, 2016 Order Certifying the Final EIR for the Natural Areas Program.

Opened in 1932, Sharp Park was designed by Dr. Alister MacKenzie, one of history's very best-known and best-loved golf architects, and an inductee into the World Golf Hall of Fame. His other courses – mostly private – includes several of the world's most distinguished golf courses including Augusta National, home of the annual Masters Tournament, Cypress Point Club, and Royal Melbourne, widely regarded as the world's greatest golf course south of the Equator.

Sharp Park is a "seaside links," a specific and extremely rare type of course, built in the sand by the sea -- the original type of golf course, on which the game originated in Scotland in the 15th Century, at places such as St. Andrews, which is today regarded as the "home of golf."

Re: Northern California Golf Association supports
Natural Areas Plan and Sharp Park Golf Course, and
urges San Francisco Supervisors to deny the appeal from the Planning
Commission's Certification of the Final EIR.
Case No. 2005.0912E
Hearing: February 28, 2017

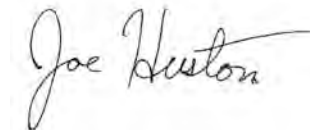

Dr. MacKenzie was an expert on seaside links courses, having been the consulting architect at the Old Course at St. Andrews in the early 20th Century. When they announced their preliminary designs for a golf course at Sharp Park in 1930, Dr. MacKenzie and his assistant Chandler Egan – himself a prominent early-20th Century architect – declared their mutual intent to model Sharp Park after the Scottish seaside links courses, and specifically St. Andrews.

We have for several years followed with great interest and concern the efforts of certain activist organizations to use San Francisco administrative and political processes in an attempt to close the Sharp Park Golf Course. And we and other golf organizations – including among others the United States Golf Association, World Golf Association, Southern California Golf Association, PGA of America, and the Alister MacKenzie Society – have on several past occasions written letters to San Francisco and other governmental entities in support of maintaining the Sharp Park Golf Course.

The NCGA is the largest regional golf organization in the United States, representing over 150,000 golfers and over 400 golf clubs, both public and private, from San Luis Obispo and Fresno in the south, and north to the Oregon border.

We reiterate our support for Sharp Park Golf Course and for San Francisco's NAP program and its Final EIR. And we reiterate our request that Your Board deny the appeal from the Planning Commission's decision to certify that Final EIR.

Best Regards,

Joe Huston

Brent Jalipa

Legislative Clerk

Board of Supervisors - Clerk's Office
(415) 554-7712 | Fax: (415) 554-5163

Attached above are 2 pdfs containing a total of 49 public comment letters, which we filed with the Clerk of the Board on Feb. 17, with copies to the Supervisors and their AA's, and staff personnel in the Planning and Rec Park Departments, as you can see from the covering e-mail, below. We ask that you include this material in the online Legislative File for the Board's upcoming Feb. 28 hearing in the Significant Natural Resource Areas Management Plan, BoS File 170044. Please advise whether I need to circulate copies to anyone other than your office.

Thank you.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Legislative Clerk

Board of Supervisors - Clerk's Office
(415) 554-7712 | Fax: (415) 554-5163

Attached above is 1 pdf containing a total of 25 public comment letters, which we previously filed with the Clerk of the Board on Feb 17, with copies to the Supervisors and their AA's, and staff personnel in the Planning and Rec Park Departments, as you can see from the covering e-mail, below. We ask that you include this material in the online Legislative File for the Board's upcoming Feb. 28 hearing in the Significant Natural Resource Areas Management Plan, BoS File 170044. Please advise whether I need to circulate copies to anyone other than your office.

Thank you.

Re: Support Natural Areas Program and Golf at Sharp Park Urge Supervisors to deny appeal of
Natural Areas Final EIR Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Sharp Park is an important public recreational asset, and needs to remain so. As well, to golfers it's a creation of Alistair MacKenzie, who is arguably the most famous golf course architect in history. Destroying Sharp Park is akin to destroying a Van Gogh.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Legislative Clerk

Board of Supervisors - Clerk's Office
(415) 554-7712 | Fax: (415) 554-5163

Attached above are 3 pdfs containing a total of 49 public comment letters, which we previously filed with the Clerk of the Board on Feb 17, with copies to the Supervisors and their AA's, and staff personnel in the Planning and Rec Park Departments, as you can see from the covering e-mail, below. We ask that you include this material in the online Legislative File for the Board's upcoming Feb. 28 hearing in the Significant Natural Resource Areas Management Plan, BoS File 170044. Please advise whether I need to circulate copies to anyone other than your office.

Thank you.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

As a San Francisco resident for the past 10+ years, I highly value our access to incredible outdoor activities and have spent many weekends with friends at family playing golf at Sharp Park. It's an incredible course -- an icon of San Francisco that was designed by one of golf's greatest course designers ever.

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Best regards,
Christian

Legislative Clerk

Board of Supervisors - Clerk's Office
(415) 554-7712 | Fax: (415) 554-5163

Attached above are 2 pdfs containing a total of 30 public comment letters, which we previously filed with the Clerk of the Board on Feb 17, with copies to the Supervisors and their AA's, and staff personnel in the Planning and Rec Park Departments, as you can see from the covering e-mail, below. We ask that you include this material in the online Legislative File for the Board's upcoming Feb. 28 hearing in the Significant Natural Resource Areas Management Plan, BoS File 170044. Please advise whether I need to circulate copies to anyone other than your office.

Thank you.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Thank you,

Subject: Support Natural Areas Program and Golf at Sharp Park Case No. 2005.0912E Hearing: Feb. 28, 2017

Dear San Francisco Board of Supervisors,

Please accept this message of support for Sharp Park Golf Course. It is a beautiful course planned by arguably the most famous golf course designer in history. The course is a wonderful resource for San Francisco and the Bay Area and allows people of all socio-economic strata to play golf at a reasonable price. In addition, Sharp Park is the home course of a large group of African-American golfers, whom the golf community respects and admires. It would be a shame to lose this course for so many reasons.

The City of San Francisco and course managers have put a lot of thought and effort into a plan to mitigate the environmental concerns, which experts agree are good and sufficient.

Please support the Planning Commission's approval of the final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course. Please deny the appeals from the Commission's decision.

Sincerely,

Jim Retzlaff

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Legislative Clerk

Board of Supervisors - Clerk's Office

(415) 554-7712 | Fax: (415) 554-5163

Attached above is 1 pdf containing a total of 30 public comment letters, which we previously filed with the Clerk of the Board on Feb 17, with copies to the Supervisors and their AA's, and staff personnel in the Planning and Rec Park Departments, as you can see from the covering e-mail, below. We ask that you include this material in the online Legislative File for the Board's upcoming Feb. 28 hearing in the Significant Natural Resource Areas Management Plan, BoS File 170044. Please advise whether I need to circulate copies to anyone other than your office.

Thank you.

Urge Supervisors to deny appeal of Natural Areas Final EIR

Case No. 2005.0912E

Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Sharp Park has great history and provides an affordable round of golf for the children and adults of San Francisco and the people all over Northern California.

Please deny the appeals from the Commission's decision.

Thank You,

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Sharp Park is a beautiful, friendly, easily-walkable golf course, accessible by freeway to San Francisco and San Mateo County, and reasonably-priced. It is a place where friendships are made and camaraderie is created.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Dear Supervisors,
I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

The Sharp Park Golf Course is a Bay Area gem, which is an historic park design from a well- established Golf Course designer.

We have to preserve this course for future generations to enjoy. I use this course quite often with friends and family. I love the convenience, location and price of the course.

Hope we can stop these crazy people from trying to close this historic course.

Please deny the appeals from the Commission's decision.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final Environmental Impact Report ("FEIR") certified by the Planning Commission and approved by the Recreation and Parks Commission, as well as the Sharp Park Golf Course redevelopment project in the Significant Natural Resources Area Management Plan ("SNRAMP"), Case No. 2005.0912E.

This EIR includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course. This seems like a reasonable and fair solution to a long and contentious matter.

Sharp Park is a historical treasure that supports the recreational activities of tens of thousands of San Francisco residents from all ethnic and financial strata.

Please do not allow this decision to be appealed.

Please let us get going on this important project. The frogs and snakes will thank you, the golfers will thank you, environmentalists in the know will thank you.

Thank-you,

Mike Ippolito
President, Harding Park Golf Club

Attached above are 3 pdfs containing a total of 25 public comment letters, which we previously filed with the Clerk of the Board on Feb 16, with copies to the Supervisors and their AA's, and staff personnel in the Planning and Rec Park Departments, as you can see from the covering e-mail, below. We ask that you include this material in the online Legislative File for the Board's upcoming Feb. 28 hearing in the Significant Natural Resource Areas Management Plan, BoS File 170044. Please advise whether I need to circulate copies to anyone other than your office.

Thank you.

Subject: Sharp Park

Sharp Park golf course is the only recreational athletic facility owned by the City that seniors can use. Seniors only have walking as their crucial exercise (most doctors recommend 10,000 steps per day as a complete exercise program for seniors). That means golf is the appropriate sport to accomplish this. The other golf courses owned by the City are not appropriate for seniors to use: Lincoln is beautiful but way too hilly to climb up and down, especially with clubs. As is Gleneagles and Golden Gate (and it and Fleming are only 9 holes). And Harding is a wonderful course, not too hilly, but a senior resident must pay \$38 to play Harding, and that's too expensive for most seniors. Sharp costs less than half of that to play.

Who are these seniors who play Sharp? Go over there sometime...see for yourself. The image of rich white males as golfers is completely not the case. Most players, and there are lots of women playing there, are Asian, Hispanic, Filipino, and all, without exception, are blue collar working people or retired workers on pension or social security. Many are former City and County employees.

I am 73, have lived in San Francisco for 52 years, and play Sharp Park all the time. It is a recreational treasure for everyone my age who wants to get some needed exercise, and enjoy the aspects of sport. Please retain Sharp Park in its current condition.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Subject: Sharp Park

Dear Supervisors,

You all have been successful in winning the election that you ran for to make our city and county a strong and secure place to raise our kids and enjoy the many features of San Francisco.

Among those features is a place called SHARP PARK golf course. SHARP PARK is an historic golf course designed by the legendary Allister MacKenzie and it is available and affordable to every level of player and every age group from school kids to super senior players.

I urge you to REJECT the appeal proposed by the Wild Equity Institute. Sharp Park has gone through years of planning, studies, investigations and conclusions that have proved beyond question that SHARP PARK, The PUBLIC GOLF ALLIANCE, SAN FRANCISCO RECREATION AND PARKS, The SAN FRANCISCO PLANNING COMMISSION, The CORPS OF ENGINEERS, The U.S. FISH AND WILDLIFE SERVICE, The CALIFORNIA COASTAL COMMISSION, STATE AND FEDERAL TRIAL AS WELL AS THE APPELLANT COURTS have all approved the Natural Areas Plan, The Laguna Salada Restoration Plan and the Sharp Park habitat improvement plan for the Red Legged Frog and the California Garter Snake.

My name is Jack Scott I live at 1200 Gough Street, San Francisco and I believe in low cost family entertainment and the availability of a sensational, locally available, world class golf course for ALL of the San Francisco/San Mateo residents and visitors alike.

Jack Scott, a registered voter.

Brent Jalipa
Legislative Clerk

Board of Supervisors - Clerk's Office
(415) 554-7712 | Fax: (415) 554-5163

Attached above are 4 pdfs containing a total of 16 public comment letters, which we previously filed with the Clerk of the Board on Feb 16, with copies to the Supervisors and their AA's, and staff personnel in the Planning and Rec Park Departments, as you can see from the covering e-mail, below. We ask that you include this material in the online Legislative File for the Board's upcoming Feb. 28 hearing in the Significant Natural Resource Areas Management Plan, BoS File 170044. Please advise whether I need to circulate copies to anyone other than your office.

Thank you.

**City of San Francisco
Board of Supervisors**

January 27th, 2017

Dear Board:

Firstly, let me say that I find it nearly incredible that you have yet again been asked to consider your opinion of the preservation and improvement of the overall habitat of the Sharp Park Golf Course, as well as the golf course itself. I find the continual opposition to your previous reasonable and rationale decisions to be a form a badgering. Frankly, the appeal you have been asked to hear next month nearly amounts to an abuse of the legislative process, especially when it gets to the point of arguing points that have been fully testified to, explained, proven and decided upon previously --- and on more than one occasion.

On the matter of the Sharp Park Golf Course not being considered "historic" allow me to, once and for all, set the record straight for your consideration. Dr. Alister MacKenzie was indeed the original golf course architect and his original design remains in many facets.

- 1) The routing of the golf course, which is the anatomy of any golf course, is more than 75% per MacKenzie's earliest plans with the exception being only the holes that had to be re-accommodated due to two events: (i) the very early erosion of the coastline and construction of a levee; and (ii) the c. 1960s work to construct the highway.
- 2) The record of the earlier replacement holes is that MacKenzie and his assistants were well a part of considering where some replacement holes would eventually go. This was due to the fact that it was well known that these ocean holes would very likely be compromised by nature, and this realization became evident not long after the course opened.
- 3) To suggest otherwise -- that the golf facility is not a MacKenzie design --would be akin to suggesting that work now ongoing to add elevators and disabled access to Grady Gammage Concert Hall in Arizona, a Frank Lloyd Wright design, somehow makes the significant building not Wright's. Absurd.

As I wrote for an early study for you (the City) in 2006:

"The history of Sharp Park begins with Mackenzie's well-intentioned design of an 18-hole course along the dunesy coastline of Pacifica. With Lincoln Park and Harding Park busy on weekends, another course was needed. The City of San Francisco purchased lots in San Mateo County from 1929 to 1930, paving the way for creating another golf course.

Jack Fleming was Mackenzie's assistant at the time. The approach to the Sharp Park site was to dredge material in order to build up fairway grades. This work took a reported 14 months.

In mid 1930, Robert Hunter was appointed to direct construction of Sharp Park Golf Course. Hunter had relocated to California (Oakland to be specific) after a career teaching sociology. Hunter was still teaching occasionally and had, by this time, written several books on sociology. One, Poverty, was a best-seller in America during 1904. Hunter is thought to have a great deal to do with the creation of Sharp

Park, assisting MacKenzie and carrying out his design philosophy. Hunter took the lead of field work at many of Mackenzie's northern California projects. Just a few years earlier, in 1926, Hunter authored The Links, still today an acclaimed book on golf course design."

I have spent considerable time studying the work of both MacKenzie and Hunter. Our restoration work in El Cerrito, California at Mira Vista Country Club was to the only sole design effort ever by Hunter. Through this process I researched and have gained a great deal about the work of both golf architects. I relate this so you will know that these are not as much opinions as they are factual recounts of what actually occurred in California golf history.

Without any doubt, the history record shows that Sharp Park is a MacKenzie design and remains among only a very few of his golf courses worldwide that are publicly owned and operated for the benefit of the ordinary golfer. It is an historic golf course regardless of the changes made, and it is my understanding that the plans for its future will restore even more of the original design. This is a proud point to weigh, and it should be a heavy weight indeed.

You have in your archives a very handsome blueprint on linen (dated 1931) that shows work to the course and the pipelines that formed the old irrigation works. By overlaying this to plans from the 1960s you can easily see that a majority of the golf course remains per the MacKenzie design, not only in terms of the footprint, but also the corridor formed by the holes. Golf courses are always evolving -- changing. The key here is that the basis of the golf remains, despite the natural and man-caused changes that were simply unavoidable at various times in its history.

Old buildings are the same. They need to be changed and revised, but this does not diminish their historic roots.

You will do well to look straight into the eyes of those who are now coming before you to argue this silly point and to ask them to simply get on with it. For their argument that Sharp Park is not an Alister MacKenzie design, or that it has been so significantly changed as to not be considered his valuable work, is pure rubbish.

Sincerely,

//s//

Dear Supervisors,

I was previously a San Francisco resident. I am a Sharp Park golfer who greatly appreciates that old course designed by MacKenzie.

I support the Rec & Park Department's Natural Areas Plan, which among other things includes the Department's Laguna Salada Restoration Plan, to improve habitat in the Sharp Park wetlands for frogs and snakes, while maintaining the historic 18-hole golf course.

The Natural Areas Plan was approved December 15 by the Planning and Rec & Park Commissions, following a 20-year process of study, public input, and environmental review. But now the same anti-golf groups that have for years been trying unsuccessfully to close the golf course, have appealed the **Commissions' decisions to your Board. Please vote to deny that appeal and to end the incessant harassment of our course by those crazy eco-fanatics.**

Sharp Park is a beautiful, historic public course, built by one of history's greatest golf architects, Alister MacKenzie. Each year since 1932 it has provided reasonably-priced enjoyment, healthy outdoor exercise and a community gathering-place for tens of thousands of diverse men, women, senior, and junior golfers. It is also convenient—just a **15-minute freeway drive from the City's southern neighborhoods**. Please do not allow the **anti-golf groups to obstruct the City's plans to improve habitat** while maintaining the golf course. Their delaying tactics have been going on for years, and their arguments have been repeatedly rejected -- by the Rec & Park and Planning Departments, as well as the Corps of Engineers, the US Fish & Wildlife Service, the California Coastal Commission, and state and federal trial and appellate courts in San Francisco and San Mateo County.

It is time to move forward. Please vote to deny the appeal, and to approve the Natural Areas Plan. Support your Recreation and Park **Department's** carefully-developed and balanced plan to recover frog and snake habitat in the Sharp Park wetlands, while saving the beautiful, popular, and historic 18-hole golf course.

Thank you for your service to the community and for considering my request.

Subject: Uphold the Approval of Recreation and Parks' Natural Areas Plan - Hearing

Date: 2/28/2017

Date: Fri, 27 Jan 2017 21:54:59 +0000

From: Evans, David W <devans@HBBLAW.com>

To: 'Board.of.Supervisors@sfgov.org' <Board.of.Supervisors@sfgov.org>

CC: 'SF Public Golf Alliance' <info@sfpublicgolf.org>

TO: SAN FRANCISCO COUNTY BOARD OF SUPERVISORS

Dear Supervisors,

I was a San Francisco resident for 22 years and continue to work in the City every day; I'm also someone who enjoys golf at Sharp Park and am a supporter of the Rec & Park Department's Natural Areas Plan, which among other things includes the Department's Laguna Salada Restoration Plan, to improve habitat in the Sharp Park wetlands for frogs and snakes, while maintaining the historic 18-hole golf course.

The Natural Areas Plan was approved December 15 by the Planning and Rec & Park Commissions, following a 20-year process of study, public input, and environmental review. But now the same anti-golf groups that have for years been trying unsuccessfully to close the golf course, have appealed the Commissions' decisions to your Board. Please vote to deny that appeal.

Sharp Park is a beautiful, historic public course, built by one of history's greatest golf architects, Alister MacKenzie. Each year since 1932 it has provided reasonably-priced enjoyment, healthy outdoor exercise and a community gathering-place for tens of thousands of diverse men, women, senior, and junior golfers. It is also convenient—just a 15-minute freeway drive from the City's southern neighborhoods. I have been a volunteer Course Rater for the Northern California Golf Association for thirteen years and, during that period, have rated and played dozens of public and private golf courses throughout Northern California. This has made me appreciate even more the spectacular benefits offered to the golfers of Northern California, and San Francisco in particular, of having access to such a wonderful and historic golf course like Sharp Park; one doesn't typically see a public course designed by golf architects like Alister MacKenzie, a highly accomplished historical figure who designed Sharp Park in the early 20th century, along with many other well-known golf courses, including Augusta National, where the Masters is played every spring, and Cypress Point on the Monterey Peninsula, both of which naturally encompass and complement their surroundings.

Please do not allow the anti-golf groups to obstruct the City's plans to improve habitat while maintaining the golf course. Their delaying tactics have been going on for years, and their arguments have been repeatedly rejected -- by the Rec & Park and Planning Departments, as well as the Corps of Engineers, the US Fish & Wildlife Service, the California Coastal

Commission, and state and federal trial and appellate courts in San Francisco and San Mateo County.

It is time to move forward. Please vote to deny the appeal, and to approve the Natural Areas Plan. Support your Recreation and Park Department's carefully-developed and balanced plan to recover frog and snake habitat in the Sharp Park wetlands, while saving the beautiful, popular, and historic 18-hole golf course.

Thank you for your service to the community and for considering my request.

Subject:Consideration of Sharp Park
Date:Fri, 27 Jan 2017 14:38:29 -0800
From:Stacey Baba <sbjvfoundation1@comcast.net>
To:Board.of.Supervisors@sfgov.org
CC:info@sfpublicgolf.org

Dear Supervisors,

I am an environmentalist with a degree from UC Berkeley in the Biology of Natural Resources, a Sharp Park golfer, and a supporter of the Rec & Park Department's Natural Areas Plan, which among other things includes the Department's Laguna Salada Restoration Plan, to improve habitat in the Sharp Park wetlands for frogs and snakes, while maintaining the historic 18-hole golf course. I have spent my years supporting the environment and our natural resources.

The Natural Areas Plan was approved December 15 by the Planning and Rec & Park Commissions, following a 20-year process of study, public input, and environmental review. But now the same anti-golf groups that have for years been trying unsuccessfully to close the golf course, have appealed the Commissions' decisions to your Board. Please vote to deny that appeal.

Sharp Park is a beautiful, historic public course, built by one of history's greatest golf architects, Alister MacKenzie. It was Alister's gift to our community and has incredible historical significance. It is tragic the each year we read about the demise of areas that have brought many folks joy over so many years because of some folks who are well meaning but misguided. Each year since 1932 it has provided reasonably-priced enjoyment, healthy outdoor exercise and a community gathering-place for tens of thousands of diverse men, women, senior, and junior golfers. Please do not allow the anti-golf groups to obstruct the City's plans to improve habitat while maintaining the golf course. Their delaying tactics have been going on for years, and their arguments have been repeatedly rejected -- by the Rec & Park and Planning Departments, as well as the Corps of Engineers, the US Fish & Wildlife Service, the California Coastal Commission, and state and federal trial and appellate courts in San Francisco and San Mateo County.

It is time to move forward. Please vote to deny the appeal, and to approve the Natural Areas Plan. Support your Recreation and Park Department's carefully-developed and balanced plan to recover frog and snake habitat in the Sharp Park wetlands, while saving the beautiful, popular, and historic 18-hole golf course.

Thank you for your service to the community and for considering my request.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR.
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Honorable Supervisors,

As a fourth-generation San Franciscan, whose grandfather introduced him to the game of golf on the historic course at Sharp Park, I implore you to recognize the heritage this course represents, and its essential service to so many bay area residents.

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which while providing for the recovery of habitat for frogs and snakes, maintains the historic 18-hole Sharp Park Golf Course.

Please deny the ill-considered appeal to reverse the Commission's decision.

Respectfully submitted,

Gerald W. Stratford

Subject:Sharp Park Golf Course Natural Areas Plan

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

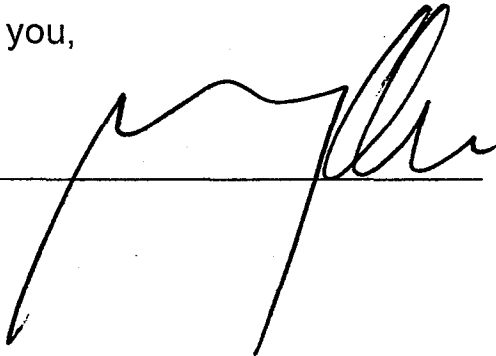

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Thank you,

Subject:Sharp Park Golf Course

Date:Fri, 27 Jan 2017 15:20:05 -0800

From:George Young <gfyoun@earthlink.net>

To:info@sfpblicgolf.org

I have been a member of Sharp Park for many years and have enjoyed many years of golf. This course has a history which dates way past our generation. Please keep Sharp Park not only for the golfers but many families walk their dogs late in the day enjoying the time with dog and family.

From: Dave Wisnia <davewisnia@yahoo.com>

Date: January 28, 2017 at 4:07:19 AM PST

To: Board.of.Supervisors@sfgov.org

Subject: Sharp Park Golf Course

To the attention of the Board of Supervisors

My name is David Wisnia & I'm a San Francisco native now living in San Bruno.

The constant harassment that environmental activists are continually causing is counterproductive to the operation & revenue that the Sharp Park Golf Course produces for San Francisco. The golfing & other patrons of this long standing public facility are the ones who should be listened to in this battle over the continued use of the Sharp Park Golf Course property. I feel it is more responsible to serve the needs of people that are willing to spend their hard earned dollars to support the course & the wildlife that make it their home. Please continue to keep the public golf course & the environmentally sensitive area contained within it as is, coexisting harmoniously!

Thank you for supporting this Pacifica gem & please keep up the good work.

Sincerely

David Wisnia

Subject: SF Public Golf Alliance / Natural Areas Plan Appeal / Letters in Support of NAP and Sharp Park Golf, and Opposing Appeal / South San Francisco residents / Bof S hearing Feb. 28

Clerk of the San Francisco Board of Supervisors

Board President London Breed, and Members of the Board,

Attached above is 1 pdf containing 15 signed letters to the SF Board of Supervisors in support of the Natural Areas Plan Final EIR and Sharp Park Golf Course, from South San Francisco residents. We ask the Clerk to make these part of the Board's record in the matter, and for Board members to consider them.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Dear SF Board of Supervisors: Please reject the latest of many appeals by the Wild Equity Institute etc., regarding the closure of Sharp Park Course. I personally have played there over 50 years. Golfers respect and protect the environs, not harm them. These are needless tactics. This famous and beautiful course is enjoyment to so many people, especially the elderly, like myself. It keeps us active and healthy. Please reject this appeal. Thank you for your commitment to doing what is right. Respectfully, Homer Hudelson, 2684 Sean Ct. South SF, CA 94080

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Thank you,

Board of Supervisors - Clerk's Office

(415) 554-7712 | Fax: (415) 554-5163

Attached above is 1 pdf containing a total of 25 public comment letters, which we previously filed with the Clerk of the Board on Feb 10, with copies to the Supervisors and their AA's, and staff personnel in the Planning and Rec Park Departments, as you can see from the covering e-mail, below. We ask that you include this material in the online Legislative File for the Board's upcoming Feb. 28 hearing in the Significant Natural Resource Areas Management Plan, BoS File 170044. Please advise whether I need to circulate copies to anyone other than your office.

Thank you.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

From: Lisa Villasenor-Volosing <lavillasenor744@aol.com>

To: Board.of.Supervisors@sfgov.org

Dear Supervisors,

I am a Pacifica resident, a Sharp Park golfer, and a supporter of the Rec & Park Department's Natural Areas Plan, which among other things includes the Department's Laguna Salada Restoration Plan, to improve habitat in the Sharp Park wetlands for frogs and snakes, while maintaining the historic 18-hole golf course.

My husband Jeff's family has a long history of playing and enjoying Sharp Park Golf Course. When we married 10 years ago I was lucky to be introduced to Sharp Park and appreciate that legacy. I am not an old, white, rich guy golfer! I am not the face that anti-golf rhetoric would have you visualize. I am a 59 year old Hispanic female who loves everything about golf and especially at a muni course like Sharp Park. I appreciate that I can walk into Sharp Park for a round of golf and feel unintimidated, pay reasonable rates, and enjoy a beautiful old course with a wonderful variation of men, women and junior golfers. Please do not let anti-golf activists ruin decades of public access to municipal golf at Sharp Park. We are one of the most affordable, welcoming and historic courses in our geographical area. This gem that belongs to SF County is one that should not only be kept alive, but nurtured and protected for SF and San Mateo County residents for years to come. So many resources have already been invested in the prior approval by Planning and Rec & Park, not to mention the time already spent by SF Board of Supervisors in hearing the SAME OLD ARGUMENTS. This is just a repackaging of old, failed anti-golf arguments. It's time to move forward and allow the users of Sharp Park to show that they/we can take care of the animals and environment that surrounds us at the course. As players and users of it, we are the best ones to guard our gem - we want its beauty and environment to survive! We are motivated to care for it - contrary to the false and misleading rhetoric you have heard in the past, and will hear again, by haters of golf and golf courses.

The Natural Areas Plan was approved December 15 by the Planning and Rec & Park Commissions, following a 20-year process of study, public input, and environmental review. But now the same anti-golf groups that have for years been trying unsuccessfully to close the golf course, have appealed the Commissions' decisions to your Board. Please vote to deny that appeal.

Sharp Park is a beautiful, historic public course, built by one of history's greatest golf architects, Alister MacKenzie. Each year since 1932 it has provided reasonably-priced enjoyment, healthy outdoor exercise and a community gathering-place for tens of thousands of diverse men, women, senior, and junior golfers. It is also convenient—just a 15-minute freeway drive from the City's southern neighborhoods. Please do not allow the anti-golf groups to obstruct the City's plans to improve habitat while maintaining the golf course. Their delaying tactics have been going on for years, and their arguments have been repeatedly rejected -- by the Rec & Park and Planning Departments, as well as the Corps of Engineers, the US Fish & Wildlife Service, the California Coastal Commission, and state and federal trial and appellate courts in San Francisco and San Mateo County.

It is time to move forward. Please vote to deny the appeal, and to approve the Natural Areas Plan. Support your Recreation and Park Department's carefully-developed and balanced plan to recover frog and snake habitat in the Sharp Park wetlands, while saving the beautiful, popular, and historic 18-hole golf course.

Thank you for your service to the community and for considering my request.

Dear San Francisco Supervisors,

I am currently a Pacifica resident, a native San Franciscan born here and attending all my education in San Francisco from Kindergarten through college...attending schools such as Lowell High School, City College of San Francisco, and San Francisco State University, a frequent golfer at Sharp Park Golf Course through all those years and still am today. I'm too am also a lover of nature and the preservation of natural resources. I'm an avid outdoors person who enjoys fly fishing (I'm a member of the Golden Gate Park fly casting ponds), backpacking, camping, and grew up learning to fish locally at Lake Merced and was part of the Friends of Lake Merced preservation effort. Suffice it to say, I love San Francisco and the outdoors.

I'm also a supporter of the Rec & Park Department's Natural Areas Plan, which among other things includes the Department's Laguna Salada Restoration Plan, to improve habitat in the Sharp Park wetlands for frogs and snakes, while maintaining the historic 18-hole golf course. The Natural Areas Plan was approved December 15 by the Planning and Rec Sharp Park is a beautiful, historic public course, built by one of history's greatest golf architects, Alister MacKenzie. Each year since 1932 it has provided reasonably-priced enjoyment, healthy outdoor exercise and a community gathering-place for tens of thousands of diverse men, women, senior, and junior golfers. It is also convenient—just a 15-minute freeway drive from the City's southern neighborhoods. Please do not allow the anti-golf groups to obstruct the City's plans to improve habitat while maintaining the golf course. Their delaying tactics have been going on for years, and their arguments have been repeatedly rejected -- by the Rec & Park and Planning Departments, as well as the Corps of Engineers, the US Fish & Wildlife Service, the California Coastal Commission, and state and federal trial and appellate courts in San Francisco and San Mateo County.

It is time to move forward. Please vote to deny the appeal, and to approve the Natural Areas Plan. Support your Recreation and Park Department's carefully-developed and balanced plan to recover frog and snake habitat in the Sharp Park wetlands, while saving the beautiful, popular, and historic 18-hole golf course.

One additional point I'd like to make is you'd be hard pressed to find such a quaint, affordable, and relaxing setting for beginners and youngsters alike to learn the game and the sportsmanship and life lessons golf can offer. And it also has a huge following of seniors who come out daily to meet with friends and enjoy a round during the week. As beautiful as this course is, you won't find many courses like this anywhere in the US with this type of following, stature, and beauty. It's truly a gem, let's work to keep it that way.

Thank you for your service and for considering my request.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny any and all appeals of this decision.

My family and I have lived in Pacifica since 1986. My children were raised on Sharp Park Golf Course, and I am now taking my grandchildren to Sharp Park Golf Course. It truly is a multi-generational recreational gem in our little town, and deeply beloved by people from all over the Bay Area. It is beyond our understanding why we need to keep writing letters begging for the protection of our golf course.

We hope you will consider the desires and preferences of the people in Pacifica and all across the Bay Area who have patronized the Sharp Park Golf Course for generations. Pacifica is a town that holds the environment in high esteem – we repeatedly vote down high end commercial development to keep our town a beautiful haven by the ocean. We have done a good job in establishing refuge for wetlands, snakes and frogs. There's the wetlands near Rockaway Beach, Mori Point, and the Coastal Conservancy trail as well and now the Devils Slide Trail. Yet, there are outsiders who would try to deny us the golf course that is so rich with history and tradition and which thousands and thousands of people over the years have enjoyed and cherish.

You can see we've done a good job in putting the environment first in Pacifica. Yet one of our most prized recreational outlets, the Sharp Park Golf Course, has come under repeated attack by outsiders. They want to take away our joy and traditions. We respectfully request that you deny the appeal by the environmental group seeking to shut down Sharp Park Golf Course. Can we finally say enough is enough?

Respectfully submitted,

Dan and Susan Macaulay

Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Thank you,

To: Board.of.supervisors@sfgov.org

Subject: Sharp Park Golf Course

As a long time resident (48 plus years) of San Francisco, I urge the Board to support the recommendation of continuing operation of Sharp Park with minor changes. Hopefully, this will be the end of this matter. All the years I played at Sharp, I have not seen a single snake or frog. Maybe they only come out after dark.

Sent: Tuesday, January 03, 2017 2:58 PM

To: Norman Yee, Supervisor, District 7

Subject: Sharp Park and the Natural Areas Plan

Dear Supervisor Yee:

As District 7 residents for the past 40 years, and golfers at Sharp Park for the past 37 years, we support the Rec & Park Department's Natural Areas Plan which reconfirms the Department's commitment to keep the 18-hole Sharp Park Golf Course open while improving the habitat in the wetlands for frogs and snakes.

The Planning and the Rec & Park Commissions jointly approved the Natural Areas Plan at their December 15 meeting. Again, anti-golf groups continue to try to close the golf course and are going to appeal the Commissions' decisions to the Board of Supervisors.

Beautiful Sharp Park, which was designed by Alister MacKenzie in 1929, is an historical golf course in the Bay Area and has been played by golfers of many ages for multiple generations of families.

Please provide your support to keep Sharp Park open for future generations. We ask that you do not allow the anti-golf groups to cause any further delay in obstructing the City's plans to improve the habitat while keeping the golf course open. The anti-golf groups' arguments have been rejected not only by Rec & Park and Planning Departments, but also by the Corps of Engineers, the US Fish & Wildlife Service, the Coastal Commission, and state and federal courts in San Francisco and San Mateo county.

May we ask for your vote to deny the appeal and to approve the Natural Areas Plan.

Thank you

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Thank you,

Attached above is 1 pdf containing a total of 28 public comment letters, which we previously filed with the Clerk of the Board on Feb 10, with copies to the Supervisors and their AA's, and staff personnel in the Planning and Rec Park Departments, as you can see from the covering e-mail, below. We ask that you include this material in the online Legislative File for the Board's upcoming Feb. 28 hearing in the Significant Natural Resource Areas Management Plan, BoS File 170044. Please advise whether I need to circulate copies to anyone other than your office.

Thank you.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

I am an avid golfer and play Sharp Park several times per year and support local restaurants after my round. If Sharp Park closes I do feel as if local businesses will suffer as well.

Best regards,

Thomas Dittmann

To:Board.of.Supervisors@sfgov.org <Board.of.Supervisors@sfgov.org>

CC:info@sfpublicgolf.org <info@sfpublicgolf.org>

Dear Supervisors,

I am a San Francisco resident, a Sharp Park golfer, and a supporter of the Rec & Park Department's Natural Areas Plan, which among other things includes the Department's Laguna Salada Restoration Plan, to improve habitat in the Sharp Park wetlands for frogs and snakes, while maintaining the historic 18-hole golf course.

The Natural Areas Plan was approved December 15 by the Planning and Rec & Park Commissions, following a 20-year process of study, public input, and environmental review. But now the same anti-golf groups that have for years been trying unsuccessfully to close the golf course, have appealed the Commissions' decisions to your Board. Please vote to deny that appeal.

Sharp Park is a beautiful, historic public course, built by one of history's greatest golf architects, Alister MacKenzie. Each year since 1932 it has provided reasonably-priced enjoyment, healthy outdoor exercise and a community gathering-place for tens of thousands of diverse men, women, senior, and junior golfers. It is also convenient—just a 15-minute freeway drive from the City's southern neighborhoods. Please do not allow the anti-golf groups to obstruct the City's plans to improve habitat while maintaining the golf course. Their delaying tactics have been going on for years, and their arguments have been repeatedly rejected -- by the Rec & Park and Planning Departments, as well as the Corps of Engineers, the US Fish & Wildlife Service, the California Coastal Commission, and state and federal trial and appellate courts in San Francisco and San Mateo County.

It is time to move forward. Please vote to deny the appeal, and to approve the Natural Areas Plan. Support your Recreation and Park Department's carefully-developed and balanced plan to recover frog and snake habitat in the Sharp Park wetlands, while saving the beautiful, popular, and historic 18-hole golf course.

Thank you for your service to the community and for considering my request.

Subject: Support of Sharp Park Golf Course

Dear Supervisors,

I am a San Francisco resident, a member of the USGA Western Regional Affairs Committee; Pacific Women's Golf Association; Women's Golf Association of Northern California; San Francisco Mayor's Women's Golf Council; Captain of the Half Moon Bay Women's Golf Club; Sharp Park golfer; and a supporter of the Rec & Park Department's Natural Areas Plan.

I urge you to deny the appeal of the Natural Areas Plan and support your Recreation and Park Department's plan to recover frog and snake habitat in the Sharp Park wetlands. By doing so, you will also be saving the beautiful and historic 18-hole golf course patronized by so many recreational golfers.

Thank you for your service to the community and for considering my request.

Respectfully submitted by,
Julie Gonzalez

Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Brent Jalipa
Legislative Clerk

Board of Supervisors - Clerk's Office
(415) 554-7712 | Fax: (415) 554-5163

Attached above is 1 pdf containing a total of 21 public comment letters, which we previously filed with the Clerk of the Board on Feb 10, with copies to the Supervisors and their AA's, and staff personnel in the Planning and Rec Park Departments, as you can see from the covering e-mail, below. We ask that you include this material in the online Legislative File for the Board's upcoming Feb. 28 hearing in the Significant Natural Resource Areas Management Plan, BoS File 170044. Please advise whether I need to circulate copies to anyone other than your office.

Thank you.

Subject: RE: Save Sharp Park / Can you write e-mail to your Supervisor, Norman Yee ?

Dear Supervisor Yee,

I have been a homeowner in the District 7 area of San Francisco for nearly 40 years. I am an avid golfer and strong proponent of continued recreational use of San Francisco's established open spaces whether it be for hiking, walking with dogs, or other traditional uses. While I was dismayed with the increasing restrictions imposed by "Natural Areas Plan (NAP)", I do support many of its intentions and provisions, including maintaining the use of historic Sharp Park as one of San Francisco's few accessible and affordable golf venues. It is where I relearned the game of golf in the 1980's and still enjoy this tribute to Allister McKenzie's unique architectural skills.

I now understand that despite the adoption of the NAP, the same anti-golf groups that have been badgering the Board of Supervisors and others for many years to close or severely limit access to Sharp Park are still pursuing their ill-advised agenda. In the past several years, I have personally attended several of their presentations to the Board. In a word, these presentations have been largely bogus and without consideration of being harmful to those who enjoy the game of golf at Sharp Park. Despite continued rejections of their arguments by many ecologically committed agencies, they just keep on pushing.

In the past, you have supported maintaining Sharp Park for its value to the people of San Francisco. With your recent reelection, I hope that we residents of District 7 can continue to count on your strong support for our golf course. Anything less would be a great disappointment to a great many of your constituents. Thank you for your consideration and Happy New Year to you and your family.

Sincerely,

Douglas C. Morgan

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

The frogs and snakes need help from people who know a lot more about environmental statistics than I do; but I do have a clear perception that all such creatures are an important element in the natural community of living things, and that I always come away from a morning at Sharp with an almost ecstatic appreciation for the few hours of direct communing with these sadly shrinking but still vital islands of harmony and sanity.

Golf and golfers are easy prey for ridicule, but so is Yoga and other pursuits of peaceful coexistence with this planet and other human beings. Golf courses are natural peace pockets, and their intrusion into the natural order of things is always outweighed by the benefits to the preservation of scenic harmony and mental health.

Please deny the appeals from the Commission's decision.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Sharp Park is great course and needs to be kept available for Bay Area golfers.

It is also one of the courses where I recorded a "hole in one", so, it has special sentimental value to me.

Please deny the appeals from the Commission's decision.

Dear Supervisors,

I am a San Francisco resident, a Sharp Park golfer, and a supporter of the Rec & Park Department's **Natural Areas Plan, which among other things includes the Department's Laguna Salada Restoration Plan**, to improve habitat in the Sharp Park wetlands for frogs and snakes, while maintaining the historic 18-hole golf course.

The Natural Areas Plan was approved December 15 by the Planning and Rec & Park Commissions, following a 20-year process of study, public input, and environmental review. But now the same anti-golf groups that have for years been **trying unsuccessfully to close the golf course, have appealed the Commissions'** decisions to your Board. Please vote to deny that appeal.

Sharp Park is a beautiful, historic public course, built by one of history's greatest golf architects, Alister MacKenzie. Each year since 1932 it has provided reasonably-priced enjoyment, healthy outdoor exercise and a community gathering-place for tens of thousands of diverse men, women, senior, and junior golfers. It is also convenient—just a **15-minute freeway drive from the City's** southern neighborhoods. Please do not allow the anti-golf groups to obstruct the **City's plans to improve habitat while maintaining** the golf course. Their delaying tactics have been going on for years, and their arguments have been repeatedly rejected -- by the Rec & Park and Planning Departments, as well as the Corps of Engineers, the US Fish & Wildlife Service, the California Coastal Commission, and state and federal trial and appellate courts in San Francisco and San Mateo County.

It is time to move forward. Please vote to deny the appeal, and to approve the Natural Areas Plan. Support your Recreation and Park **Department's** carefully-developed and balanced plan to recover frog and snake habitat in the Sharp Park wetlands; while saving the beautiful, popular, and historic 18-hole golf course.

Thank you for your service to the community and for considering my request.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision. Residents of San Francisco and the Bay Area simply need access to what is a limited supply of publicly accessible and affordable golf options. And Sharp Park provides such an outlet. There is not a better opportunity to provide such a resource that not only creates revenue and a positive impact on the area than a golf course at Sharp Park.

Sincerely,

Stephen Molinelli

Feb 8th, 2017

Dear Supervisors,

I have been a San Francisco resident since 1989, a Sharp Park golfer since 2001, and a supporter of the Rec & Park Department's Natural Areas Plan, which among other things includes the Department's Laguna Salada Restoration Plan, to improve habitat in the Sharp Park wetlands for frogs and snakes, while maintaining the historic 18-hole golf course.

The Natural Areas Plan was approved December 15 by the Planning and Rec & Park Commissions, following a 20-year process of study, public input, and environmental review. But now the same anti-golf groups that have for years been trying unsuccessfully to close the golf course, have appealed the Commissions' decisions to your Board.

Please vote to deny that appeal.

Sharp Park is a beautiful, historic public course, built by one of history's greatest golf architects, Alister MacKenzie. My Friends and I have enjoyed the course and consider it a very important asset to The City for its scenic views, convenient location, and, of course it's beautiful layout. The loss of Sharp Park Golf Course would be a significant loss for citizens wishing to enjoy outdoor recreation in our neighborhoods.

Please do not allow the anti-golf groups to obstruct the City's plans to improve habitat while maintaining the golf course. Their delaying tactics have been going on for years, and their arguments have been repeatedly rejected -- by the Rec & Park and Planning Departments, as well as the Corps of Engineers, the US Fish & Wildlife Service, the California Coastal Commission, and state and federal trial and appellate courts in San Francisco and San Mateo County.

It is time to move forward. Please vote to deny the appeal, and to approve the Natural Areas Plan. Support your Recreation and Park Department's carefully-developed and balanced plan to recover frog and snake habitat in the Sharp Park wetlands, while saving the beautiful, popular, and historic 18-hole golf course.

Thank you for your service to the community and for considering my request.

To: "Norman Yee SF Supervisor"
Subject: Saving Sharp Park Golf Course and Environment

To the Honorable Norman Yee, Supervisor District 7

Dear Supervisor Yee,

I have been a resident of Golden Gate Heights for the almost 34 years. Our group of 12-20 golfers, mostly senior citizens and many in District 7, have been playing golf regularly for more than 20 years at Sharp Park Golf Course enjoying healthy physical, social, mental and good quality of life.

I am contacting you to ask for your support of the Park and Recreation Department's Natural Areas Plan which reconfirms their commitment to retaining the 18-hole Sharp Park Golf Course open and improving the habitat for the wetlands for frogs and snakes.

I am very concerned with anti-golf groups continuing efforts to close down Sharp Park Golf Course entirely even though the Natural Areas Plan was approved by both the Planning and the Park and Recreation Commissions at their December 15, 2016 joint meeting. The anti-golf groups who have been trying for years to close Sharp Park plans to appeal (again !!) the Commissions' decisions to the Board of Supervisors. See: SF Examiner, Dec. 16, 2016 - [SF appeal likely following commission approval of Natural Areas Management Plan](#)

SF appeal likely following commission approval of Natural Areas Management ...

A plan to manage a number of natural areas in San Francisco and San Mateo counties was approved by planning and ...

Please help and do not allow these anti-golf groups to continue to waste important Supervisor time by continuing to obstruct the City's plan to continue to improve the wildlife habitat while keeping the golf course open. Their delaying tactics have been going on for years as the record will show, and their arguments have been rejected not only by the Park and Recreation and Planning Departments, but also by the Corps of Engineers, the US Fish & Wildlife Service, the Coastal Commission and state and federal courts in San

Francisco and San Mateo Counties. This is more than enough evidence to indicate that Sharp Park Golf Course can co-exist within a habitat protecting wildlife.

Sharp Park Golf Course is a affordable-priced healthy exercise venue and enjoyment for thousands of golfers each year. In fact, the Charity Golf Tournament of the Chinatown YMCA is held there annually which is beneficial to the participants as well as the YMCA. The Sharp Park location is close by, easy to reach and fuel saving thus helping to protect the environment for us District 7 golfers.

Please vote to deny the appeal of the anti-golfing groups and approve the Natural Areas Plan and move on.

Thank you for your consideration.

Weyland Lum
64 Rockridge Dr.
San Francisco, CA. 94116

Subject: Natural Area Plan for Sharp Park
Date: Fri, 27 Jan 2017 11:10:59 -0800
From: Mr. Julius Yap <jyap@siprep.org>
To: info@sfpublicgolf.org

S.F. Board of Supervisors,

As a golfer, Pacifican, and coach of San Francisco's St. Ignatius College Preparatory's Boys and Girls golf team's I am appealing to you to keep the Natural Area Plan in place for Sharp Park Golf course. The Boys and Girls golfers of S.I. have been allowed to practice, play, and compete at Sharp Park for twenty years at an affordable price. We share the course with Terra Nova High School and several other public schools in the area. For our children and the golfers of San Francisco and Pacifica I ask that you put a stop to the attempts to shut down a golf course that allows red-legged frogs and garter snakes to co-exist with the golfing population with no harm to either. Thank you for considering all of us in your deliberations.

Sincerely,

Julius Yap

Subject: Sharp Park

Dear Supervisor Yee –

You will probably get a lot of these emails as the text was suggested by SF Public Golf Alliance. I agree with them however and while I am using their suggested text, I want you to know some additional things about me. I have voted in every election since I turned 21 and have lived in the Bay area since I came to college at USF in 1967. My paternal Grandparents lived at 80 Liberty Street. My wife and I are living in the house her grandparents owned since 1929. We will not be moving ever again. This issue is a very important one to me as I get ready to retire and go on a fixed income. I will be voting in the future for anyone who leaves Sharp Park as a golf Course. I would like to be able to vote for you.

I am a District 7 resident, a Sharp Park golfer, and a supporter of the Rec & Park Department's Natural Areas Plan, which among other things reconfirms the Department's commitment to keep the 18-hole Sharp Park Golf Course open, while improving habitat in the wetlands for frogs and snakes.

That Natural Areas Plan was approved by both the Planning and the Rec & Park Commissions at their December 15 joint meeting. Now it appears that the same anti-golf groups that have been trying for years to close the golf course, are going to appeal the Commissions' decisions to the Board of Supervisors: SF Examiner, Dec. 16, 2016: <http://www.sfexaminer.com/sf-appeal-likely-following-commission-approval-natural-areas-management-plan/>

Sharp Park is a beautiful place that provides reasonably-priced enjoyment and healthful exercise to thousands of golfers each year. It is convenient to me and other residents of District 7 and the City's southern neighborhoods -- just a 15-minute freeway drive from Stonestown. Please keep it open. Please do not allow these anti-golf groups to delay and obstruct the City's plans to improve habitat while keeping the golf course open. Their delaying tactics have been going on for years and years, and their arguments have been rejected not only by Rec & Park and Planning Departments, but also by the Corps of Engineers, the US Fish & Wildlife Service, the Coastal Commission, and state and federal courts in San Francisco and San Mateo County.

It is time to move on. Please vote to deny the appeal, and to approve the Natural Areas Plan.

Kenneth Christopher

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

Subject: Please protect wetlands and reject any SNRAMP that includes golf course redevelopment
Date: Friday, February 17, 2017 10:26:43 AM

Dear San Francisco Board of Supervisors:

I am writing to urge you to reject the Final Environmental Impact Report (FEIR) for the proposed Significant Natural Resource Areas Management Plan (SNRAMP), unless and until the Sharp Park Golf Course redevelopment is removed from the plan. The vast majority of California's wetlands have been drained, degraded and destroyed. Sharp Park is home to federally protected, endangered California Red-Legged Frogs (*Rana draytonii*), California's official state amphibian. The Board of Supervisors should work to protect, rather than to kill, harm and harass these frogs, which is what happens when the City pumps the Sharp Park Wetlands out to sea, causing the frogs' egg masses to be stranded on dry land. I wholeheartedly oppose any usage of taxpayer funds that results in the destruction of rare wetland ecosystems or the degradation of important wildlife habitat. Using taxpayer dollars to drain wetlands for non-essential purposes is thoroughly unethical. As such, I again request that you not approve any version of a Significant Natural Resource Areas Management Plan that condones or funds such activities. Please see www.savethefrogs.com/sharp-park for more info, and remember that there are over 1,000 other golf courses in California.

Thank you,
Brandi Farrar

Dear Board,

The SF Board of Supervisors has taken action to approve a long-term management plan that includes draining the Sharp Park Wetlands, home to the endangered & federally protected California Red-legged Frog & other wildlife. You want to create a golf course. Please protect these wetlands & reject the FEIR for SNRAMP. We must preserve our environment with its wildlife & endangered species. When they are gone, they are gone forever. We only have one chance.

Please consider my comments before the meeting on February 28th. There are over 1,000 golf courses in CA. Don't destroy the land for another course.

Thank you,

Subject: Please protect wetlands and reject any SNRAMP that includes golf course redevelopment
Date: Saturday, February 18, 2017 10:20:30 AM

Dear San Francisco Board of Supervisors:

I am writing to urge you to reject the Final Environmental Impact Report (FEIR) for the proposed Significant Natural Resource Areas Management Plan (SNRAMP), unless and until the Sharp Park Golf Course redevelopment is removed from the plan. The vast majority of California's wetlands have been drained, degraded and destroyed. Sharp Park is home to federally protected, endangered California Red-Legged Frogs (*Rana draytonii*), California's official state amphibian. The Board of Supervisors should work to protect, rather than to kill, harm and harass these frogs, which is what happens when the City pumps the Sharp Park Wetlands out to sea, causing the frogs' egg masses to be stranded on dry land. I wholeheartedly oppose any usage of taxpayer funds that results in the destruction of rare wetland ecosystems or the degradation of important wildlife habitat. Using taxpayer dollars to drain wetlands for non-essential purposes is thoroughly unethical. As such, I again request that you not approve any version of a Significant Natural Resource Areas Management Plan that condones or funds such activities. Please see www.savethefrogs.com/sharp-park for more info, and remember that there are over 1,000 other golf courses in California.

Sincerely,
Doris Potter

Dear San Francisco Board of Supervisors,

I am writing to urge you to reject the Final Environmental Impact Report (FEIR) for the proposed Significant Natural Resource Areas Management Plan (SNRAMP), unless and until the Sharp Park Golf Course redevelopment is removed from the plan.

The vast majority of California's wetlands have been drained, degraded and destroyed. Sharp Park is home to federally protected, endangered California Red-Legged Frogs (*Rana draytonii*), California's official state amphibian.

Wetlands are essential for a healthy environment. They provide habitat for fish, wildlife and plants, recharge groundwater, reduce flooding, provide clean drinking water, regulate our climate. Unfortunately, over half of America's wetlands have been lost since 1780, and wetland losses continue today. There is an urgent need to protect wetlands today.

The Board of Supervisors should work to protect, rather than to kill, harm and harass these frogs, which is what happens when the City pumps the Sharp Park Wetlands out to sea, causing the frogs' egg masses to be stranded on dry land. I wholeheartedly oppose any development that results in the destruction of rare wetland ecosystems or the degradation of important wildlife habitat. To drain wetlands for non-essential purposes is thoroughly unethical.

As such, I again request that you not approve any version of a Significant Natural Resource Areas Management Plan that condones or funds such activities.

Please see www.savethefrogs.com/sharp-park for more info, and remember that there are over 1,000 other golf courses in California.

Subject: Reject SNRAMP golf course and protect wetlands
Date: Friday, February 17, 2017 2:05:24 PM

Dear San Francisco Board of Supervisors:

As a property owner in San Francisco, I urge you to reject the FEIR for the SNRAMP as drafted because it includes re-development of the Sharp Park Golf course. The golf course re-development will involve the drainage and degradation of some of the last remaining habitat in the city for many species including the red-legged frog. This will undoubtedly cause the death of not only these threatened frogs but other native species as well.

A golf course that loses revenue for the city is not where we need to be putting our efforts, especially when it involves the killing of native species. A golf course is not open wild space- it requires constant maintenance and chemicals for upkeep. Taxpayer money put into a golf course is not a good example of what San Francisco and the Bay Area stand for, which is eco-friendly and environmentally aware development.

I urge you to reject any version of the SNRAMP plan that involves wetlands drainage and golf course support.

Thank you,
Lisa Tucker, Esq.

Dear San Francisco Board of Supervisors:

I am writing to urge you to reject the Final Environmental Impact Report for the proposed Significant Natural Resource Areas Management Plan, unless and until the Sharp Park Golf Course redevelopment is removed from the plan. The Sharp Park Golf Course has been heavily and rightly criticized by scientists, conservation groups, and community park advocates for the past decade, due to its harmful impacts on imperiled wildlife, and its misuse of taxpayer funds that could be more effectively spent on important social and environmental programs.

The vast majority of California's wetlands have been drained, degraded and destroyed. Sharp Park is home to federally protected, endangered California Red-Legged Frogs (*Rana draytonii*), California's official state amphibian. The Board of Supervisors should work to protect, rather than to kill, harm and harass these frogs, which is what happens when the City pumps the Sharp Park Wetlands out to sea, causing the frogs' egg masses to be stranded on dry land.

SAVE THE FROGS! and the vast majority of non-golfers throughout San Francisco and elsewhere are wholeheartedly opposed to any usage of taxpayer funds that results in the destruction of rare wetland ecosystems or the degradation of important wildlife habitat. Using taxpayer dollars to drain wetlands for non-essential purposes is thoroughly unethical. As such, I again request that you not approve any version of a Significant Natural Resource Areas Management Plan that condones or funds such activities.

Please see www.savethefrogs.com/sharp-park for more info, and remember that there are over 1,000 other golf courses in California.

Sincerely,

Kevin Oury

**RE: Remove Sharp Park Golf Course Redevelopment Project at 2/28/17
Board of Supervisors Appeal Hearing**

Dear Supervisor,

The San Francisco Young Democrats' Executive Board writes to urge you to remove the controversial Sharp Park Golf Course Redevelopment Project from the Natural Resource Areas Management Plan Environmental Impact Report (NRAMP EIR). This project, for a golf course located in Pacifica, is not a wise investment for San Francisco residents and taxpayers, and is well outside the scope of a plan focused on "natural areas."

The Sharp Park Golf Course is a financial drain for San Francisco, having lost more than \$1.75 million in the last 11 years. San Francisco already manages five golf courses within its own City and County boundary, and our communities want and need reinvestments in neighborhood park and recreation amenities.

Removing the redevelopment project from the NRAMP EIR is consistent with what the Recreation and Park Department promised the public and policy-makers in 2009 when it stated:

*"Because redesigning or eliminating the Sharp Park Golf Course is a separate proposal being studied by SFRPD, **it will not be included or evaluated as part of the proposed SNRAMP project analyzed in the EIR.** Should changes to the Sharp Park Golf Course be proposed, **they would undergo a separate regulatory review, including CEQA environmental review.**"* (emphasis added) Source 2009 NRAMP EIR Scoping Report.

Despite this promise, the NRAMP EIR now includes a golf course redevelopment project that would redesign golf course holes, redevelop numerous areas of the course, and dredge the wetlands. This redevelopment is projected to cost San Francisco taxpayers \$11 million, not including millions more in future repairs to armor the sea wall. Less expensive, more environmentally-friendly alternatives exist, but they were not reviewed in this EIR. Scientists from Bay Area universities and institutions have criticized the redevelopment project.

We hope you agree with us and that you'll uphold the prior written commitment by the Recreation and Park Department that this golf course redevelopment project has no place in this NRAMP EIR, and will accordingly support removing it.

Sincerely,

San Francisco Young Democrats Executive Board

Dear Board of Supervisors,

The University of San Francisco's Eco Restoration Club urges you to remove the Sharp Park Golf Course Redevelopment Project from the Natural Resource Areas Management Plan Environmental Impact Report (NRAMP EIR).

As you may be aware, USF students live throughout San Francisco, and we enjoy the many public recreational amenities that the City offers. But this redevelopment of a golf course, which harms the endangered San Francisco Garter Snake and California Red-legged frog, and is located in Pacifica, is a problematic use of City funds.

We're also concerned that the Recreation and Park department, by inserting the golf course redevelopment into the Natural Resource Areas Management Plan EIR, did not honor their written promise:

"Because redesigning or eliminating the Sharp Park Golf Course is a separate proposal being studied by SFRPD, it will not be included or evaluated as part of the proposed SNRAMP project analyzed in the EIR. Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review." Source 2009 NRAMP EIR Scoping Report.

Scientists from the University of California and San Francisco State have criticized the golf course redevelopment has further harming the habitat for the endangered snake and frog. We are also concerned that less expensive, more environmentally-friendly alternatives were not reviewed in this EIR.

By including the golf course redevelopment in the plan, the City is not only breaking the public trust, but will also be exporting millions of recreation dollars to subsidize cheap golf in Pacifica. San Francisco already manages five golf courses within its own City and County boundary that do not harm endangered species.

We hope you agree with us and that you'll uphold the prior written commitment by the Recreation and Park Department. We urge you to vote to remove the golf course redevelopment from the NRAMP EIR. Thank you very much.

Best,

RE: Objections to Sharp Park Golf Course Redevelopment

Dear Supervisor Safai:

Thank you for your leadership in San Francisco and your support of our City's neighborhood, youth, social, and recreational services. We are writing to urge you to vote to remove the Sharp Park Golf Course Redevelopment from the Natural Resource Areas Management Plan's EIR.

We are organizations that support and prioritize a healthy and equitable San Francisco budget – one that supports those in our society who are most at-risk of being left behind by anticipated budget cuts. In the next budget, San Francisco-based recreation centers, youth services, after-school programs, and services for the homeless and the elderly may be cut.

We are concerned that a multi-million dollar redevelopment plan for Sharp Park Golf Course has been inserted into a Natural Areas Resource Management Plan. By approving the plan, the City is committing to spend even more taxpayer dollars on a Pacifica-based golf course that loses up to several hundred thousand dollars a year. (See attached table)

We do not support a proposal to spend more City resources in places that provide little benefit to San Francisco residents. We ask that fiscally responsible decisions be made to protect San Francisco's neighborhood services.

Please remove the Sharp Park Golf Course redevelopment from the Natural Resource Areas Management Plan.

Sincerely,

Jackie Manion
Executive Director

Re: Uphold the Planning Commission's certification of the NRMP's adequate EIR

Dear Supervisors,

On behalf of Walk SF, I urge you to reject the appeal of the Environmental Impact Report of the Significant Natural Resource Areas Management Plan. This important document outlines how the San Francisco Recreation & Park Department (RPD) can actively protect the City's urban forest, support and protect its biodiversity, and promote environmental justice.

Walk San Francisco understands that the land the Recreation and Parks Department stewards is integral to making our community healthier and more livable. These lands allow people to get away from the hustle and bustle of city life, to get mental and physical breaks, and to experience nature without having to have the resources to travel outside the city. The quality of San Francisco's trails, vistas, and forests are unmatched in urban settings throughout the nation, and San Francisco's residents and visitors deserve a healthy environment.

These natural areas also support an array of native habitats and species, some found nowhere else in the world, such as the San Francisco garter snake and mission blue butterfly. In total, 140 species (67 animals & 73 plants) are sensitive species presently or historically known to occur in these particular areas. Some of these species have state or federal protections. Responsible maintenance, as outline in the management plan, of these lands will enhance biodiversity and maintain populations of sensitive species.

Lastly, the plan provides guidelines for education, research, and stewardship programs. These landscapes offer a myriad of learning opportunities without having to leave San Francisco. Various schools and colleges, academies, museums, and children's programs use the natural areas for environmental education. This management plan further promotes these opportunities as a call for environmental justice.

While some members of the public are concerned with the proposed tree management, the plan focuses on trees that are in poor or fair condition (80% of trees slated for removal), and replaces them with a younger, healthier tree that supports the urban forest and the overall environment over a 20 year period.

The Planning and Recreation and Park Commissions, after hearing testimony from more than 100 members of the public, voted to certify the NRMP's final Environmental Impact Report (EIR), and the Recreation and Park Commission unanimously adopted its California Environmental Quality Act (CEQA) findings and approved the plan.

Please reject this EIR appeal and uphold the Commissioners' certification of the adequate EIR and the adoption Plan so that remnant landscapes and our ability to promote our forest, biodiversity, and recreational programming within the City limits are not compromised.

Sincerely,

A handwritten signature in black ink that reads "Josie Ahrens".

Subject: EIR DOES NOT identify the impacts of SNRAMP implementation, mitigation needed
Date: Tuesday, February 21, 2017 1:33:03 PM

Attention SF Board of Supervisors:	There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:
1. Public access restrictions:	Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.
2. Increase in greenhouse gases:	You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.
3. Increase in herbicides:	The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.
4. CEQA process violations:	The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.
5. Trail closures:	The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.
6. No required tree replacement in Project area:	The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.
7. Project implementation before EIR violates CEQA:	The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.
8. Bicyclists singled out:	The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.
9. Impact of fencing ignored:	The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.
10. Evidence of bias:	Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

Subject: Re: APPEAL RESPONSE - SUPPLEMENTAL MATERIAL: Appeal of CEQA Certification of Final Environmental Impact Report - Significant Natural Resource Areas Management Project - Appeal Hearing on February 28, 2017
Date: Tuesday, February 21, 2017 1:17:32 PM

Hi Brent Jalipa.

Thank you for sending this appeal response. It's interesting that the City of San Francisco states that "under existing conditions, the pumps manage water levels in Horse Stable Pond to maintain California red-legged frog habitat...", given that in 2011, the San Francisco Recreation and Parks Department was forced to re-locate at least 107 California red-legged frog egg masses from areas where the egg masses were laid, due to the RPD pumping the wetlands out to sea (<http://www.savethefrogs.com/actions/sharp-park/images/egg-mass-movement-emails.pdf>). This almost certainly resulted in frog death as the eggs were taken to suboptimal sites and placed in artificially crowded conditions. It is also unknown how many egg masses died directly of dessication before being rescued and thus were not even included in the count of affected frogs. Furthermore, USFWS biologist David Lee Kelly states in the last page of the documented linked to above that he expects egg mass strandings to occur indefinitely so long as pumping operations continue.

As such, the City and its employees should cease to ever speak of pumping and protecting California Red-Legged Frogs in the same sentence, as the two activities are thoroughly incompatible.

Thank you.
Kerry

Hi John Carroll and the Board of Supervisors,

SAVE THE FROGS! and the vast majority of non-golfers throughout San Francisco and elsewhere are wholeheartedly opposed to any usage of taxpayer funds that results in the destruction of rare wetlands ecosystems or the degradation of important wildlife habitat. Using taxpayer dollars to drain wetlands for non-essential purposes is thoroughly unethical. As such I request you not approve any version of a Significant Natural Resource Areas Management Plan that condones or funds such activities.

Sharp Park would provide significantly more financial and recreational benefit to the SF Bay Area community if it were (1) freely accessible and (2) managed for its scenic beauty and biodiversity.

I suggest:

- removing the fences and walls that are built to keep out those who cannot pay the grounds fees;
- restore the habitat so that it is not a barren mowed green;
- stop draining the wetland;
- create hiking trails;
- promote the area to hikers, walkers, runners, outdoor enthusiasts and youth;
- allow people to enjoy the scenic beauty of Sharp Park without fear of being hit on the head by a golf ball, and without having to wonder if their tax dollars are contributing to the extinction of native California wildlife.

Please see www.savethefrogs.com/sharp-park for more info, and remember that there are over 1,000 other golf courses in California.

Sincerely,
Kerry Kriger, Ph.D.

Subject: EIR DOES NOT identify the impacts of SNRAMP implementation, mitigation needed
Date: Tuesday, February 21, 2017 1:11:40 PM

Attention SF Board of Supervisors:

There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:

1. Public access restrictions:

Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.

2. Increase in greenhouse gases:

One need not be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.

3. Increase in herbicides:

The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.

4. CEQA process violations:

The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.

5. Trail closures:

The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.

6. No required tree replacement in Project area:

The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.

7. Project implementation before EIR violates CEQA:

The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.

8. Bicyclists singled out:

The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.

9. Impact of fencing ignored:

The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.

10. Evidence of bias:

Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

Attention SF Board of Supervisors:	There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:
1. Public access restrictions:	Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.
2. Increase in greenhouse gases:	You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.
3. Increase in herbicides:	The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.
4. CEQA process violations:	The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.
5. Trail closures:	The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.
6. No required tree replacement in Project area:	The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.
7. Project implementation before EIR violates CEQA:	The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.
8. Bicyclists singled out:	The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.
9. Impact of fencing ignored:	The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.
10. Evidence of bias:	Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

Thank you for protecting the environment and the people

San Francisco Board of Supervisors
1 Dr. Carlton B. Goodlett Place
City Hall, Room 244
San Francisco, CA 94102

Dear SF Board of Supervisors,

Stand.earth, formerly ForestEthics, is a leading environmental organization based in San Francisco.

We are concerned that the Natural Resource Areas Management Plan will create climate change because it fells over 18,000 large trees without adequate replacement.

The Environmental Impact Report for the plan contains math errors, incorrect assumptions, and outdated science. For example, the Greenhouse Gas calculations confuse rates with stocks, assume that 90% of the existing trees are not absorbing carbon, and presume that all new trees will survive. The tree replacement rate for the entire plan is only 0.19. Correcting these problems in accordance with best available science shows that the Natural Resource Areas Management Plan creates significant Greenhouse Gas Emissions for the San Francisco Bay Area that must be mitigated.

Please refer the EIR back to the Planning Department so that it can provide an accurate picture of Greenhouse Gas Emissions under the California Environmental Quality Act and include further mitigation for the environmental harm to climate and public health. Please ensure that the City of San Francisco continues to be a global leader in the fight for climate resilience.

Thank you for your help and consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Ross Hammond", with a long, sweeping horizontal stroke extending to the left.

Ross Hammond

Subject: protect wetlands and reject any SNRAMP that includes golf course redevelopment
Date: Tuesday, February 21, 2017 10:03:22 PM

Dear San Francisco Board of Supervisors:

I am writing to urge you to reject the Final Environmental Impact Report (FEIR) for the proposed Significant Natural Resource Areas Management Plan (SNRAMP), unless and until the Sharp Park Golf Course redevelopment is removed from the plan. The vast majority of California's wetlands have been drained, degraded and destroyed. Sharp Park is home to federally protected, endangered California Red-Legged Frogs (*Rana draytonii*), California's official state amphibian. The Board of Supervisors should work to protect, rather than to kill, harm and harass these frogs, which is what happens when the City pumps the Sharp Park Wetlands out to sea, causing the frogs' egg masses to be stranded on dry land. I wholeheartedly oppose any usage of taxpayer funds that results in the destruction of rare wetland ecosystems or the degradation of important wildlife habitat. Using taxpayer dollars to drain wetlands for non-essential purposes is thoroughly unethical. As such, I again request that you not approve any version of a Significant Natural Resource Areas Management Plan that condones or funds such activities. Please see www.savethefrogs.com/sharp-park for more info, and remember that there are over 1,000 other golf courses in California. PROTECT ENDANGERED SPECIES NOT BUSINESSES!!!

Sincerely,
S. Lundgren

Subject: EIR DOES NOT identify the impacts of SNRAMP implementation, mitigation needed
Date: Wednesday, February 22, 2017 7:43:05 AM

**Attention SF
Board of
Supervisors:**

I support the issues brought up below. My concern is that there is a lot of false information about eucalyptus trees so people tend to hate them. Yet parks without trees are not good places for recreation and I don't want our parks returned to dunes. I am also gravely concerned about the use of pesticides to kill the tree roots and the loss of carbon dioxide mitigation. We have much to fear from global warming. Let's not make it worse. This is a very important issue and I will look carefully at your vote!

There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:

**1. Public access
restrictions:**

Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.

**2. Increase in
greenhouse
gases:**

I'm especially concerned about this!! You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.

**3. Increase in
herbicides:**

The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.

**4. CEQA
process
violations:**

The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.

**5. Trail
closures:**

The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.

**6. No required
tree
replacement in
Project area:**

The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area. Shrubs and trees, especially mature trees do not have the same ability to sequester carbon!!

**7. Project
implementation
before EIR
violates
CEQA:**

The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.

8. Bicyclists singled out:	The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.
9. Impact of fencing ignored:	The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.
10. Evidence of bias:	Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

|--|---|
| Attention SF Board of Supervisors: | There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about: |
| 1. Public access restrictions: | Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact. |
| 2. Increase in greenhouse gases: | You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong. |
| 3. Increase in herbicides: | The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use. |
| 4. CEQA process violations: | The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR. |
| 5. Trail closures: | The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address. |
| 6. No required tree replacement in Project area: | The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area. |
| 7. Project implementation before EIR violates CEQA: | The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks. |
| 8. Bicyclists singled out: | The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false. |
| 9. Impact of fencing ignored: | The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP. |
| 10. Evidence of bias: | Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure. |

Subject: EIR DOES NOT identify the impacts of SNRAMP implementation, mitigation needed
Date: Wednesday, February 22, 2017 6:34:54 AM

Attention SF Board of Supervisors:	There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:
1. Public access restrictions:	Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.
2. Increase in greenhouse gases:	You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.
3. Increase in herbicides:	The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.
4. CEQA process violations:	The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.
5. Trail closures:	The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.
6. No required tree replacement in Project area:	The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.
7. Project implementation before EIR violates CEQA:	The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.
8. Bicyclists singled out:	The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.
9. Impact of fencing ignored:	The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.
10. Evidence of bias:	Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

Subject: EIR DOES NOT identify the impacts of SNRAMP implementation, mitigation needed
Date: Wednesday, February 22, 2017 6:05:07 AM

Attention SF Board of Supervisors:

There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:

1. Public access restrictions:

Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.

2. Increase in greenhouse gases:

You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.

3. Increase in herbicides:

The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.

4. CEQA process violations:

The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.

5. Trail closures:

The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.

6. No required tree replacement in Project area:

The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.

7. Project implementation before EIR violates CEQA:

The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.

8. Bicyclists singled out:

The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.

9. Impact of fencing ignored:

The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.

10. Evidence of bias:

Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

Signed:

Dear John,

I hope you are surviving the avalanche of documents and doing ok!

As promised, attached please find comments to the Board of Supervisors about the Appeal for the Final EIR for the proposed Significant Natural Resource Areas Management Plan.

RE: Board of Supervisors File No. 170044 to be heard on February 28, 2017

Thank you so much for your help.

Warm regards,
Nadine

Letter: Greetings,

PLEASE SUPPORT THE EIR APPEAL FOR SNRAMP

Dear Members of the Board of Supervisors,

Thank you for your public service to the City of San Francisco.

We ask you to please support the appeal of the Environmental Impact Report (EIR) for the Significant Natural Resource Areas Management Plan per Board of Supervisors File No. 170044 on February 28, 2017.

The EIR does not make a good faith effort to estimate greenhouse gas emissions using best available information as is required by the California Environmental Quality Act. Rather, the EIR presents alternative facts and math errors to conceal the truth – that the Plan will cause climate change for San Francisco.

Please stand up for public safety and public health. Please send EIR number 2005.0912E / SNRAMP back to Planning to correct the inadequacies and perform the Greenhouse Gas calculations in good faith as required by law. Please add mitigation for the significant environmental harm this plan will cause.

SF Rec and Park plans to use chainsaws and toxins to kill over 18,000 large trees and is misleading the public about climate change in order to do it. We cannot believe this is happening in San Francisco.

The environment is about to be decimated at the federal level. Why would we willingly destroy our own?

I am writing to ask for your help in saving the 18,448 trees slated for deforestation by SF Rec and Park in areas including the popular Mt. Davidson Forest. I ask you to please help halt the use of toxic herbicides like Roundup and Garlon which are being deployed in parks where children play to kill the trees permanently.

I am very concerned about the negative effects this plan will have on public safety, public health, children, wildlife, and climate change in San Francisco.

Saving healthy large trees in our urban parks is vitally important to me. This plan is a hazardous use of taxpayer dollars in a time of scarce resources. Under this plan, 18,448 trees out of the total 117,433 would be removed. This is a significant 16%.

The Replacement Rate is only 0.19. The plan kills 18,448 trees and only replants 3,448 of them over time. This is unacceptable to the public and will cause climate change. The minimum Replacement Rate must be 1:1 actual trees to mitigate global warming. Best practice per the U.S. Forest Service would be 3:1 to compensate for the inevitable partial mortality of saplings and the loss of mature carbon sequestration.

It is shocking that the SF Planning Department is trying to rely upon a "disagreement among experts" excuse to avoid protecting its citizens from climate change. Please help.

PUBLIC SAFETY: The proposed deforestation plan to remove 16% of the trees in the Natural Resource Areas poses a serious risk to public safety because it poisons children's recreation areas with toxic herbicides like Roundup and Garlon that will bioaccumulate, it increases the risk that trees will fall on hikers from windthrow, it degrades air quality with NOx pollutants, it elevates mudslide risk to homes, and it causes climate change and harms San Francisco's resilience by removing one of our last defenses against climate change -- large stature trees -- without adequate replacement. The City could be held liable for these public safety consequences at great cost.

INCORRECT CARBON CALCULATIONS: The Greenhouse Gas calculations in the EIR are wrong. By law, CEQA Section §15364.5 requires San Francisco to determine the significance of impacts from Greenhouse Gas Emissions. Greenhouse gases include but are not limited to carbon dioxide, methane, and nitrous oxide. Per the law, the lead agency should make a good-faith effort, based on available information, to describe, calculate or estimate the amount of greenhouse gas emissions resulting from a project.

CEQA requires the lead agency to answer these questions in good faith:

Would the project:

a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

b) Conflict with any applicable plan, policy or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases?

Initially, SF Rec and Park only assessed greenhouse gas impacts for San Francisco qualitatively using a Compliance Checklist and found them “not to be significant.” This checklist does not contain any questions about saving park trees for carbon sequestration. This qualitative approach was not legal in Pacifica. The deforestation of the 15,000 trees in Sharp Park had to be assessed with GHG numbers.

In 2013, SF Rec and Park hired Environmental Science Associates (ESA) to help perform the greenhouse gas calculations for the EIR. These calculations are not adequate for at least 3 reasons:

: Math Errors: The Greenhouse Gas calculations contain pure math errors where the analyst confuses annual rates with stocks and adds them together, producing an invalid number that SF Rec and Park uses in the EIR. This is inadequate and not disclosed.

: 90% of Trees Deleted: The EIR assumes 90% of the existing trees are absorbing zero carbon because they are over 20 years old. According to best available science from 2010 Forest Ecology and Management and the 2014 U.S. Geological Survey, older trees continue to actively sequester more carbon than younger trees. To be good faith and complete, the Greenhouse Gas Emission calculations must include all 18,448 trees.

: 100% Tree Survival: The Greenhouse Gas calculations presume that 100% of the newly-planted trees are live oaks and will survive at least 20 years. This is overly optimistic. Per the Department of Public Works, oaks are known to be uneven survivors in San Francisco because they prefer heat, wind protection, and good drainage. This is why in the 1800s, oak trees were found in San Francisco only in limited numbers in creek beds. To be good faith and adequate, the EIR needs a more realistic tree survival rate when estimating net Greenhouse Gas Emissions.

The EIR is relying on math errors, gross omissions, and material misstatements to come to false conclusions about Greenhouse Gases for Sharp Park in Pacifica and in total. The EIR erroneously states that the plan would result in a “Net Sequestration Gain of approximately 202 MT of CO₂ per year.” It continues, “The proposed project would have a net GHG benefit and would not conflict with California’s goal of reducing GHG emissions set forth by the timetable established in AB 32.” This is written in the EIR Responses to Comments, Chapter 4, page 301, November 2016.

When the math errors are corrected using best available science and the same methodology, the truth begins to emerge. The plan would result in a Net

Sequestration Loss of -2,401 MT of CO₂ per year. This exceeds the threshold for significance under CEQA. The plan would also result in Total Net Carbon Emissions of 65,101 MT of CO₂ from the deforestation.

Subsequently, a top sustainability and greenhouse gas verification firm was hired to re-assess the carbon calculations using best practices in accordance with the California Global Warming Solutions Act (AB 32) and the California Air Resources Board U.S. Forest Project Offset Protocol. They found that felling the 18,448 trees per the plan would result in a loss of carbon sequestration over the life of the project of -44,275 MT of CO₂e and would release total carbon emissions of 177,572 MT of CO₂e.

Therefore, we are concerned that the Greenhouse Gas Emissions caused by the plan are significant under CEQA, violate AB 32, and must be mitigated.

By presenting Greenhouse Gas calculations in the EIR that contain both fundamental math errors and incomplete assumptions that have been disproved by available science, SF Rec and Park did not make a good-faith effort to estimate and disclose the greenhouse gas emissions from this project as required by law. This leaves the City vulnerable to future action under CEQA. Please refer the EIR back to Planning to remedy this.

METHANE EMISSIONS MISSING: Methane is absent from the EIR. Per the CEQA guidelines for Greenhouse Gases (§15364.5), "Greenhouse gases include but are not limited to carbon dioxide, methane, nitrous oxide." CA Senate Bill 1383 signed by Governor Brown in September 2016 requires a 40% reduction in methane emissions by 2030 versus 2013 levels. Decomposing wood releases equal amounts of carbon and methane. Per the EPA, over the 20-year time frame, methane is 84-87 times more powerful and dangerous than carbon.

The EIR is inadequate and incomplete because it ignores the potent methane emissions from the 18,448 trees that would be felled. The plan conflicts with CA Senate Bill 1383 signed into law to reduce methane. Please send the EIR back to Planning so that methane emissions can be included, calculated and mitigated.

ALTERNATIVE FACTS ABOUT CLIMATE CHANGE: At the joint SF Planning and SF Rec and Park Commission hearing on December 15, 2016, a Commissioner asked if the greenhouse gas calculations in the EIR were wrong. SF Rec and Park said the quantitative analysis in the EIR showed that the plan would be beneficial for the climate and concluded, "What you have is a disagreement among experts." This enabled the Commissioners to approve the EIR.

There is no disagreement about math. There is no disagreement about the law. The analysis of Greenhouse Gases in the EIR was not complete, not adequate,

and not done in good faith to fully disclose the impacts. SF Rec and Park is presenting alternative facts about climate change to justify a deforestation and pesticide plan that is dangerous and that will cause climate change in its current form. We urge the Board of Supervisors to reject this travesty. For the sake of public safety, please support the appeal of the EIR.

AIR POLLUTION: The Natural Resource Areas Plan would cause air pollution that is currently unmitigated. The EIR states that the Sharp Park deforestation of 15,000 trees “would result in significant unavoidable air quality impacts as a result of exceeding the BAAQMD thresholds for NOx pollutant emissions.” (EIR pages 438-440). It concludes that “cumulative impacts associated with criteria air pollutants would be significant and unavoidable.” Per Friends of the Urban Forest on January 24, 2017, roadside trees reduce nearby air pollution by more than 50% (Environmental Science and Technology Journal). The air pollution in the plan is currently not offset. Please send the EIR back to Planning so that mitigations for the degradation in air quality can be added.

INADEQUATE TREE REPLACEMENT: There was no replacement rate in the original official plan. If San Francisco wants to be a climate resilient city, then SF Rec and Park’s proposed new 0.19 replacement rate needs to be increased to a minimum of 1:1 with trees. Per the current plan, SF Rec and Park would replant only 3,448 trees out of 18,448 felled. The 15,000 large carbon-sequestering trees in Sharp Park would be killed and not replaced. This will cause climate change. At the hearing on December 15, 2016, SF Rec and Park mentioned that many of these 15,000 trees are in an “inaccessible canyon” in Sharp Park that would be out of sight of the general public.

We request that the minimum replacement rate be 1:1 or 18,448 trees. Best practice per the U.S. Forest Service 2016 would be 3:1 to account for the loss of carbon sequestration and the inevitable partial mortality of the saplings. Forests absorb 10x the carbon of perennial grasslands. Bushes are unacceptable to the public as replacement. If the replacement rate is not raised from 0.19 to a guaranteed 1:1 or higher with trees, then this plan will cause climate change and threaten public safety.

FOREST RESOURCES: The EIR inaccurately states that the impact on Forest Resources would be the same and less than significant across all of the options, from the most deforestation to the least. There is a significant difference between cutting down 18,448 trees and none. For example, the 1,600 healthy trees targeted for removal on Mt. Davidson would not be replanted on the mountain, and this is significant as 82% of the trees in a 3.5-acre area would be removed without reforestation. The 15,000 trees in Sharp Park would not be replanted at all. “Trees removed in Sharp Park would be replaced with native grassland and scrub species.” This is very significant and requires mitigation.

According to the USDA, "Of all the species sampled, eucalyptus stores and sequesters the most carbon, approximately 24.4% of the total carbon stored in San Francisco." Eucalyptus trees are a valuable part of San Francisco's green infrastructure and must be preserved as such.

INSUFFICIENT MITIGATION: Overall, mitigation in the EIR for the environmental harm is inadequate, and much more is needed. The EIR admits that this proposed large-scale deforestation experiment would cause significant unavoidable negative impacts on Air Quality, Biological Resources, Cultural Resources, and Recreation. The proposed 0.19 tree replacement rate across the entire plan is insufficient by orders of magnitude. Please send the EIR back to Planning for additional mitigation for greenhouse gas emissions (carbon and methane), loss of forest resources, NOx air pollution, destruction of cultural landmarks, and clearing of essential active forest carbon sinks needed to save San Francisco's valuable waterfront from flooding and sea level rise.

Tree Growth Never Slows

Idea debunked that young trees have the edge on their older siblings in carbon accumulation, U.S. Geological Survey, Nature Journal, January 2014
http://www.nature.com/news/tree-growth-never-slows-1.14536

Carbon Capture: Tree Size Matters

Yale Environment Review, July 2015

http://environment.yale.edu/yer/article/carbon-capture-tree-size-matters#gsc.tab=0

The EIR relies on opposite conclusions which were disproved by modern available science.

PUBLIC HEALTH: Our urban forests with tree canopy are significantly improving public health in San Francisco. Thousands of residents visit these sanctuaries for rejuvenation, exercise, and mental health every week. Doctors are issuing parks prescriptions for people to visit urban forests. Destroying 18,000 trees will hurt public health and well-being.

BIODIVERSITY and WILDLIFE: A tremendous biodiversity of 40 bird species including Great Horned Owls and Red-tailed Hawks make their home in SF Rec and Park areas including the Mt. Davidson Forest. The public does not want the sanctuaries of so many birds and animals to be destroyed.

Per Harvard University and the U.N., climate change is expected to become the greatest threat to biodiversity, the very goal of Natural Resource Areas. Killing 18,448 large trees without adequate replacement and causing climate change is sadly counterproductive to the Department's end goal of biodiversity.

FUNDING: SF Rec and Park has \$1 billion in unfunded deferred maintenance. We ask San Francisco to please spend taxpayer dollars on critical basis maintenance needs in the City's parks instead of removing green infrastructure like our urban park forests that are providing so many benefits to people, wildlife, and local climate resilience.

OUTDATED PLAN: The origin of the Natural Resource Areas Management Plan is 20 years old. The plan's goal is to return sizable portions of the San Francisco-owned landscape to how it looked in the 1700s. It was explained to the public on December 15, 2016 that because so much time had gone into this plan, it simply had to be approved. In the business world, a 20-year-old plan would be obsolete. Two decades ago, very few people cared about global warming. Now stopping climate change is an urgent priority. San Francisco is a city on the water threatened by sea level rise. We cannot afford to lose over 18,000 large trees and

replace them with bushes. That would put San Francisco on an accelerated path to climate catastrophe.

ORGANIZATIONS IN SUPPORT OF SAVING THE TREES:

Center for Environmental Health
ForestEthics (Stand.earth)
International Bird Rescue
WildCare
Breathe California
Rod Mast, President, Oceanic Society
Rev. Canon Sally G. Bingham
Shannon O'Leary Joy, Oceans 5, Sylvia Earle Alliance
Paul Hawken
Bill Wehl, Director of Sustainability, Facebook
Jayni Chase
Wendy Schmidt, The 11th Hour Project
Peter Coyote
Nikki Reed, Ian Somerhalder Foundation

Please support the appeal of the EIR for the Significant Natural Resource Areas Management Plan. Please send the EIR back to Planning to assess the greenhouse gas emissions in good faith and to add mitigation for the environmental harm.

We ask you to please consider removing Mt. Davidson and Sharp Park from the deforestation and habitat conversion plans. Please save as many trees as possible in the Mt. Davidson Forest and halt the associated spraying of toxic herbicides in parks where children play.

Please increase the tree replacement rate from 0.19 to a minimum of 1:1 or ideally 3:1 and replant a minimum of 18,448 trees to help prevent climate change.

San Franciscans treasure their wooded urban forests and do not want to see them harmed with chainsaws and pesticides. We ask the City of San Francisco - please do not destroy the sanctuaries of so many people, children, and wildlife.

Thank you very much for your consideration and help.

Comments

Name	Location	Date	Comment
Robert We	San Jose, CA	2016-11-29	Because I love the trees there when I go hiking.
Brook Sutton	San Francisco, CA	2016-11-30	Mt Davidson is a beautiful natural sanctuary and a San Francisco gem. Destroying any more of the trees there than rec and park has already done, is a travesty and increased waste of our taxpayer money that should be used elsewhere. Keep all the trees and preserve the environment instead of recklessly stripping the mountain and spraying toxins to appease a few zealots that don't want trees in SF, simply because they weren't here 500yrs ago. Please preserve Mt Davidson!
Steve C	Santa Rosa, CA	2016-11-30	Protecting natural habitat is vital; birds, wildlife and people all benefit from tree covered hills. Spraying toxic herbicides threatens wildlife and park users. Preserve and protect the Mt. Davidson forest.
Helen We	San Jose, CA	2016-11-30	These old trees give so much peace, tranquility, and shade to everyone who comes to them, as well as being a precious resource for all the native life. They are irreplaceable and critically important to the green environment of San Francisco.
Bennett Cottone	San Francisco, CA	2016-11-30	I grew up on and played on Mt. Davidson. I have a photo of it from the 1880s which shows it to have been bare rock. I don't see how that would be preferable to the forest as it is now.
Maria Van Gee	Zdorsko, Poland	2016-11-30	Getekend
Shelds Woody	Forest Hills, CA	2016-11-30	Born and raised in SF, lots of good memories on Mt Davidson
Katherine Button	Alameda, CA	2016-11-30	I grew up on Daewood, across the street from the park. I still visit many times a year, since I work in the city. My family recently held a reunion there. The park is a sanctuary, a happy place for me and my family. Please don't destroy it.
Marga Star	Enschede, Netherlands	2016-11-30	Save the Mt. Davidson Forest in San Francisco.
Russ Button	Alameda, CA	2016-11-30	I'm a native San Franciscan and want to see our city forest spaces preserved.
Giovanni Vassallo	San Francisco, CA	2016-11-30	I love the forest as it is and enjoy it. Please don't destroy this forest
Roberta Capobianco	San Francisco, CA	2016-11-30	Mt. Davidson is one of my favorite places in the city. Destroying the forest would ruin a peaceful, beautiful, and natural space for exercise, reflection, dog-walking, and family outings as well as a travesty to the local environment.
Zack Edwards	Washington, DC	2016-11-30	It's a beautiful haunting forest in the heart of the city. Why cut it down?
N.A.	Gardnerville, NV	2016-11-30	The Sierra Nevada has lost over 100 million trees in the last five years. Why would we go out of our way to destroy more of them?
Fernande Fournier	Luxembourg, Luxembourg	2016-11-30	Wir haben die Pflicht der Natur zu respektieren und zu beschützen. Nehmen Sie Ihre Verantwortung, bitte. Handeln Sie menschlich und zügig. Verschiedene "Menschen" sind nicht über allem erhaben! Merci.
Esabeth Eassen	Alameda, CA	2016-11-30	The city needs this green open space.
Christopher Bennett	Ross, CA	2016-11-30	I grew up playing in the magic of those forests. I don't want a cement bernalh there.
Fran Passacqua	Santa Rosa, CA	2016-11-30	I used to walk around there growing up in San Francisco.
Jennifer Baker	Rutland, VT	2016-11-30	This is my home place! I grew up at the corner of Ula and Waltham; my family owned the house from 1950-1970. Is there a reason to kill beautiful things that are part of our heritage and memory? Please save Mt. Davidson Forest!

Name	Location	Date	Comment
Dee Se gman	San Francisco, CA	2016-12-01	We desperately need to keep our green urban forests as that--forests--to help us breathe and keep the air cleaner. Don't turn San Francisco's forests into grasslands and shrubs!
Dmitri Hochstatter	San Francisco, CA	2016-12-01	I don't agree with the need to aggressively cut down trees in SF. I think the park dept. should take a more conservative stance on tree preservation.
Jennifer Michie	Leander, TX	2016-12-01	I'm an environmentalist, we keep destroying our planet. I want to keep as much nature intact for my one year old granddaughter to enjoy one day. She lives in San Francisco.
Tony Holiday	San Francisco, CA	2016-12-01	Protect the forest. do not use herbicides, AND put in restrooms like other parks have.
Joe Wicht	San Francisco, CA	2016-12-01	a) insecticides are awful. do not use them. b) allow the nature its own space. stop meddling.
Perrish D Andrea	San Francisco, CA	2016-12-01	GET AHEAD of yourselves, for crying out loud. Embrace and VALUE our trees. What's WRONG with you. You want it to look like it originated in the 1700s? Really?? THEN TEAR DOWN ALL THE BUILDINGS, TOO, because THEY sure as hell weren't there in the 1700s, either. This is about greed for profit, or, maybe, in the case of Mt. Davidson, it could be about religion as well. STOP THIS IDEA, NOW. VALUE the wooded areas we have! They are PRECIOUS and WONDERFUL.
Kyle Haley	San Francisco, CA	2016-12-01	Mt Davidson forest is a treasure. I'd hate to see it go. What is the reason? I've searched but don't see a clear reason for deforestation on the hill? I use to walk my 1 year old up my back every day when we lived there it was magical (despite going past the scary toxic spraying signs. What was that about?) Some charity would be appreciated.
Zac Wheatcroft	Petaluma, CA	2016-12-02	We think this is a horrible idea... It's not 1700 anymore, and there aren't a whole lot of other trees around, so let's just leave these in place... And to spray toxic shit all over the place too? Who the hell came up with this idea? Especially in this age of climate change, it's good to have as many trees around as possible.
Angela Miller	Grand Rapids, MI	2016-12-02	This is an oasis in the city. I was a nanny to a family in the Meridian neighborhood and we hiked those trails at least once a week. Taking pictures up to the top, acknowledging the Armenian genocide, and being thankful for such a lovely green space with fantastic views. This is not the way to solve the housing crisis. I cannot even be evicted on the table.
Lorcan Keating	San Francisco, CA	2016-12-02	I love the Mt. Davidson forest
carol mack	San Francisco, CA	2016-12-02	We need to preserve our natural open spaces.
RITA Ross	san jose, CA	2016-12-02	I love to breathe oxygen
Veena Singh	SF, CA	2016-12-02	If there is a safety reason for doing this, I would like to know what that is. If not, then why???
Parker Mathis	Hattiesburg, MS	2016-12-02	Save the trees.
Mark Werth	Portland, OR	2016-12-02	I lived in San Francisco for 6 years and loved this park.
Karen Lewis	San Francisco, CA	2016-12-02	The forest is beautiful and pesticides are criminal
Bettymermaid Miller	Daly City, CA	2016-12-02	Cutting down the trees on Mount Davidson presents a hazard to the neighborhood because of denuding of the mountain.

Jacqueline Argote	San Francisco, CA	2016-12-02	The four toxic herbicides being used on Mt. Davidson and other target areas are Roundup (glyphosate), Garon 4 Ultra (triclopyr), Mestone (aminopyrad), and Habitat/Arsenal/Chopper (metsapyr). Me as a San Francisco resident I am very concerned that SF Rec and Park's putting recreation areas with cancer-causing toxins in order to kill trees that the public wants to stay standing.
Daniel Lint	San Francisco, CA	2016-12-02	This is my home. I grew up on Mt Davidson and couldn't imagine anything other way.
Erin Cahalan	San Francisco, CA	2016-12-02	This is my neighborhood and I want to protect our natural environment.
Christine Yran	San Francisco, CA	2016-12-02	Destroying Mt Davidson is a disaster to our neighborhood and the city of SF.
Lyn Noce	San Francisco, CA	2016-12-02	Mt Davidson Forest is a treasure in our city San Francisco, this place is one of my favorite spots for hiking, I truly enjoy my time there.
Anya Prestey	San Francisco, CA	2016-12-02	I love this park. It's a hidden oasis in San Francisco. There are very few parks in the city, and none in this area.
june jobn	san francisco, CA	2016-12-02	This is the first I have heard about this. Such a lovely place should be protected. Were there public meetings about this?
Kelly Wash	San Francisco, CA	2016-12-02	It's criminal to use toxic pesticides anywhere, let alone somewhere used by local residents and animals - and close to our homes. Runoff will eventually get to our yards.
Eileen Pat	San Francisco, CA	2016-12-02	I care about nature in my city.
Wendy Cahalan	San Francisco, CA	2016-12-02	I live on Daewood Way near the forest area and it would be tragic to lose the trees that provide a natural habitat for so many animals and birds. We would also miss the natural trail. This city has very few green belts and we should be protecting this space vs. destroying it.
Liz Nichols	New York, NY	2016-12-02	Why are they doing this. Stop this right now! Stop mowing down forests and trees!!
Angela Jgmed	San Francisco, CA	2016-12-02	I would like to save this forest Mt.Davidson Forest, because I love trees, wild nature and this place is one of the my favorite ones.
Erch Braun	San Francisco, CA	2016-12-02	I want to save the trees
Annette Cardwe	San Francisco, CA	2016-12-02	Mt Davidson forest is one of my family's favorite spots in SF.
Derrick Hussey	New York, NY	2016-12-02	I'm the Lorax, and I speak for the trees.
Brendan Mcdermott	San Francisco, CA	2016-12-02	I recently purchased a house that shares a property line with Mt. Davidson. I purchased it because of the forest. Don't destroy our beautiful park that is woven deep into the fabric of the neighborhood. The resulting capsize property values on the hill and the city's tax revenue will suffer as a result. This is a huge environmental, economic and cultural stake on the part of San Francisco's Department of Parks And Recreation!
Stephanie Franke	New Buffalo, MI	2016-12-02	Mount Davidson is my favorite spot in the entire Bay Area! Please preserve this beautiful, peaceful oasis and leave it as is, the forest is what makes it so wonderful! Please stop threatening our health by using toxic chemicals to kill plants that should be left to thrive
Gabriel Wjgunawardena	San Francisco, CA	2016-12-02	I live in the neighborhood and love the Forrest!
Scott Turner	San Francisco, CA	2016-12-02	This is a terrible idea because the environment and ecosystem has changed and adapted to the current regime. Cutting down the trees will just add a new pressure on the existing plants and particularly animals currently living on the mountain. In addition to that, it's fundamentally a terrible idea to use carcinogens, particularly glyphosate which is strongly linked to bee and butterfly decline.

Joan Cudd hy	San Franc sco, CA	2016-12-02	I ove h k ng Mt Dav dson
Karen Au	舊金山, CA	2016-12-02	I am s gn ng because I treasure the park and am worr ed about the ands de.
V cky Aronson	san franc sco, CA	2016-12-02	I care
Tamra W son	Lex ngton, KY	2016-12-02	Former San Franc sco res dent, her- p ease preserve th s and and keep t forested, as a natura preserve.
Ir s Chere	Santa Rosa Ca forn a, Hong Kong	2016-12-02	I can t be eve th s s happen ng!!!! Shame on anyone who s promot ng th s p an!!! Keep roundup out of our ves and keep th s beaut fu forest a ve!!!!
Brenton S mpson	San Franc sco, CA	2016-12-02	Don t k the trees. We have beaut fu parks. Keep them that way.
Va entyna Butenko	Wa nut Creek, CA	2016-12-02	I see mport ancestors of parks for fam es and k ds

Name	Location	Date	Comment
Kate Brdgeman	Glasgow, United Kingdom	2016-12-02	I lived in the mess on, was married at Ch na beach, and took photos in golden gate park. Leave the natural beauty of SF alone!!
Meane swer	San Francisco, CA	2016-12-02	Have you guys gone insane. Seriously, why would you destroy the little amount of nature this city has left??? Old growth cannot be replaced by new growth. I don't understand this mentality. If you want to destroy nature, do it in your own backyard.
Jessica Davies	san francisco, CA	2016-12-02	I used to live a few blocks away
Dmitri Gagnon	Тель-Авив, Israel	2016-12-02	I am a former resident of San Francisco and consider it my hometown. I'd like to do my part in preserving this forest.
Betsey Nea	Brasilia, Brazil	2016-12-02	Forests are where we go to reboot. Why on Earth would anyone consider doing away with such a gem? Lack of knowledge, we must forgive. Find another place to do your business people. A living forest brings life to a community, thereby. A resting place in a busy world.
Iona Ragnadotter	Stockholm, Sweden	2016-12-02	Forests save life. We have to preserve them. A lot of them!
Eric Jonsson	Berkeley, CA	2016-12-02	I own the house I grew up in on Rockdale Drive. I strongly oppose denuding Mt Davidson.
Kat Kro	San Francisco, CA	2016-12-02	This is a community treasure!
Josephine	san francisco, CA	2016-12-02	I like this area regularly, it's such an oasis of green serene beauty in the city. The environmental impact of clearing the trees seems huge. Please reconsider cutting the forest down.
Rich Costigan	Huntington Park, CA	2016-12-02	Climate warming.
Marie Franchin	san francisco, CA	2016-12-02	We should be planting more trees, not cutting them down.
Carolyn Randa	San Francisco, CA	2016-12-02	I'm signing because environments change and the eucalyptus forest is now the "natural" environment. Using toxic chemicals to try to change this harmful for the children, adults and pets that enjoy using the parks
Michael Regan	San Francisco, CA	2016-12-02	I am sick and tired of SF doing stupid things with our resources. Get rid of all of these extremists they are eco terrorists.
Jacqueline Pau	San Francisco, CA	2016-12-02	I grew up on Mt. Davidson and lived there regularly. It was a beautiful meditative place. I can't believe some people want to take out 1,600 of the beautiful trees. Absolutely NO! NO! NO! I still live in Glen Park at the foot of Mt. Davidson and now I take walks in that park. I am happy every time I look up at Mt. Davidson and see the trees of one of our most beautiful urban forests. How can you push street trees on everyone and then turn around and destroy a forest that was here before I was born! (that would be 1945)
Michael Regan	San Francisco, CA	2016-12-02	These Ecology terrorists need to be stopped. Tell the board to defund NAP that is the only thing that will stop this stupidity. Same thing with "rewilding" we don't need or want dangerous wild animals roaming our city streets.
Sharyn Hamer	Carmichael, CA	2016-12-02	This is a beautiful forest and provides a wonderful sanctuary for people and wildlife. Don't destroy it! As a former San Franciscan, born and raised there, I return often and love this area. Our environment is threatened by cutting trees down. We should be embracing ways to save it, not destroy it.
Carole Hess	Reno, NV	2016-12-02	Please do not destroy our beautiful Eucalyptus trees. They provide a wonderful humans and dogs to play, relax and commune with nature. My Davidson hosts many wonderful public events like mutant denomination Easter Sunrise services, weddings and many more. The trees create a rainforest environment which makes for a habitat for many animals.

Dewey Sprenze	San Franc sco, CA	2016-12-03	keep the trees!

Name	Location	Date	Comment
Jules Christeson	San Francisco, CA	2016-12-03	While I understand the desire to return the park to how it once was, clearing a beautiful forest like this will be devastating for many reasons. I love this park and it would also be a shame to see it changed so drastically. The park currently serves an important part in SF's ecosystem, and destroying it is not something we should be doing right now.
Ron Proctor	San Francisco, CA	2016-12-03	In order to implement this plan by the SF Rec and Parks NAP it will require that pest control applications in our city parks increase. And to remove 1,600 healthy trees that will require the use of more pesticides. The non-native (Eucalyptus) trees on Mt Davidson that will be destroyed are just felled by SF RPD as "Strategic Replacement" – a new criteria that Lisa Wayne dreamed up. It used to be "poor suitability" as a criteria for healthy tree removal but she soon realized that we are not fooled. It is an expensive experiment to enhance the biodiversity by killing trees and replacing them with grass and brush. Wayne's boss, the manager of SFRPD, Phyllis Gonsberg is on record as saying: "By prioritizing the removal of trees we can promote the health and sustainability of the forest." Not true, what you are doing is killing the ecosystems that have flourished for over a century now.
Hannah Davis	San Francisco, CA	2016-12-03	I'm signing because this park offers nature and peace and a beautiful park. Mt. Davidson will become much less magnificent sans trees.
Yd Amorrs	San Francisco, CA	2016-12-03	I love Mount Davidson and San Francisco
Tracy Lorenz	San Francisco, CA	2016-12-03	I care about our SF parks!
Mercedes Berthaud	Berkeley, CA	2016-12-03	Was part of my nature walks, before class at city, many years ago. When we were part of 24th and Hoffman Streets.
Stacy Chin	San Francisco, CA	2016-12-03	We need to replant trees felling these Eucalyptus down is the plan.
Goodwin Donald	San Francisco, CA	2016-12-03	I hike Davidson often and this deforestation for sandgusting and far below San Francisco standards...
Matt Redmond	San Francisco, CA	2016-12-03	I love riding my bike in this forest; it'd be a huge shame to lose a wonderful place of refuge in the middle of the city due to logging concerns.
Peter Koch	San Francisco, CA	2016-12-03	We need the forest!
Noah Stone	New Orleans, LA	2016-12-03	Dude... trees
William Dea	Grass Valley, CA	2016-12-03	I love hiking up there!
John Remus	Santa Clara, CA	2016-12-03	I hike here and have taken photos many times, it's beautiful and should remain wooded
Rosalee Gabriele	San Francisco, CA	2016-12-03	trees are awesome and anyone who wants to cut them down can personally fight me
Emma Hogan	San Francisco, CA	2016-12-03	Wtf
Morris Sverand	San Francisco, CA	2016-12-03	This is my home and many Remember Mt. as it's leave it alone. No need there are far greater uses taxpayers money in San Francisco.
Andrew Chang	San Francisco, CA	2016-12-03	This is one of my favorite places in the city.
Nick Vandehey	SAN FRANCISCO, CA	2016-12-03	I love that park. It's a little paradise in the city. Way more lovely than other non-forested hills.
Benjie Guy Yoche	Daly City, CA	2016-12-03	I run here often and I love nature
Greg Mcquaid	San Francisco, CA	2016-12-03	I've been on these trees. Walk my dog on Mt Davidson daily. The entire landscape would be utterly changed. We gonna return the Sunset to sand dunes too?

Enoch Ha e	San Franc sco, CA	2016-12-03	Save our tree s.
Br anna Lyon	San Franc sco, CA	2016-12-03	I have many fond memor es of h k ng Mt.Dav dson n e elementary schoo .
Wendy L nderborg	Bays de, CA	2016-12-03	I ove th s forest-we need to keep t for everyone- t s so mportant
Ar e Hernandez	San Franc sco, CA	2016-12-03	Im a nat ve San Franc scan and I want to keep my c ty as I remember t
Ay n Sor a	SAN Franc sco, CA	2016-12-03	care about the forests
Lorna Tuufu	San Franc sco, CA	2016-12-03	I ove my c ty green!!!!!!
V ck L McGu re, MA, MFT	Oak and, CA	2016-12-03	These are very good arguments. I can t mag ne the "benef ts" wou d outwe gh the ser ous prob ems th s wou d cause. Th ngs aren t as they were 20 or 10 years ago. C mate change has worsened-I thought we were supposed to p ant ots & ots of trees to he p med ate c mate change.
Ph Safer	A buquerque, NM	2016-12-03	Leave Mt. Dav dson s trees a one or face expens ve awsu ts and protests. Trees have many benef ts to the env ronment and the pub c.
Kat Beau eu	Soque , CA	2016-12-03	Beaut fu area ~ p ease he p to keep t that way !
Sebra Leaves	San Fran csco, CA	2016-12-03	Save the Mt. Dav dson Forest n ts current status. Spend your money tak ng care of the street trees the way the voters voted for you to do. We need tree ma ntenance, not tree s aughter.
Ho y McAdams	A ameda, CA	2016-12-03	Dont k the trees
Mary Reyno ds	Santa Cruz, CA	2016-12-03	Th s s a spec a p ace to San Franc scans and others.

Name	Location	Date	Comment
john tay or	sf, CA	2016-12-03	My sister has lived on Mt Davidson for 20+ years. This plan would effect her and anyone who enjoys the park negatively. I realize that Eucalyptus trees are not "native" but really, they have been here a long time, are not hurting anyone, help clean the air, and prevent erosion. Why cut so many down, why not repant, why use pesticides?? The pesticides use will certainly cause problems for asthmatics like my sister. What a shame this is.
Florence Korkames	San Antonio, TX	2016-12-03	This beautiful mountain top is one of the last places in San Francisco that allows an escape from the city, and preserves not only nature by the contemplative nature of this mountain-top. The Armenian monument is meant to be a place of peace and meditation, to reflect on a life that has happened. Without the forest that peace will be lost. We must preserve it.
nika vaks	mountain view, CA	2016-12-03	We need trees to breath.
Todd Greenspan	San Francisco, CA	2016-12-03	I support restoration of native habitats in large open spaces but not in a community park in the heart of a residential neighborhood. In particular, the spraying of herbicides is a real threat to the 100s of children of playground and weekly basis in the Mt. Davidson park. If you want to restore the mountain, I suggest removing the large religious symbol first.
Bona Pak	San Francisco, CA	2016-12-03	There isn't any other place like this. Makes me feel out of this world in this loud bustling city.
max ne chong	san francisco, CA	2016-12-03	We need the trees for our wildlife and birds. They are beautiful.
Mchae Hom	San Francisco, CA	2016-12-03	I love the space and it should stay green.
Debra Forth	San Francisco, CA	2016-12-03	I believe SF parks are one of our greatest assets in the city.
Douglas Cowan	San Francisco, CA	2016-12-03	It is a mistake to cut these trees and leave this hillside barren. There is a concern about erosion. It will be a Destruction of habitat. Park and Rec. Uses too much pesticides as well. Maybe we need to restructure Park & Rec.
Danny Wu	San Francisco, CA	2016-12-03	I love nature
Jenny Pardo	San Francisco, CA	2016-12-03	We need a forest - green natural space for kids and adults to go
Jasmine Chen	San Francisco, CA	2016-12-03	I love this forest
Rachel Koas	San Antonio, TX	2016-12-03	I want future generations of kids to see how beautiful nature is, not have it erased where you can only see it through books and pictures on the internet.
George Keuftedjan	Burroughs, CA	2016-12-03	We need the green trees
Kevin Contreras	Santa Barbara, CA	2016-12-03	I like trees
Jon Merker	San Francisco, CA	2016-12-03	stop tree murder!
Marika Stuurman	San Francisco, CA	2016-12-03	I grew up in these trees
Sherie Ingram	Arington, TX	2016-12-03	Destroying this forest would be a travesty.
Amy Obensk	San Francisco, CA	2016-12-03	I need nature.
Abdumoni	San Francisco, CA	2016-12-03	We need trees! Without trees carbon dioxide is going to be released into the atmosphere
Jenny Wang	San Francisco, CA	2016-12-03	I love nature!
Alexandra Reiff	San Francisco, CA	2016-12-03	We need trees.

Name	Location	Date	Comment
Jonathan Lee	San Francisco, CA	2016-12-03	This is my favorite spot in the city. Through the past few years I have been going through many family issues along with some personal and mental problems. Mt. Davidson was my place to cope, where I could hike, get some fresh air, pray at the cross, and of course enjoy the view. I always tell my peers that we need MORE places like this in the city, not less.
Sauzdana Banderas	San Francisco, CA	2016-12-03	I love this place.
Suzanne Sherman	Portland, OR	2016-12-03	Please...we need our trees and forests...for the wildlife, to help fight climate change, for our wellbeing...please leave us some bit of nature in a city already cleared cut and overdeveloped.
Victor Le	San Francisco, CA	2016-12-03	I ran a lot there for cross country practice. Memories were made in trees
Susan Shatt	San Francisco, CA	2016-12-03	Clearcutting the few green spaces with trees is both insane and rude to the residents of SF!
Emily Deremo	San Francisco, CA	2016-12-03	I love Mount Davidson!
Sydney Zucherman	San Francisco, CA	2016-12-03	PRESERVE THE ENVIRONMENTS
Andy Nguyen	San Francisco, CA	2016-12-03	& t;3
Karen Ta	San Francisco, CA	2016-12-03	I'm signing because I care.
Rodney Noble Jr	Meredith, NH	2016-12-03	Why would take out such an iconic and beautiful part out of the city? This is going to far!
Adan Durgeran	Santa Cruz, CA	2016-12-03	This is a beautiful mountain
Laura Perrone	San Francisco, CA	2016-12-03	I grew up at the base of Mt. Davidson and have been hiking to the top since before I can remember. It means a lot to me that we save these trees. Please sign!
Keren Gutierrez	San Francisco, CA	2016-12-03	I love my city
Bernie Zhu	San Francisco, CA	2016-12-03	I care about the environment
Michelle Perez	San Francisco, CA	2016-12-03	This is my neighborhood. I grew up hiking my Davidson and still do. It wouldn't be the same after deforestation
Sandra Reyes	San Francisco, CA	2016-12-03	This is one of the few sanctuaries remaining in SF and home to an abundance of wildlife. This was my backyard for 12 years and the source of peace and tranquility for many. Please please save this for future generations!!
W. Edson	San Francisco, CA	2016-12-03	San Francisco must remain iconic of environmentalism in order to stay relevant.
Vivian Imperia	San Francisco, CA	2016-12-03	This is an oasis in the city. It's gorgeous and peaceful.
Jeremy Enges	San Francisco, CA	2016-12-03	Why?! Why would you do this?! Mt. Davidson is so special to so many people in so many ways, it's crazy that you want to take it down. Believe me, I'm very pro-development, I think it's good for the city, but instead of picking on beautiful public parks, why don't you develop the industrial corners or the outdated unused buildings that nobody likes? Do not tear down more green space. Mt. Davidson is an amazing and beautiful space. Save it.
Joey Jiang	San Francisco, CA	2016-12-03	Why destroy nature?
Michael Mucci	San Francisco, CA	2016-12-03	Michael Mucci
AK	Kelseyville, CA	2016-12-03	We don't need more trees cut down. California is already in trouble with the loss of trees from our wildfires, Pine Trees infested with Bark Beetles, Oak Trees withering away at an astounding rate from Sudden Oak Death. California needs to address these 3 losses of trees before clearcutting more trees.
Aaron Rogers	San Francisco, CA	2016-12-03	I love going there for walks with my kids. Not so much anymore now that I'm learning about pesticide use by SF Rec and Park.

Name	Location	Date	Comment
Walker Cahoon	San Francisco, CA	2016-12-03	Because I take my dog to this park at least three times a week, and I go to this park five to six times a week regardless of weather-- it's beautiful. Why get rid of it.
Charles Woerner	San Francisco, CA	2016-12-03	I want my kids to see natural beauty in the city.
Jane Kung	San Francisco, CA	2016-12-03	Trees are a great addition to San Francisco!
Matt Hoss	San Francisco, CA	2016-12-03	I walk through this forest weekly with my family. These trees are important for offsetting the carbon emissions of the surrounding urban areas.
Jennifer McCarthy	Lafayette, CA	2016-12-03	Because it's the wrong thing to do. Leave nature, the trees and all the animals up there alone.
Casey Stenge	San Francisco, CA	2016-12-03	WE LOVE MOUNT DAVID. DON'T BE TREE KILLERS
Erin Recht-Appe	San Francisco, CA	2016-12-03	I live there
Peter Jensen	San Francisco, CA	2016-12-03	Return everything to how it looked in the 1700s or cut the nonsense.
David Puketza	Oakland, CA	2016-12-03	Did many loops in and around Mt. Diablo to the benefit of my mental and physical health. Great, immovable sanctuary that lets one unwind and recharge.
Ed Aureus	San Ramon, CA	2016-12-03	I grew up and went to school by Mt. Diablo
Nicole Carey	San Carlos, CA	2016-12-03	I grew up on Mt. Diablo and have fond memories of family hikes up to the cross. It's imperative that we keep some nature in our urban areas so kids can discover the beauty of ecology sciences. Please do not destroy the forest because you will be taking away the beauty and discovery of nature for families to enjoy.
Ruth Lovess	Fresno, CA	2016-12-03	We need these trees/this Park. It's necessary for health of the people and also for the environment. Please don't cut them out!
Barbra Ezer	San Francisco, CA	2016-12-03	I love this place!
Caitlin Cobey	San Francisco, CA	2016-12-03	This has been my local park since I was a kid and is so serene and beautiful. We don't need to lose anymore nature in this city!!!
Nicole Cronin	Marysville, CA	2016-12-03	I grew up on Chaves Ave, my dad still lives there! My backyard was this majestic mountain. Daily walks to the cross with the dogs left you feeling whole again. Please don't let this happen. I still have faith in humanity.
Trevor Cronin	San Rafael, CA	2016-12-03	I used to play in this forest with my grandparents when I was a boy, I have a lot of memories close to my heart. It's also the only green San Francisco has, please don't destroy this forest, it's too important to the people of San Francisco.
Ruby Reke	San Francisco, CA	2016-12-03	We need non-toxic nature parks for ourselves and our pets.
Barbara Johnson	Havre de Grace, MD	2016-12-03	I'm signing because I am against the senseless destruction of the forest, flora and fauna Mt. Diablo forest supports.
Laura Yanow	94112, CA	2016-12-03	We need trees and open space in San Francisco. NO to interests trying to co-opt our forest! NO to those so disrespectful of our planet! NO to those trying to destroy our green spaces! Just NO.

mar ane a macch ar n	San Franc sco, CA	2016-12-03	When I was young (10-16), my fr ends and I wou d wa k n th s "Sherwood" forest for hours. Dragonf es, butterf es, b rds of a k nds,squr a s, zards,snakes were th ngs we c ty k ds got to exper ence here. We wou d wa k a ong the path and make up stor es w th each other....cannt mag ne my exper ences n th s prec ous forest were d fferent from scores of other k ds. Its one th ng to th n dead and dy ng trees for safety sake....But Logg ng.... t sn t even b g enough to make t commerc a y v ab e. And Pest c des? Who does th s n a forest? Next th ng they w want to og Stern Grove! If th s has someth ng to do w th gett ng the home ess out of the forest.....wh ch I hadnt heard there was a prob em....then house the home essand eave the forrest a one for the count ess generat ons of San Franc sco k ds to fo ow.
Luc en Sonder	San Franc sco, CA	2016-12-03	Th s s a refuge from c ty fe, essent a to the we be ng of SF s res dents.
Rob n Fonta ne	San Franc sco, CA	2016-12-03	Th s s absurd! We need theses treees! P ease save them!
Thaddeus Dz edz c	Hoffman Estates, IL	2016-12-03	Our urban areas need to preserve what natura areas we have n them!
M ke Lynch	San Franc sco, CA	2016-12-03	Mount Dav dson s an mportant part of San Franc sco s hea thy ecosystem.
Me ssa Ste n	san franc sco, CA	2016-12-03	Th s s a treasured natura resource and shou d never be destroyed!
Suz Dehne	Los A tos, CA	2016-12-03	I m s gn ng for a the trees s nce they have no vo ce. A so br ng ng back an area to what t once was? Rea y? Makes no sense n an urban env ronment. It w never be the same.
Cynth a Wo sh	San Pab o, CA	2016-12-03	Parks are a p ace of beauty and peace. We need to preserve our parks not destroy them. The many parks n SF s what makes t such a beaut u c ty.
M ha lordache	Bucharest, Roman a	2016-12-03	I am from Roman a, but env ronment s a g oba ssue.
E ana Gurew tz	San Franc sco, CA	2016-12-03	It s my home! I grew up h k ng there every weekend w th my fam y. P ease protect t. It s beaut fu and mag ca .
Br an Freeman	Vacav e, CA	2016-12-03	Protect ng our parks and natura w d and s mportant to me.
v ctor a ehr ch	san franc sco, CA	2016-12-03	Try ng to r d San Franc sco of mon nat ve p ants and trees s m sgu ded. At th s stage of the earth s tr bu at ons at the hands of humans, we need more trees, not ess, and the spec es s rre evant.
Andy He tz	San Franc sco, CA	2016-12-03	P ease keep our green spaces
B B oomf e d	San Franc sco, CA	2016-12-03	Th s dea s absurd. Why not c ear the trees n Go den Gate Park ?!
Sharon Beatty	Parad se, CA	2016-12-03	Peop e NEED open space!
Co ton Ferr s	Los Ange es, CA	2016-12-03	I ove that spot
W am Wa ker	San Franc sco, CA	2016-12-03	I th nk the deforestat on p an s be ng done n a m crocosm. If the hundreds of thousands of peop e who grew up v ng under these trees knew that they were be ng removed, they wou d be unhappy. Th s ssue shou d be heard at a fu Board of Superv sors meet ng where t cou d be fu y d scussed. I support measures that w combat c mate change. Add t ona y, the b ock I grew up on across from Gen Park s cons derab y ess foggy than when I ved there as a ch d. Th s needs to be addressed.
John Ke eher	Santa Rosa, CA	2016-12-03	former res dent of the ne ghborhood
Armando Ru z	Sant ago de Querétaro, Mex co	2016-12-03	I ve been there and t s Jewe
Maya Gurew tz	San Franc sco, CA	2016-12-03	Because t s a beaut fu p ace and as the c ty gets more and more popu ated w th bu d ngs we need to save the beaut fu nature
Ruth Keady	San Franc sco, CA	2016-12-03	The park s very p easant the way t s. Peop e are us ng and enjoy ng t. Why change? Herb c des shou d not be used n any parks!

Name	Location	Date	Comment
Parr s Lane	San Francisco, CA	2016-12-03	Save the trees and protect the earth.. Please just let it be..
Saoirse McCormack	San Francisco, CA	2016-12-03	I've grown up in this area, its a lovely tourist spot, I hike everyday. Its apart of our community
Tony Gaen	San Francisco, CA	2016-12-03	Because fuck you that's why!
Joseph Sanchez	Ashland, OR	2016-12-03	I grew up in the city and plan on returning when I finish school and I wish for the city to be beautiful and a great place to live; supporting a great ecosystem for all life
Thomas Elliott	San Francisco, CA	2016-12-03	I'm signing because our parks department needs a huge wake up call that the risk of planing to destroy this San Francisco jewel is horrifically stupid and a waste of taxpayers money.
William Robathan	San Francisco, CA	2016-12-03	We need the beauty and respect all the more with increasing crowding.
Nicholas	San Francisco, CA	2016-12-03	Save the fucking trees!!!
Eleanor Clinton Issa	Las Vegas, NV	2016-12-03	We must save this precious part of our Earth!
John Leach	Santa Rosa, CA	2016-12-03	As a former San Francisco resident, and 4th. Generation San Franciscan this is one of the only remaining Forest, and should be preserved.
Amber Lamprecht	San Francisco, CA	2016-12-03	I live on the side of Mt. Davidson and the trees and wildlife are my favorite things about where I live! Please don't take away SF's natural spaces!!
Benjamin Tondo	San Francisco, CA	2016-12-03	We need it
John Ortiz	Bakersfield, CA	2016-12-03	I grew up on Daewood Way and played in the forest. So many memories and such a peaceful and beautiful place to be.
Pau Weber	San Francisco, CA	2016-12-03	Our family owned a house on Rockdale Drive for 55 years. I grew up without less friends playing on the mountain in the 60s-70s. This is irreparably harm the environment and beauty of the mountain.
Heather Nanne	San Francisco, CA	2016-12-03	It would be disastrous to lose this precious open space in our city!
Michael Wynne	San Francisco, CA	2016-12-03	Trees should be allowed to make up the landscape of San Francisco
Yuling Wu	New York, NY	2016-12-03	This would be an absolute disaster, please save the trees/environment/be aware of mother earth
Vanessa Fajardo	San Francisco, CA	2016-12-03	This needs to be stopped, San Francisco needs its green spaces!
Kate Werner	White Plains, NY	2016-12-03	I love this city and want to ensure that we have a healthy, thriving community for years to come.
Keenan Joyce	Portland, OR	2016-12-03	I grew up in this park. don't destroy the natural beauty of the city. Gentrification forced me out of my home. don't ruin it. don't contaminate my city with roundup and other carcinogens. this is a horrible mistake. this disgusts me. preserve this history of my city, and make it a safe place for its inhabitants. there are less and less resources available for lower class residents. don't take our public forests.
Alyson Yee	San Francisco, CA	2016-12-03	I've spent 18 years of my life growing up next to this forest. Its where I would take walks after school by myself and where I used to spend time with my friends and family. I can't imagine coming home to see this park that I've grown up around destroyed.
Chad Kubo	South San Francisco, CA	2016-12-03	I use to live on Mt. Davidson on Teresita Blvd. That mountain is like a sanctuary in the middle of the city and home to wildlife. It makes no sense to destroy it!
Margaret Freese	Emeryville, CA	2016-12-03	To preserve green space within the city
Ron Gurewitz	San Francisco, CA	2016-12-03	There is no reason to destroy this area. My family has lived on a few blocks away for 25 years. We hike there weekly. It is a SF treasure. And certainly do not want to expose my children to toxic herbicides. Please save our forest

Name	Location	Date	Comment
Mark Lobre	San Francisco, CA	2016-12-03	Why cut down trees simply because they aren't native?!
Sam Lax	San Francisco, CA	2016-12-03	The forrest is beautiful and I grew up with it.
Sarah Steinmetz	San Francisco, CA	2016-12-03	I'm signing this because why the fuck would sf want to destroy another con c park???
Anne Ravett	Sneville, GA	2016-12-03	I played in that forest growing up and loved every minute we spent there!!! Don't make SF a concrete jungle!!!
paul korn	San Francisco, CA	2016-12-03	this is bullshit! stop deforestation!!!
Alexandra Escobar	San Francisco, CA	2016-12-03	It's important to save and protect the beautiful nature that is part of the soul of this city. We cannot allow destruction to become part of the vocabulary that is synonymous to This city of love. We must always try to preserve the beauty of this city and not allow it to become distant fond memories of what once was.
Griffin Bragagnolo	San Francisco, CA	2016-12-03	I like park
Wayne Abbin	San Francisco, CA	2016-12-03	Mount Davidson is a beautiful open space that is part of historic San Francisco which serves to save our water.
Alexa Abrams	Sherman Oaks, CA	2016-12-03	I have a good friend who grew up next to this forest, and they would be devastated to see it destroyed. The world needs more green space, not less!
Forrest Whitcomb	Australia	2016-12-03	I am from the Bay Area and would like to see the protection of forested/open spaces. California preserves its nature and the meeting between the environment and a high technology. Protecting this space upholds these ideas
SUZANNE MCELWEE	SAN FRANCISCO, CA	2016-12-03	Despite the fact that not all the trees are native species together they are a unique forest space and habitat.
Mary Smith	San Francisco, CA	2016-12-03	I live on Mt. Davidson - we need the trees.
Georgina Cruz Martinez	San Francisco, CA	2016-12-03	A beautiful place like this deserves to remain the same.
Shelley Johnston	Garden Grove, CA	2016-12-03	The trees need to be saved as much as possible. They supply much needed oxygen to the atmosphere, as well as a wind break.
Macom Davis	San Francisco, CA	2016-12-03	These trees are habitat for many types of animals
Alex Goffo	San Francisco, CA	2016-12-03	I'm concerned about San Franciscos blatant disregard for ecological safe havens. Selling out our sacred and for more money is not the San Francisco I remember or want to be a part of.
Ian Etz	San Francisco, CA	2016-12-03	As a horticulturist and native San Franciscan, I believe it would be a great loss to destroy such crucial elements of the ecosystem as well as the lives of the thousands of San Franciscans
Lori Chao	San Francisco, CA	2016-12-03	I love Mount Davidson and always hike there. The trail and view on the top of the mountain is amazing! Please don't destroy it!
Teresa (Cruz) CARNS	Ruidoso, NM	2016-12-03	I am signing this because this is my home this is where I grew up this is where all my memories are. My family still lives there and when I go back to visit I'd like to be able to take my hike up to the Cross as I've done all of my life. In the 1970s the radio stations broadcasted when the lights go down in the city every single kid on our block mom and dad and surrounding blocks went up to the forest, sat up there and watched the lights in the city as well as had all of our boom boxes on listening to the premiere of that song. There is no other place in San Francisco that holds the childhood memories of myself and all of the wonderful people I grew up with on that mountain please please save the Mount Davidson Forest! Thank you for reading
Jackie Thurman	san francisco, CA	2016-12-03	We can't give up our bits of wilderness within our city limits.
Edward Young	San Francisco, CA	2016-12-03	I love to go up to Mount Davidson on my exercise time

Katr na Sta cup	Detro t, MI	2016-12-04	We need to protect our Earth.
Truro Hawk ns	Ch co, CA	2016-12-04	I grew up n San Franc sco and p an to come bac kwhen I graduate. SF s a beaut fu p ace n arge part because of a of the wonderfu nature p aces ke Mt. Dav dson, there s no need to tear th s down
kenny co e	sf, CA	2016-12-04	I ove b rds and trees
Joshua Shrader	San Franc sco, CA	2016-12-04	P ease dont cut down our trees. I am a res dent and a so a gardener. You p an to deforest s dep orab e and the use of roundup UNACCEPTABLE! Im s gn ng th s n fu conv ct on that the p an to cut down the forrest s wrong and shou d be stopped.
Judy Womack	San Franc sco, CA	2016-12-04	We need to save the forest for c mate changes, and the hea th of a ts v s tors
Kath een Crow ey	Da y C ty, CA	2016-12-04	The p an s ld ot c. Why not turn Go den Gate Park back nto sand dunes as we ? Why we are at t, A non-O hone res dents of SF shou d eave the c ty and a bu d ng & nfrastructure shou d be removed.
Jana T ft	Boca Raton, FL	2016-12-04	It may a so cause eros on. Green space s necessary to the qua ty of fe n SF.
L nda Sc aqua	Madera, CA	2016-12-04	Is us beaut fu !
Hope Fow er	Greenw ch, NY	2016-12-04	I m s gn ng because Amer cans need to be proact ve about protect ng our env ronment, espec a y when our future pres dent e ect threatens to destroy t!
Kenda Ow ngs	Berke ey, CA	2016-12-04	Natura env ronments n the SF area shou d be preserved. I wou d go to th s forest as a k d n the g r scouts and earned a ot of fe sk s there. I have been there to wa k my fam y dogs. It s va uab e to the commun ty.
Bengu At k	San Franc sco, CA	2016-12-04	The w d fe n San Franc sco s abso ute y beaut fu , and I want to keep t that way.
Sean McGrew	San franc sco, CA	2016-12-04	Everyth ng does not need to be "restored" to nat ve hab tat.
Wayne Yu	Da y C ty, CA	2016-12-04	I go there a the t me
Humberto Gonza ez	San Franc sco, CA	2016-12-04	Leave Mt Dav dson a one.
Co n Vurek	Eugene, OR	2016-12-04	I grew up h k ng th s area. P ease don t ru n t.
Chr st ne Coste o	San Franc sco, CA	2016-12-04	P ease keep th s beaut fu spot as t s. My grandfather took me on many wa ks there and I ve been back many t mes. Grew up off of Monterey B vd. We have so few natura areas and I d hate to see th s gem go.
Howard Sche man	San Franc sco, CA	2016-12-04	Save the forest
wayman rw n	san franc sco, CA	2016-12-04	I ve a ways oved the mt Dav dson forest, a part of my ch dhood and my fe to th s day. It wou d be a shame to destroy someth ng that g ves so many peop e joy for so tte reason. P ease don t destroy the forest
Mar a Cast o	Redwood C ty, CA	2016-12-04	we need our forest for future generat on.
Ju e Nazza	San Franc sco, CA	2016-12-04	Th s forest needs to stay r ght where t be ongs!
M ke Murray	San Franc sco, CA	2016-12-04	I ove the forest on Mt Dav dson and don t want to see t destroyed.
Pau a Schm ckrath	Hendersonv e, TN	2016-12-04	I agree th s wou d be a travesty for Mt.Dav dson and the surround ng ne ghborhood.

Name	Location	Date	Comment
Derrick Humphrey	San Francisco, CA	2016-12-04	Because a city who cares about climate change to unnecessarily cut down trees does not make sense as that's wrong. Is that for more real estate? Why should this happen now?
Vincent Ma	San Francisco, CA	2016-12-04	For the health of the people, and the health of the planet.
Elizabeth Huey-Levine	Canton, GA	2016-12-04	I grew up in SF and feel so grateful to maintain the integrity of the few parks we still have available to city folks. The eucalyptus trees are key to providing cleaner air for us to breathe. This is Earth, keep it organic, not concrete.
Kelsey Johe	San Francisco, CA	2016-12-04	R U KIDDING ME?!
Nick Clifford	Fenton, CA	2016-12-04	Why would you do that ??? :(Insanity
Victor Brouk	San Francisco, CA	2016-12-04	The nature in this park is what makes San Francisco amazing.
Stephanie Hernandez	Ahambra, CA	2016-12-04	Because I grew up doing restoration work at Mount Davidson when I went to Maroma.
Laura Summers	Dan Point, CA	2016-12-04	Obscene!!
Stephen Fettes	San Francisco, CA	2016-12-04	The forest must be preserved. Killing those trees and infesting that area with hazardous chemicals is to bring danger to the environment as well as the peoples lives. Don't do it.
Linda Tosch-Chambers	San Francisco, CA	2016-12-04	Please protect this beautiful piece of nature!
Alison French	Talent, OR	2016-12-04	Oh - this is a bad idea. San Francisco and the surrounding area need more greenery and more oxygen producing trees. I used to hike here and in many of the other parks started when I lived in Berkeley. Please reconsider this - redo the outdated surveys.
Dane Hardy	San Francisco, CA	2016-12-04	I don't want to lose our green space!
Rafael Robles	San Francisco, CA	2016-12-04	Trees are nice
Joyce Coffey	Day City, CA	2016-12-04	I grew up in San Francisco and the Mt. Davidson forest has always been a part of San Francisco.
Sara Stevenson	Los Angeles, CA	2016-12-04	I am signing because not only am I a native but for all those chemicals and trees. We don't need to change we need to adapt and keep our city beautiful not more techy.
Samantha Kangaga	New York, NY	2016-12-04	I am signing because I am a resident of San Francisco and grew up near my Davidson. I love this park and would have to see it destroyed
Nora Coffey	San Francisco, CA	2016-12-04	The City should retain all this green...for all the reasons stated in the petition and to keep our city beautiful.
Maria Barry	San Francisco, CA	2016-12-04	I grew up on Mt Davidson and spent many years hiking and playing there. Save Mt Davidson for future generations to come!
Kristealey	San Francisco, CA	2016-12-04	Please stop using pesticides and harmful chemicals where families play and animals dwell. The trees and plants are home to animals and insects and good for our quality.
Patricia Torres-Hendra	South San Francisco, CA	2016-12-04	I love walking through the trees on Mount Davidson. I used to live in Plymouth and Monterey and have spent 60 years walking on the mountain.
Ale Woo	Palo Alto, CA	2016-12-04	The forest is a pleasant surprise and with in SF and should be kept that way.
Pam Murphy	San Francisco, CA	2016-12-04	I used to go to school by there and have many many memories there
Linda Strong	Arroyo Grande, CA	2016-12-04	I grew up on the Mountain!! Rockdave drive! Born in 59! Don't destroy this beautiful place of happiness!
Kedrickham	Cedarville, UT	2016-12-04	This is a habitat and rest/shelter for birds, insects. With city all around it is essential as much "wild" space is maintained as possible.

Name	Location	Date	Comment
Brendan Hayward	Pittsburg, CA	2016-12-04	Liberty
Kate Morgan	San Francisco, CA	2016-12-04	This is a treasured resource! I shouldn't need to sign this but I will because I couldn't bear to see the forest destroyed.
Rena Weisman	San Francisco, CA	2016-12-04	It's unconscionable that Mayor Moneybags Ed Lee can't keep his grubby paws off a true natural treasure! Shame on the City that no longer "knows how."
Jan Phillips	Bakersfield, CA	2016-12-04	I lived in the Bay area for many years. San Francisco is lovely. Trees are important. Please don't do this!
Ess Brooks	San Francisco, CA	2016-12-04	The trees should stay.
Crysta S.	San Francisco, CA	2016-12-04	I grew up walking & playing among those trees. They must remain there for our children & grandchildren to have the same opportunity in the future.
Erick Perez	Day City, CA	2016-12-04	I grew up in the Marinoma neighborhood and Mt Davidson was my introduction to nature. I would like this area to be preserved for future generations to enjoy.
Ronen Crow	Oakland, CA	2016-12-04	This is wrong for so many reasons! We need our tiny remaining "wild" places more than ever. Please don't cut the trees, and stop the use of these extremely toxic chemicals. We need these places for healing, body and soul.
Kay Bowman	Santa Barbara, CA	2016-12-04	What are you thinking???? We need trees
Ben Olson	Windsor, CA	2016-12-04	It's important to preserve the natural environment and to be good stewards of the earth. Lose the idea of deforestation and the current use of pesticides - these are counterproductive.
Beth C. Barb	Freeland, WA	2016-12-04	I'm signing because this is a precious heritage --
Lisa Lucas	San Francisco, CA	2016-12-04	We need to save the trees, landscape, and maintain a San Francisco legacy.
Tamara McCormick	Scott Air Force Base, IL	2016-12-04	My family lives on Mt. Davidson, where I grew up. Please don't destroy our beautiful forest! There is absolutely no good reason to do so. This will cause more harm than good!!
Darrane Webb	Dunedin, New Zealand	2016-12-04	Why wouldn't you want to sign this!? It's a beautiful park and one that is dear to a dear friend of mine. They think it's important to keep and it's special to them, therefore it's special to me.
Patsy Jansen	San Jose, CA	2016-12-04	SF needs places like this!
Ova Weaver	San Francisco, CA	2016-12-04	I saw my first owl in the city here as a kid! Don't compromise the heartbeat of wilderness city kids get to experience
Kyra Monterrosa	San Francisco, CA	2016-12-04	It's a part of our city
Tracy Rowland	Canyon Lake, TX	2016-12-04	Please keep Mt. Davidson as is and protect. This was one of my favorite places in SF as a kid. When I come home to visit I would like to be able to come here again. It's so beautiful.
stacy egh	san francisco, CA	2016-12-04	I love the Forrest there. Why can't we just let the trees live out their natural lifespan? And then -sow y- get it back to its natural state?
W Rodriguez	San Francisco, CA	2016-12-04	I grew up visiting Mt. Davidson and want to keep its natural beauty alive for more people to enjoy.
Geoffrey Wagner	San Francisco, CA	2016-12-04	I hike those trails often and they are beautiful and an asset to the city.
John McGuire	Austin, TX	2016-12-04	I often visited Mt. Davidson during my High School and College days in San Francisco. I'd like everyone to have the opportunity to enjoy this unique spot of beauty as I experienced it.
Eizabeth Powers	San Francisco, CA	2016-12-04	I hike there and it's beautiful.
Michael McCormick	Belevue, IL	2016-12-04	I'm signing because my family lives near Mt. Davidson. What you are planning is wrong, on all levels. Why cut down precious trees on this beautiful landmark?

Name	Location	Date	Comment
Zachary Ragan	San Francisco, CA	2016-12-04	I want to preserve the forest on Mt. Davidson.
Holger Retzinger	San Francisco, CA	2016-12-04	This is one of the most beautiful parks in SF. Please don't take it away!
Beverly Tharp	San Francisco, CA	2016-12-04	It's crazy to cut down trees.
Anna Chang	San Francisco, CA	2016-12-04	save mt. davidson!!!
Laura Hutto	San Francisco, CA	2016-12-04	Love this park and what it has to offer. Stop spraying Roundup!
LeeAnn Leeper	San Francisco, CA	2016-12-04	IM a Native Stop This now
Jessica Levant	San Francisco, CA	2016-12-04	Mt Davidson Forest is one of San Francisco's jewels. An oasis. Please don't cut down those trees and spoil the natural setting.
Dusty Burton	San Francisco, CA	2016-12-04	I'm signing because My City has become a construction Zone for condos. Our church would hold services on Mt Davidson and it should stay open space for family with kids and also dogs..
barbara berman	San Francisco, CA	2016-12-04	It's the right thing to do
Elena Ansary	New York, NY	2016-12-04	Because Mount Davidson is a magical and powerful place that is both vital to me personally and to San Francisco's history and character.
Ben Stacy	San Francisco, CA	2016-12-04	This beautiful place was a vital part of my childhood. Don't tear it down.
Samuel Smoot	San Francisco, CA	2016-12-04	I fucking love trees. Dope spot. Don't say my homes.
Merilee Nashimoto	Tucson, AZ	2016-12-04	I grew up in SF and enjoying all the outdoor sanctuaries like Mt Davidson. Without it the city would not be the same.
Kelly Carlson	San Francisco, CA	2016-12-04	I am signing because Mt. Davidson Forest is beautiful and belongs to all San Francisco
Joe Hague	San Francisco, CA	2016-12-04	Stop cutting down trees, just because they weren't here in the 1700. Mt Davidson is a place I. The city that I go to to find peace.
Margaret Murray	San Francisco, CA	2016-12-04	This forest in my neighborhood is a haven for young things, including me.
Timothy Davis	Apo, AP	2016-12-04	Save the Forrest.
Alessandro Moruzzi	San Francisco, CA	2016-12-04	Plant trees don't cut them.
Aimee Pavy	San Francisco, CA	2016-12-04	I hike over Mt Davidson every weekend. It's an oasis in the middle of the city. My hike affords me a place away from the anxieties of personal life.
Ada Lane	San Francisco, CA	2016-12-04	I am a San Franciscan native and I care about our beautiful parks!
Grace Chen	San Francisco, CA	2016-12-04	This is my backyard. And no matter how you look at it, this is a stupid, wasteful idea.
Sean Mann	Lawndale, CA	2016-12-04	I used to live in SF and Mt Davidson was a beautiful monument to my Bay Area experience
Juan Cuyjet	Day City, CA	2016-12-04	This is a beautiful part of San Francisco and should remain there.
Rebecca Martin	Marina, CA	2016-12-04	I want to help keep San Francisco the city I fell in love with.
Juanita Mastro	San Francisco, CA	2016-12-04	It is a beloved place to me where I have gone on walks with family since I was a toddler.
Terlenfest	San Francisco, CA	2016-12-04	It's a beautiful place to walk, run, and bike. It needs to be preserved.
Samantha Sheppard	Brooklyn, NY	2016-12-04	This is my favorite sanctuary spot in San Francisco. I, and many others, would be absolutely devastated to see it destroyed.
Ryan Morarty	San Francisco, CA	2016-12-04	This is my city and also my neighborhood. It's beautiful and very special up there and I don't want to see this destroyed.
Dary Sparks	Petaluma, CA	2016-12-04	It's an oasis in the City!

Name	Location	Date	Comment
Kar Graham	San Francisco, CA	2016-12-04	I see no compelling reason to destroy a part of San Francisco heritage.
Hans Oberschep	San Francisco, CA	2016-12-04	It doesn't matter what Mt. Davidson looked like naturally. It's surrounded on four sides by concrete. It's part of San Francisco now, and it's much more beautiful as a forest than a rocky hill. We shouldn't tear up Golden Gate Park and replace it with sand dunes, and we shouldn't touch Mt. Davidson.
Chris Jenkins	Castro Valley, CA	2016-12-04	Preservation of San Francisco's remaining natural habitats is of utmost importance.
Ga Gurewitz	San Francisco, CA	2016-12-04	I hike frequently on Mt. Diablos and always note the wildlife. Please do not destroy the habitat!
Carolyn Gibbs	South San, CA	2016-12-04	We must stop destroying all the greenery and wild areas - this gives places for so much wildlife to live we are killing our planet slowly! please preserve what we can and take care of this small area!
Natalie Chavez	Gustine, CA	2016-12-04	I'm signing because the wildlife's benefit to the community and is important to many people to stay healthy. It also seems like a ridiculous reason to chop down a ton of trees that benefit the community.
Laurie Cahn	San Francisco, CA	2016-12-04	Green spaces in San Francisco need to be preserved. Spraying of pesticides in close proximity to people and wildlife does more harm than good.
Antonio Martinez	San Francisco, CA	2016-12-04	What's mentally or emotionally wrong with you? Honestly, really, what's it?
nancy weber	San Francisco, CA	2016-12-04	I grew up on that mountain that's stupid why in the hell would they want to return it to how it was in the 1700s nobody's what they were and 1700 the mountain's as it is today let it be let it be
John Powers	San Francisco, CA	2016-12-04	Oppose deforestation of Mt. Davidson
tinanesen	san francisco, CA	2016-12-04	Please please PLEASE don't cut down all these gorgeous trees!
Jasmine DeLaMora	San Francisco, CA	2016-12-04	I live here and a lot of animals reside on the hill. They would be destroying their home. We need to preserve what we have left of San Francisco and not give into gentrification.
Sarah Watson	Australia	2016-12-04	Even though I'm from Australia I care about what happens to forests everywhere. I'd love to be able to hike the trails when I visit one day.
Miles Bamberidge	San Francisco, CA	2016-12-04	I love the serene, peaceful hikes on Mt. Davidson. It's one of the few places I can go to get away from everything without leaving the city. The trees and vegetation on Mt. Davidson are a big part of what makes it a quiet, special place.
Jude Gantz	San Francisco, CA	2016-12-04	There are so many other legitimate expenses to incur which will be helpful to ensuring the ecology of the city. Spending time or resources to raze community greenery for no good reason is obscene. Leave Mt. Davidson alone!
stephan eha	San Francisco, CA	2016-12-04	I heart trees. I like to breathe.
Jonathan Wang	San Francisco, CA	2016-12-04	I love this park and the facts speak for themselves. 1600 trees do not need to be saved for a few invasive and unstable (and insufficiently deemed so) trees. Please conduct a more thorough re-evaluation.
Amy Frestone	Alexandria, VA	2016-12-04	Times change. The City needs this forest as it has evolved, not a hold the way it was before so many people lived here.
Arabella Dorth	San Francisco, CA	2016-12-04	As a longtime resident of San Francisco I am shocked and dismayed by this misguided and outdated deforestation plan. We need our urban forests now more than ever! Do not cut down the trees!
Dane Fenster	Pacific, CA	2016-12-04	Dear Park and Rec, haven't you heard? Roundups are carcinogenic and kill bees so please don't kill the trees.

Name	Location	Date	Comment
caro yn hurt	Jacksonv e, FL	2016-12-04	I see no reason for the senseless k ing of forests. We have a ready k ed many forests n the gu se of urban progress on. Our nat ona w d fe have no p ace to ve because of t and our ch dren w never know the peace that s rece ved just by wa k ng n the woods.
b ss k sser	eureka, CA	2016-12-04	SF needs the trees! For oxygen, beauty, shelter for b rds & other w d fe, for c mate contro & for the beauty of NATURE (to offset the peop e energy & concrete jung e). P us, the herb c des are TXIC as a get-out & NO ONE (n my op n on!) needs more Round-up & other po son un eashed nto the a r, water, & so ! Yuck! Keep the trees, p ease!
August Ragone	San Franc sco, CA	2016-12-04	We need to preserve San Franc sco s natura beauty for the her tage of generat ons to come.
E zabeth Gardner	Ch cago, IL	2016-12-04	Deforestation s k ng the env ronment and green spaces are shr nk ng at an a arm ng rate.
Robert Kaufmann	San Franc sco, CA	2016-12-04	Leave Mt. Dav dson alone! It s do ng very we as s. Logg ng w do harm.
K mber y Fe c ano	Oak and, CA	2016-12-04	I m from here! Don t cut our trees!
Sonya Katcher	San Franc sco, CA	2016-12-04	I grew up go ng to th s forest
Jane Hopper	Men o Park, CA	2016-12-04	And I w sh oca space sav ng organ zat ons wou d stop us ng t too.
D na U da	Ante ope, CA	2016-12-04	Because I p ayed n th s forest as a ch d and be eve ch dren & fam es for generat ons to come shou d have natura green space w th n the concrete jung e to exp ore and bu d memor es!
Betty Orya	San Franc sco, CA	2016-12-04	I grew up there. It s a beaut fu park and shou d rema n untouched!
dawn s berste n	San Franc sco, CA	2016-12-04	I am s gn ng because I want to save an mportant andmark and refuge n my ne ghborhood.
n na v ncent	Sausa to, CA	2016-12-04	Stop go ng back n t me, work w th the beauty of here and now.
T ffany Arch ba d	San Rafael, CA	2016-12-04	My grandparents ve n Forest H s and that area s beaut fu to ook at and v s t so p ease et t be.
Ray Cap ra	San Franc sco, CA	2016-12-04	I used to ve on Mt. Dav dson and wou d wa k up through the forest every morn ng before start ng my day. It s a terr f c, natura sanctuary that ought to be preserved.
Isabe Ebert	South San Franc sco, CA	2016-12-04	In a sea of urban zat on, peop e need a p ece of nature to enjoy. Destroy ng trees w th harmfu pest c des that mpacts the web of fe s not what Bay Area res dents want! Keep th s p ace a sanctuary as an urban forest!!
M chae Ryan	San Franc sco, CA	2016-12-04	Return to the 1700s? 1,000,000 peop e were not v ng n SF n the 1700s. The eco og ca rea ty s that 1 m on peop e ve n th s reg on. Th s rea ty requ res trees to reta n so from heavy use. Trees to he p f ter human detrus out of the a r.
Dena As an an-W ams	San Franc sco, CA	2016-12-04	Th s s the most r d cu ous th ng I ve heard. P ease save Mt Dav dson Forest.
Patr ck Canf e d	San Franc sco, CA	2016-12-04	We can do better than th s!

Pau a Ch ott	Santa Rosa, CA	2016-12-04	I ove the trees and the fee ng they create n that ne ghborhood.
L sa Moore	Oak and, CA	2016-12-04	I ved on the edge of Mt Dav dson forest for many years. I ve spent many hours there p ay ng as a ch d and h k ng as an adu t. It s a wonderfu resource n an overcrowded c ty.
L zzy Harvey	Wa a Wa a, WA	2016-12-04	I frequent y h ke up Mt. Dav dson from my house... t s a beaut fu area and I have many, many memor es of t, go ng back at east 15 years to when I was tt e. P ease protect th s green space!

Name	Location	Date	Comment
Danne Terp	San Francisco, CA	2016-12-04	I do not want to return SF to a desert
Karen Bouwer	San Francisco, CA	2016-12-04	I'm signing because trees and birds help me breathe in a world that I'm experiencing as more and more oppressive.
Kate Dick	San Francisco, CA	2016-12-04	I grew up hiking there, going every year with my elementary school classes. And I go now at the time. It's very special to me.
Shannon Bishop	Spring Hill, FL	2016-12-04	I'm a native Californian and this park needs to be protected.
Robert Dawson	Novato, CA	2016-12-04	I grew up in beautiful SF and I believe the trees are meant to stay.
Alison Lockfield	Portland, OR	2016-12-04	I grew up in San Francisco and I love this park
Harry Davis	Oakland, CA	2016-12-04	We don't need to lose what little bit of open green space we have left.
Emily Tow	Cambridge, MA	2016-12-04	I grew up tromping around in this beautiful forest!
Kristina Smith	Palo Alto, CA	2016-12-04	I've been up this mountain, and seen this place ... it must be preserved! It's gorgeous! And a treasure!
Laura Regan	San Francisco, CA	2016-12-04	I love Mt Davidson! Please save it!
Andree Burgess	Redding, CA	2016-12-04	I was born and raised in San Francisco. Mt Davidson is beautiful and would be terrible if they destroyed all those trees.
Miguel Ceberos	San Francisco, CA	2016-12-04	Trees are usually good for the environment
Knar Kahkejan	San Francisco, CA	2016-12-04	Not on our watch!
Nicole Holmes	Camarillo, CA	2016-12-04	Too much beauty potential being lost
Anna Chodos	San Francisco, CA	2016-12-04	I love the hikes here, and I know we need as many trees as possible in SF
Nat Dart	San Francisco, CA	2016-12-04	We need to protect this forest!
Bonnie McGregor	Menlo Park, CA	2016-12-04	My Davidson is beautiful as it is. Who comes up with these ridiculous projects?
Erin Thompson	San Francisco, CA	2016-12-04	Do not cut!
Kevin Brimingham	San Francisco, CA	2016-12-04	This is totally shot
Caroline Ward	San Francisco, CA	2016-12-04	Trees are the lungs of our city and we need to protect the wildlife habitat in Mt. Davidson.
William Murdock	San Francisco, CA	2016-12-04	Forests need protection and thinning; not clear cutting...
John Butler	San Francisco, CA	2016-12-04	I grew up in the Marinoma area. I remember how my family would walk the trail almost every other day, reveling in its beauty and stillness. I remember biking up the path every morning and being astounded at how it was almost like an oasis and of green amidst the city. In the forest, I was cut off from the hustle of San Francisco and overawed by the beauty of nature and creation. If the forest were to be razed it would be a horrific tragedy.
Katherine Nims	San Francisco, CA	2016-12-04	I like breathing.
Cyeon Lo	San Francisco, CA	2016-12-04	Even though these aren't native trees, they have created a habitat for native animals. Our city is filled with non-native things. Like houses! Keep these trees!
Susan Coyne	San Rafael, CA	2016-12-04	I LOVE walking in this gem of a park in SF. Please keep it!
Linda McGivray	San Francisco, CA	2016-12-04	We need to keep the green areas in the city.
Jude Rimer	Cincinnati, OH	2016-12-04	Leave this small, beautiful piece of nature alone!
Jessica Cheu	Marina del Rey, CA	2016-12-04	Mt Davidson is one of my favorite places in San Francisco and what makes San Francisco so special.

Name	Location	Date	Comment
Scott Baker	San Francisco, CA	2016-12-04	This is a ghastly project. These trees, despite being non-native are now part of San Francisco. They've gone native by protecting our wildlife and providing a refuge from the bustle of the city for hikers. Getting rid of non-native species is not a mandate. Some of the native species, like Eucalyptus, are an expected and necessary part of what makes San Francisco, San Francisco.
Rena Simon-Igra	San Francisco, CA	2016-12-04	This was my childhood stomping ground!
max tenhoff	San Francisco, CA	2016-12-04	I've close to the mountain and like the way it always has looked
Suzanne Dods	San Francisco, CA	2016-12-04	I know I know we are beset with petitions, but never give up and MAKE YOUR VOICE HEARD. This is local..
Court Jones	Goleta, CA	2016-12-04	We need to reassess our values and priorities with regards to the environment. Nothing is more important or valuable than nature.
o v a contreras	san francisco, CA	2016-12-04	this is full of beautiful trees!
Juanita Martin	San Francisco, CA	2016-12-04	Please save our wilderness sanctuaries!
Tammy Creo	Alpharetta, GA	2016-12-04	We need to save our Earth.
Naomi Weaver	San Francisco, CA	2016-12-04	I am concerned with our environment, we need these trees, they rely on us for their protection. I am trying to do what I can to protect my fellow living organisms.
Teresa Chao	San Francisco, CA	2016-12-04	I want to preserve the natural beauty of Mt. Davidson. I am against deforestation. San Francisco needs to retain the few natural areas that remain. Mt. Davidson is enjoyed by hikers, bicyclists, naturalists, etc. and the neighborhood is very proud of this beautiful space.
Caroline Maguire	San Francisco, CA	2016-12-04	This park has been part of my life ever since I was young. I grew up hiking trails and it would be devastating to me to lose it.
Lana Sampson	Amherst, MA	2016-12-04	I grew up in this area, spent so much of my childhood exploring this nature, would be such a tragedy to remove such an important historical piece of San Francisco's culture
Nick Kassis	San Francisco, CA	2016-12-04	Tress, man
Abigail Vargas	San Mateo, CA	2016-12-04	Because we must preserve our wildlife and nature!
Charles Higuera	San Francisco, CA	2016-12-04	It's fine as it has been for nearly a century -- steward it LESS drastically!!
Samuel Butler	San Francisco, CA	2016-12-04	This park and forest brought immeasurable joy to me and my family for decades. I played capture the flag with friends on it as a child, and when I got older I would run on the trails nearly every day. The ethical cost to the trees and animals inhabiting this wonderful sanctuary from the ever-growing development and hustle of The City would be catastrophic, albeit on a local scale, but this cannot be allowed. SF must keep its heart and soul issues like these. This is not who we are.
Sheila Finch	Long Beach, CA	2016-12-04	We need more trees, not less, and urban areas such as San Francisco need them even more. Please, don't do it!
Jueta Vela	Rohnert Park, CA	2016-12-04	SF native born and raised. Save Mr Davidson!
Rosemarie Herscher	San Francisco, CA	2016-12-04	I love wildlife places in the city and want to preserve them for me & future generations
Jonathan Chu	San Francisco, CA	2016-12-04	Preserving trees is vitally important to our ecosystem
bridget segurson	san francisco, CA	2016-12-04	Destroying the natural beauty of this spot would be a travesty.
Cris Romero	San Francisco, CA	2016-12-04	To save Mt Davidson
Sandra Sehn	San Francisco, CA	2016-12-04	As a SF native I know how important to the citizens Mt. Davidson and its forest is to SF's quality of life. Please Preserve it!

Name	Location	Date	Comment
T m Hayman	San Francisco, CA	2016-12-04	Do NOT cut down our trees, hard to believe ths s even be ng cons dered
Cath Beckstrand	San Jose, CA	2016-12-04	There s no og c n do ng th s whatsoever, t s detr menta for a s ew of reasons (out ned succ nct y here) and, frank y, our c mate & env ronment have changed so much s nce the survey for th s was done. We need these trees, and we need th s beaut fu hea thy forest.
Amanda Lang	San Francisco, CA	2016-12-04	We, the peop e! You s mp y cannot destroy nature wh e we ve here.
JEAN ALLAN	San Francisco, CA	2016-12-04	P ease do not cut down any of the tree on Mt. Dav dson.
Greg Bryan	San Francisco, CA	2016-12-04	Because trees and parks are an mportant part of SF and the Park and Recreat ons nstead of try ng to protect and care for our va uab e pub c resources keep choos ng money over commun ty.
Ga nes Co eman	San Francisco, CA	2016-12-04	I ve here, and th nk a forest n the c ty s necessary for a good Qua ty of L fe.
Megan Beach er	Men o Park, CA	2016-12-04	We need to save our w d spaces and the p aces peop e can get out n nature. Th s s a beaut fu forest w th an amaz ng p ant and an ma ecosystem. It needs to be saved and taken care of. Not KILLED AND POISONED! We do not need more houses or bu d ngs. We need open space!!!!
Dav d Rodezno	San Francisco, CA	2016-12-04	I be eve our future shou d be ba anced between a concrete jung e and a thr v ng forest
Kee y Enna	San Francisco, CA	2016-12-04	I wa k up Mt Dav dson regu ar y w th my two e ementary schoo boys. I ove fee ng mersed n a forest wh e n the heart of a c ty. Th s s a space wh ch makes me want to ve here and makes me proud to be a nat ve San Franc scan.
Maxwe Maruszewsk	Sh ng etown, CA	2016-12-04	I grew up h k ng th s h w th my grandma. Th s area s no ess mportant to us than go den gate park. These th ngs are what make sf a spec a p ace. Do not take them from us.
L sa Mastro	Long Beach, CA	2016-12-04	I ove th s p ace!!!!
Ryan Leung	Ch no, CA	2016-12-04	You don t change San Francisco, you KEEP San Francisco.... San Francisco. Because we ove San Francisco, when San Francisco s San Francisco.
pau tay or	san franc sco, CA	2016-12-04	hav ng ved here a my fe, the forest s part of me. on y a foo wou d chop t down.
Mon ca Lon gro	San Francisco, CA	2016-12-04	I ove Mt. Dav dson and I don t understand how cutt ng down so many trees benef ts San Francisco. We need MORE trees, not fewer n th s c ty. Why wou d you want to cut down o d growth trees? A so, how does SF Park and Rec have the r ght to do th s when the c ty doesn t own the and tse f?
Sandy Su	San Francisco, CA	2016-12-04	I h ked Mt Dav dson park many t mes as a ch d and remember t fond y. P ease preserve th s park so others can cont nue to do the same.
Co n Wade	San Francisco, CA	2016-12-04	Th s a beaut fu park. It be a shame to see t go
Kather ne S ms	San Francisco, CA	2016-12-04	eave we enough a one
Martha M ner	Moss Beach, CA	2016-12-04	Chopp ng down trees s wrong on so many eve s. We need them for the oxygen they produce for us to breathe and a so to mend our broken sp r ts.
Norma Wa ace	R chmond, CA	2016-12-04	I m a 4th generat on San Franc scan. As k ds, we "c mbed Mt. Dav dson" for fun, morn ng, noon and n ght. Such good t mes. Th s was a rea forest! L ke Rob n Hood. Not a few trees ke Stow Lake or Go den Gate Park between streets, but a genu ne forest, a dark and scary at n ght, w th on y nature. I can t be eve th s nane dea wou d go forward. No harm s be ng done, and p enty of good by those trees. And a the po son be ng used atop th s h ? Unbe evab e. Stop a ready!!
Mo y Sa yer	san franc sco, CA	2016-12-04	We need more trees! Not ess!

Name	Location	Date	Comment
He ene Chatterjee	Dub n, CA	2016-12-04	Please protect this area. My fondest memories of my great grandmother, Irene Ashe, are of making that hike up Mt. Davidson who lived in the neighborhood at the base. An oasis in the city.
andrew kennedy	San Francisco, CA	2016-12-04	like mount davidson
Dom n c Casazza	San Francisco, CA	2016-12-04	I am born and raised in this City and this seems like it would just pave the way for development which is not at all an even trade off in my opinion. I agree with the points made in this petition and want to see the right thing done. Please leave Mt Davidson as is and not deforest it
A dan O Dr sco	San Francisco, CA	2016-12-04	I love extremely close to Mount Davidson and it would horrible to see it go.
Shawna A pa	San Rafael, CA	2016-12-04	Keep these special and spectacular places, preserved.
B Se by	San Francisco, CA	2016-12-04	I've been hiking on Mount Davidson for years, love the trees – and especially the smell of eucalyptus. The city is already displacing people, but must they also displace the homes of countless thousands of birds and animals? The area is already ecologically balanced, and cutting it is a total waste of taxpayer dollars. It is a so ethical a reprehensible and morally bankrupt.
shannon ashe	Eugene, OR	2016-12-04	I was a child there, and because of everything stated in this letter. Logging there is the bad idea of bad ideas. Just shortsighted and dumb.
Cynthia Se m	San Francisco, CA	2016-12-05	I love on Mt. Davidson and it should be protected at all costs.
Aaron Den ey	San Francisco, CA	2016-12-05	Eucalyptus are naturalized citizens, leave them alone the park is nice how it is.
Suf S dhu	Irvine, CA	2016-12-05	Is there any bottom to your decisions on making? Does quality of life matter at all to you anymore?
Katherine Edwards	San Francisco, CA	2016-12-05	I like Mt. Davidson and it's beautiful the way it is
Peter W k ns	Santa Clara, CA	2016-12-05	I understand the desire to want to remove invasive species and return the area to its natural composition, however, these non-natives have been in place hundreds of years now. Are they still truly non-native? The ecology has changed and the flora and fauna has adapted. I think this plan does more harm than good. Trees are a valuable resource and we need to be preserving them for the carbon, wildlife, and health benefits. Not destroying them.
Wend Wh tcomb	San Francisco, CA	2016-12-05	I believe we should preserve the remaining wildlife and natural areas left in SF. It is what makes this a great city to live in!
Steve Lawrence	San Francisco, CA	2016-12-05	I'm signing because I'm for trees, not for chasing a dream of return to days before Europeans arrived.
Charles A ensworth	Oakland, CA	2016-12-05	In solidarity and advocate for environmental justice.
L ye D ugach	Berkeley, CA	2016-12-05	This place is so special to me. Do not destroy this sacred and beautiful land.
E a ne Stev ck	Petaluma, CA	2016-12-05	I remember this forest from the time I was a child...Please do not destroy it!
Tan a We ngart	San Francisco, CA	2016-12-05	This is one of the most favorite places in SF. What a distracting thing to do! And to add insult to injury - with our tax \$. Stop it!!
L nda Z mmerman	San Francisco, CA	2016-12-05	I support ALL the claims in this petition. I worked as a public health nurse (RN) for the city of S.F. for 21 years and based on my knowledge of protecting the physical, emotional and social well-being of a society I find the plan harmful to the residents of this city on those three levels.
N ge Nored	San Francisco, CA	2016-12-05	It's important
Lucas Mu en	San Francisco, CA	2016-12-05	Trees
Mark Z er ng	San Francisco, CA	2016-12-05	Things have changed since this policy was adopted. We need the carbon sink and the recreation these trees provide.

Jayne R ey	L nco n, Un ted K ngdom	2016-12-05	P ease preserve th s beaut fu wood for poster ty. So many woods and forests are be ng ost, ch dren w th nk that trees are sap ngs because they never see a mature tree. P ease do not et th s beaut fu p ace be destroyed.
Kather ne Tracy	San Franc sco, CA	2016-12-05	I have grown up w th th s park and hope that t w rema n as s!
Em ko Hamada	San Franc sco, CA	2016-12-05	I want 1600 trees rema ns n SF
Betsy Bonnynge	Tur ock, CA	2016-12-05	I be eve n trees n that area.
Chery e Ge ger	G bert, AZ	2016-12-05	Stop th s nsan ty! Protect our w derness and stop us ng po son! Thank you, my grandch dren w thank you.
Terra Mak sh ma	Fa rf e d, CA	2016-12-05	Fam y H story
Hannah Coston	San Franc sco, CA	2016-12-05	Th s forest s such an mportant part of the d vers ty of atmospheres n San Franc sco.
Kay a Jos e	Santa C ara, CA	2016-12-05	Because we cannot oose th s part of San Franc sco
ke e McManus	San Franc sco, CA	2016-12-05	Ke e McManus
Apr Pr tchard	Port and, OR	2016-12-05	my c ty....
Jeffrey Berger	Los Ange es, CA	2016-12-05	I Love Trees, and Parks!
james m cke son	San Franc sco, CA	2016-12-05	Hav ng been go ng to Mt. Dav dson for forty years. Over the past 15 the park serv ce has stead y destroyed ha f of t and rep anted(that surv ves) noth ng. What a joke!
Mary M. R ordan	San Franc sco, CA	2016-12-05	Because of the env ronmenta reasons, the forest shou d be tended to, not more tra s shou;d be created, the forest a ows for the water storage when t ra ns and contr butes to hea th er a r. ETC> I m sure the powers that be know a of th s and must take t nto heavy/deep cons derat on rather than go ng a ong w th the ch c deas of the day. W th the added popu at on be ng added to San Franc sco w th the mass ve new bu d ngs, we need every b t of forestat on we can get to preserve the a r and hea th qua ty of our very m ted space. We s mp y cannot afford to ose the Mt. Dav dson frest.
Nazareth Overman	Pac f ca, CA	2016-12-05	Born and ra sed n "The C ty" Mounta n Dav dson has been a b g part of my fe and a so my ch dren ves
Grant Pa mer	Los Ange es, CA	2016-12-05	What the fuck s wrong w th you peop e?? Destroy ng a beaut fu pub c forest? THAT S what you th nk your job s as a c v c superv sor?? No, your job s to make the p ace where peop e ve MORE beaut fu , not destroy a prec ous resource of natura beauty for your const tuents to enjoy. Jesus Chr st.
Lou e Lurat	San Franc sco, CA	2016-12-05	I ove Mt. Dav dson and don t want t to be destroyed,
Andrew M er	San D ego, CA	2016-12-05	I oved th s p ace when I was a k d. San Franc sco doesn t need anymore of ts open spaces to be deve oped on anymore. LEAVE IT ALONE
Debra McLaugh n	Ben c a, CA	2016-12-05	I grew up n that area. We do not need another cement c ty, w th just one park n town. P ease save the forest!
Haunan Pao	Auck and, New Zea and, New Zea and	2016-12-05	Tree. they take a wh e to be magn f cent and deserve our respect.
Robert Gepford	G en E en, CA	2016-12-05	I was born and ra sed n the Bay Area. And do not want to see the parks turned nto po son p ts.
Gaston Gu bert	San Franc sco, CA	2016-12-05	Every p ant was an " nvas ve" at some po nt, euca yptus, cyress, and many others have become a part of our cu tura her tage s nce the r ntroduct ons hundreds of years ago, and that hab tat on mt. Dav dson has c ear y become natura zed ong ago. Re ntroduct on of nat ve p ants w not make t a hea th er or more beaut fu ecosystem.
Jody Fr edman	San Franc sco, CA	2016-12-05	San Franc sco needs more trees, not ess

Name	Location	Date	Comment
Maya Zuckerman	sf, CA	2016-12-05	I ove th s forest and t s mportant we eave green ungs n our c ty !
James Cameron	Or ando, FL	2016-12-05	I m a former res dent who spent ots of t me on Mt. Dav dson. The oss of these forested areas wou d be a tragedy on so many eve s.
Kather ne Grant	San Franc sco, CA	2016-12-05	I ove h k ng on th s mounta n
Tanya Wa ssman	San Franc sco, CA	2016-12-05	I go there to wa k a the t me and br ng my daughter.
Shanna Car son	Castro Va ey, CA	2016-12-05	I was born and ra sed n SF, ved r ght be ow Mt. Dav dson...why n the wor d wou d you want to return t to what t ooked ke n the 1700/s? We need trees for our a r, our menta hea th, beauty. What about the w d fe? We need green spaces n c tes - too much cement a ready!!!
Joshua K dd	San Franc sco, CA	2016-12-05	Because th s park has been around s nce I was a teenager and I used to a great sense of un ty between nature and the c ty here. It s a ca m ng beaut fu p ace to go and have some t me to your se f wh e not hav ng to eave the c ty, yet st be ab e to escape t s co d concrete grasp!
es e kaye	san franc sco, CA	2016-12-05	We need greenery n SF. These trees prov de oxygen and c ean the a r, they are home to b rds and squ rre s. Don t make t barren. Stop w th the pest c des. P ease save the trees. Thank you.
Lucy Lyons	Ha f Moon Bay, CA	2016-12-05	As a former SF res dent, I m s gn ng because I be eve cutt ng down the trees on Mt. Dav dson s a horr b e dea. Why return t to what t ooked ke n the 1700 s?? Why stop there? Why not "restore" Go den Gate Park to the sand dunes t was before? Th s s craz ness. P ease stop th s p an before t s too ate.
Judy Toup n	San Franc sco, CA	2016-12-05	Way too many trees are be ng cut down n th s c ty. We need these trees not on y to he p f ght goba warm ng, but they are the hab tat for so many creatures. It a so prov des thousands of peop e refuge, recreat on & much p easure. Wh e the trees may not be nat ve, ne ther are we. Return ng t to a more nat ve andscape s a b t absurd at th s po nt n t me & the use of tox c chem ca s s just poor management. P ease do not proceed to cut down th s forest.
Bonn e Johnson	San Franc sco, CA	2016-12-05	What an egregious use of "San Franc sco" taxpayer do ars -- pretty sure th s goes aga nst most oca s des res.
I a Lew s	G encoe, IL	2016-12-05	I wa k the Mt. Dav dson Forest w th my daughter qu te frequent y. P ease do not destroy a p ace of such beauty, h story, recreat on and home to any number of w d creatures.
Dave Hoare	San Franc sco, CA	2016-12-05	I ke Mt Dav dson the way t s
E ma Yanez	San Rafae , CA	2016-12-05	I stand w th the trees.
Er ka Be	San Franc sco, CA	2016-12-05	I enjoy h k ng n the trees on Mt. Dav dson.
judy oberte	Redwood C ty, CA	2016-12-05	I must.
Abbe Day-Merchant	San Franc sco, CA	2016-12-05	I want to keep the trees. No need to take SF back to dunes and rocks.
Llz H rsch	San Franc sco, CA	2016-12-05	Mt. Dav dson Forest s an oas s n th s urban center. We shou d be p ant ng trees, not destroy ng them
Ar ana C sneros	San Franc sco, CA	2016-12-05	I ove mt Dav dson.
Bobby S nger	San Franc sco, CA	2016-12-05	I ve at the bottom of th s beaut fu ecosystem. Leave t a one
Leo Gende ev	San Franc sco, CA	2016-12-05	Leave Mt. Dav dson a one. It s a beaut fu p ace. There s no good reason to ru n t.

Name	Location	Date	Comment
Arwen Zembora n	Austin, TX	2016-12-05	As a former, and future, Bay Area resident I am hoping the trees will not be cut. Please reconsider.
Lynda Simpson	San Francisco, CA	2016-12-05	Because my home is on Mt Davidson and I support this urban forest.
Nancy Young	Los Angeles, CA	2016-12-05	This is a beautiful, very green and lush pocket of green in an increasingly ugly city. Please leave it alone.
Gloria Justen	San Francisco, CA	2016-12-05	Use of the toxic Roundup pesticide is totally inexcusable. And we need trees! Trying to eradicate eucalyptus at this point is futile and pointless. The forest has become habitat for many animals and a comforting oasis of green for people.
Nancy Evans	Safayette, CA	2016-12-05	Horrible plan!
Marlene Aron	San Francisco, CA	2016-12-05	Please do not cut down all those trees on Mt. Davidson. The trees, the forests, add necessary health and well-being to the residents of the SF Bay Area. The trees give and hold life for so many animals, birds, insects. Trees and nature are so necessary for the well-being of so many. Please don't cut down the trees. Please save this beloved Forest.
Jesus Verduzco	San Francisco, CA	2016-12-05	I care about my city! Don't destroy this beautiful attraction and spruce up the place.
Ben Harper	San Francisco, CA	2016-12-05	I can't fathom why SF would do this.
Forence Monzasch	Day City, CA	2016-12-05	This is utterly stupid. What is the reason and what is the plan? Who owns this and??
Nancy Anderson	San Francisco, CA	2016-12-05	This is a beautiful place in our city
Max Rana	San Francisco, CA	2016-12-05	Please don't clearcut any trees in San Francisco, especially upon Mt. Davidson. Please restore the facilities at McLaren Park and make mountain bike trails throughout the city's greenspaces!! And please eradicate the poison oak. Thank you.
Hannah Miller	Oakland, CA	2016-12-05	I grew up on Mt. Davidson and that forest was my escape from the city during my teenage years. It made life seem so much easier when I could just walk a few blocks and be in the middle of a forest
Ryan Pasquene	San Francisco, CA	2016-12-05	Sounds like a lot for development and I like trees
Hristo Ivanov	Woodland Hills, CA	2016-12-05	Weed need trees.
Jeffrey Rodriguez	San Francisco, CA	2016-12-05	Even in SF and it's not the right thing to do for cutting down a beautiful forest that shows the wonders of this city. Too many things have changed in this city and it's not pretty. By cutting down 1,600 trees will just make it worse in any type of way
Anta Sgurdson	San Francisco, CA	2016-12-05	This quest to return SF woods to some "natural state" is nuts! They dug up a the cephalopod out at Ocean Beach and now the city has to pay for shifting the sand around!
Nate Amode	San Francisco, CA	2016-12-05	I love Mt. Davidson and its forest. It is an underappreciated San Francisco landmark, but a landmark nonetheless. It should be preserved to the best of our ability.
Jenn Murnighan	Marina del Rey, CA	2016-12-05	I grew up in San Francisco on hills younger generations used to hike Mount Davidson for us especially on Easter my family would go up and celebrate Catholic mass very fond memory please keep San Francisco green from my children and grandchildren to remember I'm third-generation native San Franciscan please keep it
Ian S.	San Francisco, CA	2016-12-05	I've been going there since I was a wee baby and still walk my puppies up there as much as I can. Don't ruin the nature that gives my home city the onyx charm it has left.

Name	Location	Date	Comment
Mathew Spohn	San Francisco, CA	2016-12-05	This plan is from an outdated way of thinking about natural resource management. My family and I hike in this forest every week and we don't want to see it destroyed.
Michael Martinez	San Francisco, CA	2016-12-05	As a longtime SF resident, this is just another waste of taxpayer dollars on an ignorant plan to eventually reclaim the land for development.
Dawn Be	San Francisco, CA	2016-12-05	This green space needs to be saved
Juan Chavarraga	Van Nuys, CA	2016-12-05	It is important to conserve as much forests as we can to help combat CO2 emissions in our atmosphere
Justin Moran-Abe	San Francisco, CA	2016-12-05	This is my front yard. You'd be foolish to destroy this beautiful place
Kris Strube	San Francisco, CA	2016-12-05	Whether or not a habitat, many animals call these areas home.
Suzy Lord	Montreal, Canada	2016-12-05	I live nearby! I love this park, and often go there with my family for a rejuvenating walk...I am shocked to read this plan of cutting most of the trees...WHY?
Jeff Easand	San Francisco, CA	2016-12-05	My son and I hike Mt. Davidson frequently and enjoy the trails, trees, and viewpoints. Please keep the area as it is today (and with no toxic pesticides).
Samuel Cuadra	San Francisco, CA	2016-12-05	Trees
Eric Huertas	Pasadena, CA	2016-12-05	We need this forest.
Molly Cahen	Brooklyn, NY	2016-12-05	This piece of nature in the middle of the city is important to me and my family. Please protect this forest.
Kat Sanders	San Carlos, CA	2016-12-05	We need every tree we have
Steven Bender	San Francisco, CA	2016-12-05	These projects are automatically suspect to me because of the involvement of companies which manufacture highly toxic herbicides. I don't think the true motive for clearing-cutting is the stated one.
Kristen Henriquez	San Francisco, CA	2016-12-05	Because air, water, Mother Earth and all of us need to live. We all deserve to live peacefully.
James Clark	Toronto, Canada	2016-12-05	Tree give life.
Michael Baw	Auburn, CA	2016-12-05	The environment is more important than aesthetics, and trees are more aesthetically pleasing than anything.
Max Mendez	San Francisco, CA	2016-12-05	I was not and raised in San Francisco. There has been so much change in the recent years to this city. Why log such a beautiful place. Can we keep SF original in at least our parks and open spaces. This is completely unnecessary and I'm afraid that once logged it will be proposed as the next hill to build more new and unneeded condos
J. Rosenthal	San Francisco, CA	2016-12-05	The negative impact of this plan far outweighs any perceived positives - I'm unclear on any positive outcome. Return the hill to the 1700s? Should we return Golden Gate Park to sand dunes? Food the financial District?
Jane Martinez	San Francisco, CA	2016-12-05	Mount Davidson is one of the most gorgeous and serene escapes from the city. Taking it away would be an absolute tragedy.
BILL RODRIGUEZ	Rochester, WA	2016-12-05	I was born and raised in SF the Glenpark/Sunnyside area and would hike up to the cross on Mt. Davidson almost every beautiful please do not let them destroy our natural areas.
Moe Davis	Day City, CA	2016-12-05	This forest is my favorite place in San Francisco.
Benjamin Juana	San Francisco, CA	2016-12-05	I walk in this forest about once a week. It's beautiful the way it is.

Name	Location	Date	Comment
Jlm B ngs	San Franc sco, CA	2016-12-05	Dear Park and Rec, P ease do not destroy one of San Franc sco s natura sanctuar es, the Mt. Dav dson Forest. The forest he ps f ght c mate change, prov des a refuge for w d fe, prevents eros on and food ng and much more. It s a so a major recreat on area for thousands of c ty dwe ers. P ease reject the deforestat on p an.No San Franc scan wants a ba d h . Thank you. Best, J m B ngs
Lee Parme ee	San Franc sco, CA	2016-12-05	I grew up wa k ng the tra s, and fee that the forest shou d be protected.
Ster ng Bard	San Franc sco, CA	2016-12-05	Nature s beauty and other w d fe ve there
Rob Vercoe	San Franc sco, CA	2016-12-05	Mt. Dav dson s better w th trees. Remov ng them wou d take them away and we shou d protect trees ke th s n our area.
Kev n Baumann	Germany	2016-12-05	Save the green p aces
Karen Ferguson	Men o Park, CA	2016-12-05	Th s project s a waste of taxpayer funds.
Son a Serra Wo f	San Franc sco, CA	2016-12-05	It s beaut fu and deserves to stay that way
Debra Amador	Peta uma, CA	2016-12-05	Trees and open space are needed to keep San Franc sco thr v ng.
N cho as Moberg	San Franc sco, CA	2016-12-05	Mt Dav dson s beaut fu ! Keep t beaut fu .
Pau a Fukuyama	San Franc sco, CA	2016-12-05	We need green space. P ease stop us ng dangerous neurotox ns.
Thomas Chen	San Franc sco, CA	2016-12-05	We need to save the forest or e se we are done for...
a exander o son	Oak and Ca forn a, CA	2016-12-05	Th s s my home, my c ty, and I know how mportant these spaces are to the hea th of th s urban area and ts res dents.
He d Cra g	San Franc sco, CA	2016-12-05	Once t s gone, there s no gett ng t back and I, for one, want to ve n a beaut fu c ty... wh ch means at east oases of green!
ho e chern s	Ha f Moon Bay, CA	2016-12-05	Th s s rrespons b e, dangerous and reck ess!!! P ease do the r ght th ng and don t do th s!
A sa V nokurova	Seatt e, WA	2016-12-05	We need a the trees we can get! A so, Mt. Dav dson s an urban retreat v ta to the menta hea th of many San Franc scans. These 1600 trees have an mmeasurab e, exponent a y pos t ve effect on San Franc sco as a who e.
Co n We	San Franc sco, CA	2016-12-05	We need more trees, not fewer!
Matthew wr ght	San Franc sco, CA	2016-12-05	No! Just no!
Nancy Wo f	San Franc sco, CA	2016-12-05	Leave our urban forest a one!! No more tox c pest c des!!
Lu s P	San Franc sco, CA	2016-12-05	Keep the forest
Br dgett Luther	San Franc sco, CA	2016-12-05	I m s gn ng because we need more trees, not ess. P ease rev ew your p an SF Parks Recreat on and Parks
Teresa Wentworth	San Jose, CA	2016-12-05	I was rs sed n San Franc sco n the 50 s and 60 s up near Mt. Dav dson. As ch d we used to wa k up to the cross through the woods. It s part of a San Franc sco andscape, and shou d be preserved.
Pau a Burkhart	Sonoma, CA	2016-12-05	Th s s just r d cu ous! Stop runn ng the env ronment. Trees aren t the on y v ng th ngs on Mt. Dav dson; there are many other forms of w d fe.
Chr stopher Ramos	San Franc sco, CA	2016-12-06	cutt ng down trees s not the way to go
Shannon Bergman	San Car os, CA	2016-12-06	We need to preserve our forests, not destroy them. S gn f cant env ronmenta mpacts shou d not be taken ght y.
Irma Moraw etz	Ha f Moon Bay, CA	2016-12-06	Because t s the r ght th ng do, spend money more w se y then cutt ng down our magest c Trees.
Kev n Rucker	San Franc sco, CA	2016-12-06	SF s my home and Mt. Dav dson wou d be barren and w ndy w th the trees.

Name	Location	Date	Comment
Loyd Affholder	San Francisco, CA	2016-12-06	It's a micro-fog ecosystem, why?
Michael Moore	San Francisco, CA	2016-12-06	Outrageous idea that we destroy the environment and we subject Mt. Davidson residents to potential mass ve fooding.
Terra Marchant	San Francisco, CA	2016-12-06	please save the trees!
Carla Otstott	San Francisco, CA	2016-12-06	Quit cutting down trees! We need them and want them.
Samuel Zorn	San Francisco, MN	2016-12-06	Mt. Davidson Forest is a treasure that must be protected.
Kieran McGowan	San Francisco, CA	2016-12-06	It's right
Tom Duffy	San Francisco, CA	2016-12-06	I am signing this petition because I live on the slopes of Mt. Davidson and maintaining its current integrity is vital to the neighborhood and to our frequent use of its trails and peaceful woods. The plans by the Rec & Park are simply an abomination of this special park. Please stop them for ruining yet another urban forest.
Lisa Bruner	San Francisco, CA	2016-12-06	San Francisco's green spaces are a beautiful resource for the many city dwellers who don't have yards or patios. These trees are an important part of keeping the area clean and homes for animals.
Bronwyn Gundogdu	San Francisco, CA	2016-12-06	I'm signing because I'm so outraged over the decision to remove the trees from Mt. Davidson. San Francisco is unique in being such a high density city but with beautiful oases of urban forests. These urban forests provide a rich resource aesthetically and environmentally. This seems to be a project being implemented by a small number of people with city government who are following their own very limited view of how SF should look, without regard to what the majority of San Franciscans want.
Mackenzie Owen	San Francisco, CA	2016-12-06	Clear cutting the Mt. Davidson forest is a profoundly stupid idea.
Craig Hanson	San Francisco, CA	2016-12-06	I grew up with Mt. Davidson as my backyard. I should as well.
Victoria Schwartz	Oakland, CA	2016-12-06	Save open space in SF!
Kathryn Karmar	San Francisco, CA	2016-12-06	I do not believe in clear cutting without replacement. This act would be more harmful than helpful to San Francisco.
Gabriela Davis	San Francisco, CA	2016-12-06	Because I love this forest, and go hike there often. Stop destroying nature!
Terrance Gue	San Francisco, CA	2016-12-06	Over the past 36 years I have hiked these trails. I've watched the trees grow. Please Keep the forest. We have twin peaks for open space.
Tiffany Burkhardt	San Francisco, CA	2016-12-06	It's a gorgeous trail as is. Please do not disrupt.
Stewart Goossens	San Francisco, CA	2016-12-06	woods aren't good...they're GRRREAT!
Cecilia Tran-Muchowski	San Francisco, CA	2016-12-06	I am a resident and we need to save beautiful Mt. Davidson Forest
Kim Rickman	South San Francisco, CA	2016-12-06	I am a fifth generation San Franciscan. I walked up this hill with my Great grandparents, grand parents, and parents. I walk now with my children.
Thomas Kany	San Francisco, CA	2016-12-06	Please do not continue to remove precious green space that truly helps make this city the magical, wonderful place it is!
Naomi Jatovsky	Dan Francisco, CA	2016-12-06	There is NO reason to do this. None, Zippo. Leave it alone.
Terence Rothschild	San Francisco, CA	2016-12-06	Signing petition. It's the right thing to do!
Amanda Aceves	San Francisco, CA	2016-12-06	Mount Davidson is an essential park for the surrounding community. In a community with little to no trees. The residents there, often walk to Mount Davidson park, to enjoy the beautiful lush area. I often go there as a resident of this community. Losing these trees would be absolutely devastating to me and my neighbors.
Adam Young	San Francisco, CA	2016-12-06	San Francisco preservation.

Name	Location	Date	Comment
J m Strano	San Francisco, CA	2016-12-06	SF Parks and Recs have lost the reflective mounds. Leave the trees alone. If anything, import some koala bears from Australia and help save them as well. Hands off the forest!
Chrysta Kafka	Palo Alto, CA	2016-12-06	The plan to toxic chemicals to remove or even reduce a healthy urban forest is both reckless and shameful.
Shannon Eaton	Dubua, CA	2016-12-06	SF needs to preserve the beautiful trees.
Timothy Armour	San Francisco, CA	2016-12-06	In twenty years our future children will ask "what were they thinking, cutting down all those trees" What looks good right this moment is not the right thing to do. For future generations...stop this NAP madness.
Aaron Loney	Braintree, MN	2016-12-06	This sounds like a very short sighted plan and ANY PLAN THAT INVOLVES Roundup (glyphosate), Garon 4 Ultra (tricypyr), Mestone (aminopyridine), and Habitat/Arsenal/Chopper NEEDS HALTED immediately!
Mandy Barovick	Reno, NV	2016-12-06	I grew up in the Bay!!! Let the Forest live!!!
Michelle McMan	San Francisco, CA	2016-12-06	Outrageous!
Nina Beck	San Francisco, CA	2016-12-06	The greenery is beautiful and healthy for the environment and soul!
Jaen Martens	Forestville, CA	2016-12-06	I love trees. I love San Francisco and this seems a ridiculous, cruel and unnecessary thing to do.
Kooch Daniels	bodega, CA	2016-12-06	Trees clean the air
Tommy Hemick	San Francisco, CA	2016-12-06	I'm signing this because we need places like this in the city to get away from the urban jungle. This place brings peace of mind, allows family time, and improves the environment. Don't destroy it!
Murray Cahen	San Francisco, CA	2016-12-06	Because my wife and daughter love to walk there
Sara Madigan	Mankato, MN	2016-12-06	This is a beautiful park that must be preserved for the health of SF
marah ortz	sancarlos, CA	2016-12-06	I LOVE THE TREES!
Michael Zachary Davis	San Francisco, CA	2016-12-06	I spent a lot of time up here in high school. As someone who's traveled the world, I can tell you the one thing I missed about San Francisco was being able to go to parks within the city where I could completely disconnect from the business of the city.
Dane Pedersen	Martinez, CA	2016-12-06	The forest is a beautiful sanctuary for wildlife and people
Jane Schafgans	San Francisco, CA	2016-12-06	Leave the trees alone and stop spraying poison.
Shannon McKay	Spokane, WA	2016-12-06	I have enjoyed these parks many times over the years. I LOVE the outdoors and these spaces provide so much more than outdoor recreation. They are truly healthy for our planet. Please reconsider the logging and pesticide usage. Thank you.
Krista Batton	San Francisco, CA	2016-12-06	I want to preserve nature in San Francisco
miriamcantor	sansanfrancisco, CA	2016-12-06	Can we really afford to cut down trees in an urban environment? We need our sanctuary more than ever with the current condition. Please save the trees!
Anne Mons	San Francisco, CA	2016-12-06	This is an infuriating plan to waste taxpayer money on a "politically correct" but environmentally unsound project. The forest is a benefit to SF, not a threat!
Mayy Yaser	San Bruno, CA	2016-12-06	Please leave this beautiful park alone! It's peaceful and serene
Josephine Yang	San Francisco, CA	2016-12-06	We love Mt. Davidson forest. It's a murder to log this forest.
G.B. Mer	San Francisco, CA	2016-12-06	We need the trees to maintain the health of the people and land of San Francisco. I agree with what is said in the attached letter. Save Mt. Davidson Forest.

Name	Location	Date	Comment
Ju e Ange	Gard ner, NY	2016-12-06	what happens to peop e when they get nto pos t ons n c ty coun c s? It s the same the wor d over. They become power mad d ots mak ng absurd dec s ons w th money that comes to them far too eas y w th no accountab ty. Do not cut down these trees. Trees are sacred and where they grow br ng fe. In an age where we never stop hear ng about c mate change and carbon footpr nt t s even more nonsens ca to cut down trees wh ch are a carbon s nk. As far as us ng a the var ous tox c sprays - career sts w th degrees who are ack ng n common sense, a sad and very common state of affa rs. Are these peop e ncapab e of th nk ng? Do they not have ch dren?
Just n Fung	San Franc sco, CA	2016-12-06	Seems unnecessary and a comp ete waste of c ty money. Mt Dav dson s a rare and revered oas s of nature here n San Franc sco. Lets preserve t for future generat ons to come!

Aysa Wright	Portland, OR	2016-12-06	What a waste to destroy this!
Robert TREGO	San Francisco, CA	2016-12-06	The forest is wonderful now. We can spend our money in more useful ways.
Peaches Stitts	San Francisco, CA	2016-12-06	I am born and raised in San Francisco and as a native I want to keep some of San Francisco's natural beauty and to keep wildlife thriving.
Scott Species	Seattle, WA	2016-12-07	I'm opposed to the logging. It makes no sense. Leave the forest the way it is.
George Goodspeed	Minden, NV	2016-12-07	Please consider the environment here, this is a must preserve effort!!
Soane Cook	San Francisco, CA	2016-12-07	I am going to sign this petition because I want to save the forest.
Ryan McCuen	San Francisco, CA	2016-12-07	The Sausalito Sea was a so-called "accident" and came into being in 1905, since then it has become a habitat to many species that have come to depend on the sea. California was a so-called "reversible" changes by agriculture and the raising of cattle to the point where certain plants now depend on the livestock. My point is that while it's great to live in the past, you cannot bring back the dead, at least not in this way. Now more than ever it's important to try to make sure that a species can survive and thrive on this planet, and without evidence that deforesting Mount Davidson is going to bring back the Xerces Blue Butterfly, the California Grizzly, or the quail population for instance. Then there is no reason to do this.
Debbie Hemmick	Pacific, CA	2016-12-07	We need to protect our environment and climate. Cutting these forests will endanger both. Don't cut down these forests. They are one of the last areas people and animals can breathe and experience serenity. Leave these for our future generations.
Pam Keeler	Rye, NY	2016-12-07	Trees are important for our future
Lindsay Cuibertson	San Francisco, CA	2016-12-07	It's beautiful and shouldn't be touched. Enough with destroying the earth!
Tim Adamchik	San Francisco, CA	2016-12-07	It's one of a kind!
Kristine Lee	Calabasas, CA	2016-12-07	As a former resident of San Francisco, Mt. Davidson Forest is a necessary sanctuary in the city. Not only is the space a vital green space that is frequented by locals, visitors, and wildlife. Please preserve this gem for generations to come.
Anger Pepper	San Francisco, CA	2016-12-07	Park and Rec needs to be controlled. Mr. Ginsberg is destroying our public parks. He deprives a parks for the community. Eucalyptus trees are our history and science states we benefit from them and they live 300 years or longer.
Aaron Vondrak	Carson City, NV	2016-12-07	I love trees
CLARE HERMAN	Pleasant Hill, CA	2016-12-07	I lived in San Francisco for many years and all my friends and relatives are appalled that this could actually happen to our forest!! It does not make any sense to destroy such a beautiful place!
Stephanie Rivera	Patterson, CA	2016-12-07	.
Alex Creese	San Francisco, CA	2016-12-07	SF City gov is full of dots
Katherine Rans	San Francisco, CA	2016-12-07	I love the trails of Mt. Davidson, it's a hidden oasis of green in the city!
Liz Stebby	San Francisco, CA	2016-12-07	Save these beautiful trees! There are so many better things SF Rec & Park should be doing with the time and money!
Rebecca Clark	West Hills, CA	2016-12-07	Let's protect the most intact and pristine habitats for our wildlife and flora.
Pau Lord	San Francisco, CA	2016-12-07	As a SF resident, all trees, even non-native species (in most cases) are more valuable in the urban environment than an absence of forest. Without restriction on commercial pesticide use and a phased reforestation plan in place and fully funded, then leave well enough alone.

J Thomas	San Francisco, CA	2016-12-07	"If you don't treat a few edible eucalyptus with herbicides it will come back. "Glyphosate is a probable carcinogen and has been blamed for causing autism, among other health problems. Let's poison our kids. Monsanto doesn't have enough money. Let's kill the birds and wildlife too. Just because most of the world's extinction has happened in the last 30 years it doesn't mean we shouldn't kill more living things. We destroy better than any species on earth. Will SF show Trump how to do it?
Christine Cho	San Francisco, CA	2016-12-07	Mt. Davidson Forest is my favorite nature walk near my home. Please save the trees!
Sharlene Simonson	San Francisco, CA	2016-12-07	The trees are scarce in these parts.
Jeff Londer	Burroughs, CA	2016-12-08	This heartbreaking plan to cut down 1,600 trees on Mt. Davidson and apply pesticides is a hazardous use of taxpayer money and would have significant negative impacts on public safety, public health, and the environment. The diversity of wildlife living on Mt. Davidson is awe-inspiring. Over 40 species of birds have been spotted recently spotted. Mt. Davidson is one of the top birding locations in all of San Francisco. SF Rec and Park's matrix of wildlife sightings lists 3 types of bumblebees that make their home on Mt. Davidson. The California sycamore is another inhabitant of the forest. The public does not want San Francisco to use taxpayer dollars to destroy the home of so many birds and wildlife.
Brooke Rodriguez	Houston, TX	2016-12-08	We need to protect our last remaining wild spaces!
Patricia Ztkus	Fareless Hills, PA	2016-12-08	We need the trees!
Ayssa Husan	Ottawa, Canada	2016-12-08	I'm signing because the preservation of trees is important. Forests are nature's beauty and they are important on so many cultural, social, economic and political aspects then people realize.
Keann Stanford	Sherwood, AR	2016-12-08	I'm signing this to save the beautiful rainforest, the trees, and wildlife deserve to stay where they are.
Victoria Poukos	Aurora, Canada	2016-12-08	I want to help save this magical forest.
Sandra Carretero García	Spain	2016-12-08	Firmo porque quiero salvar este lugar, no se merece que se talle, los árboles son parte de la vida, de la naturaleza, es medio ambiente... por favor, juntos podemos cambiar el mundo y hacer un lugar mejor. Concencemos por el medio ambiente, es parte de nosotros.
Kimberly Ley	Fairview, TN	2016-12-08	I'm signing because all nature needs to be protected. Think about the world we are leaving for our children and our children's children. I would love for my sons children to have nature in their lives and for these natural beautiful places not be used for greed and money.
Jessica Jensen	Minneapolis, MN	2016-12-08	Save this beautiful forest. We need these trees!
Kathiane Avear	Vitoria, Brazil	2016-12-08	Árvores são vidas ... Sem elas, não estaríamos aqui hoje .. Que Deus os abençoe.
Coleman Twigg	Lethbridge, Canada	2016-12-08	Trees are beautiful. We need them to breathe. And animals live there.
Brian DeBaise	Meriden, CT	2016-12-08	I am passionate about saving what is meant to reside here on this beautiful planet.
Hannah Booth	Hartsville, TN	2016-12-08	Save 1600 trees. Signing is easy. There is NO REASON for the logging of these trees. As for the wildlife and birds that will effect its demise. Just check the link. It's quick and painless. Help save some lives

Name	Location	Date	Comment
Anett Zotorzyck	Skokie, IL	2016-12-08	Forests are valuable sources of biodiversity needed to sustain life and wellness on this planet. Please act wisely and with the future in mind and save Mt. Davidson Forest in San Francisco. We must preserve and conserve the wilderness that remains on Earth and maintain strong environmentally friendly policies because of the countless benefits that would bring to the state, country, and world. San Francisco and California are known for the redwood areas and it would be a shame to destroy that. Thank you for your time. I have faith you will make the right decision.
Laura Deane	Hauppauge, NY	2016-12-08	I used to live in SFO, we need the trees.
Sarah Farre	Bismarck, AR	2016-12-08	I'm signing because we need our trees to live!
Natasha Fataa k	Australia	2016-12-08	I'm signing to save nature and the trees and I love NKKKK
Jao Yn Lee	Petaing Jaya, Malaysia	2016-12-08	Trees should be preserved for our next generation
Matthew Donon	Castleton, VT	2016-12-08	Preserving this earth's essential to the survival of life.
Amanda Cabrera	Lake Jackson, TX	2016-12-08	It's absolutely important to preserve our planet: Every tree that we can save counts.
Jean Jandreau	Black Hawk, SD	2016-12-08	Because this is the right thing to do.
Sydney Bevers	Showerwater, TX	2016-12-08	We cannot afford to lose anymore trees. This forest cannot go down
Doreen Koronos	North Babylon, NY	2016-12-08	It's important to save our forests!!
Marah Kastrava	Eugene, OR	2016-12-08	It's ridiculous that this is even something that needs "signed"..... It's very clear, the straight sap you in the face clear, as to why we need to save this forest.
Madeleine Sconsk	Lake Ann, MI	2016-12-08	Just like mother Earth we belong to her
Rebeca Pizarro	Spain	2016-12-08	Amo los árboles, la naturaleza y los animales
Sandra Roeder	Man, IL	2016-12-08	I believe in our forests..the trees not only provide us with clean air, but provide thousands of species a home. I believe in NKKKK Somershaider.. She and I are fighting to keep this planet free from things they can harm it.
Norma Bustos	Gibsonton, FL	2016-12-08	I want my son to grow up in a better place.
Ashley G.	NY, NY	2016-12-08	We need more trees on the planet. Period.
Cathy Davis	Gen Gardner, NJ	2016-12-08	I care!!
Celine Tucker	Saint John, IN	2016-12-08	Ecosystems at stake!!
Verónica Pera ta Batista	San Carlos, Costa Rica	2016-12-08	Es que vayan a destruir un bosque tan precioso y vayan a quitar el hogar a muchos animales, signifique que a los seres humanos ya no les interesa o que se pase a planeta por cosas tan estúpidas como contruir edificios, la humanidad va empeorando poco a poco si no nos detenemos seremos nosotros que nos quedaremos sin hogar.
smarotsou akak	Thessaloniki, Greece	2016-12-08	Clearcutting 1,600 trees on Mt. Davidson would increase the security risks from climate change by removing an older-growth, active forest carbon sink. The majority of the trees in the interior Mt. Davidson forest are healthy and do not require thinning or removal. The diversity of wildlife living on Mt. Davidson is awe-inspiring. Over 40 species of birds have been spotted recently. The proposed deforestation project would cause significant unavoidable negative impacts including and cumulative on a variety of biological resources, cultural resources, and recreation.
Ignacia Calderon	Santafo, Chile	2016-12-08	Because I believe that every forest should be saved. And all the environment and natural surroundings should be protected because they were created for beauty and to save us from all the bad things around us.

Deborah Martyn	Eastsound, WA	2016-12-10	Nature s our Sou , p ease preserve th s park
Chr st na Afanas eff	San Franc sco, CA	2016-12-10	Spent many many days wa k ng th s when I ved n the area. A prec ous gem n SF.
Heather B yeu	Bou der, CO	2016-12-10	We need a the trees we can get to make oxygen for our breath ng and to regu ate our c mate on a p anet where human be ngs can thr ve.
m chae tank	Oak and, CA	2016-12-10	I have ved on and off n San Franc sco for 8 years and there s no reason to cut down these trees en mass! We need to keep them n the ground for future generat ons!
martha pereyra	m am beach, FL	2016-12-11	Hermoso proyecto,Uruguay nesec ta esto, os an ma tos estan desproteg dos.
Jan ce VrMeer	Sedona, AZ	2016-12-11	Why oh why wou d you tear down a thr v ng forest??? Hav ng grown up n the Bay Area, I have a spec a fondness for ts natura beauty and am a ways saddened when I return "home" and see the "renovat ons"... P ease, preserve the Mt. Dav dson forest! The benef ts that a commun ty rece ve from a we estab shed forest, s mposs b e to rep cate.
Co een Pundyk	Topanga, CA	2016-12-11	I grew up n the ne ghborhood and my son ves n West Porta present y. Mt. Dav dson s a pos t ve for everyone n the c ty and shou d not be c ear cut.
Dawn Gr ff n	San Franc sco, CA	2016-12-11	I grew up there and t was my sanctuary
Janeen Cox	Ho ston, MA	2016-12-11	I v s ted here when vacat on ng n Ca forn a. It s beaut fu ! You can t ose tl!
Jan na Turch n	Sebastopo , CA	2016-12-11	We need more w d fe than ever before, not ess. Humans need nature to rema n sane. It s our true home.
M ra O ah	Gat neu, Canada	2016-12-11	j a me es arbres!
M che e Beach	Char eston, AC	2016-12-11	We need to save our forests

Name	Location	Date	Comment
Frances Jacobs	Indianapolis, IN	2016-12-11	we need the trees we need the Green Space we need a little world that goes with the trees and green space. the person who put this pet together has facts figures and very knowledgeable information fifteen thousand percent behind her and I hope everyone else besides this and gets with the program too
Jen Somo	Petaluma, CA	2016-12-11	I love Mt Davidson and the trees and nature there!! I don't understand this plan!!
gg na Lawrence	Bayside, CA	2016-12-11	City people NEED Trees! We ALL need TREES! Preserve the Forest! Please!~&t;3~
Mora Kavanaugh	San Mateo, CA	2016-12-11	I grew up hiking and playing on Mt. Davidson - going to Easter Mass there. Would hate for generations to come not to enjoy the forest!
Tim Oseckas	Grovedale, VIC, Australia	2016-12-11	We must protect whatever remaining areas of nature exist for the beings that live there and for the future of the planet
Vicki Leon	Lakewood, CO	2016-12-11	Dangerous to our planet.
Amy Lockwood	San Francisco, CA	2016-12-11	This is a magical place.
Jennifer Coleman	San Mateo, CA	2016-12-11	The city needs this forest!
Sharon Haneman	Holtsville, NY	2016-12-11	Must be in the way of some rich dots view :(
Veronica McCure	Davis, CA	2016-12-11	Please preserve this beautiful forest.
aura stevenson	san francisco, CA	2016-12-11	Keep our trees- and access to sanctuary spaces for city residents. Climate change has made trees impossible by availability and positive mental health effects of spending time in forested spaces are well documented. Thanks for listening to the people of San Francisco.
Susan Aiken	Saint Paul, MN	2016-12-11	This plan is outrageous. The environmental outcome is detrimental. Save our green spaces.
Louise Hastie	Healdsburg, CA	2016-12-11	I was born in San Francisco and grew up there. I was able to enjoy the beautiful and amazing places that made The City unique. The people who live there now deserve to have access to this forest.
Kara Beo	Day County, CA	2016-12-11	I am signing because this is a beautiful park with trails and it is a waste to cut these trees down. Unnecessary and they should stay!
Michelle Dederich	California, CA	2016-12-11	WE need our forests
Harper BeolaRoux	Richardson, TX	2016-12-11	Playing on Mt. Davidson is one of the sweetest and most magical moments I have of growing up in San Francisco. I strive to visit every time I return.
robert dreyer	san francisco, CA	2016-12-11	We need trees in San Francisco.
Adrian A.	San Francisco, CA	2016-12-11	Save our beautiful forest park!!
Barbara Gunter	Gaithersburg, TN	2016-12-11	I believe in parks and green spaces for people to be able to have a place outside the urban jungle to breathe clean air and enjoy life.
Dennis Monaghan	Pasadena, CA	2016-12-11	We have to save green spaces
Charlene Spedden	Cape Canaveral, FL	2016-12-11	We need to protect what forest, trees plants and wildlife sustains.
Anna Heath	Oakland, CA	2016-12-11	I grew up on Arroyo Way in Moraga Park, and am shocked to learn of these plans to remove the forest that I grew up knowing and exploring. I implore the SF Recreation, Park, and Planning departments to protect this and for the generations to come.
Kat McHugh	Haf Moon Bay, CA	2016-12-11	Please don't clear cut the trees in Sharp Park or SF! This world space is vital to the wellbeing of our wildlife and our own.
David Lehnung	Beaufort, PA	2016-12-11	I was born and grew up in San Francisco, and my sisters live on Mt. Davidson. We have taken walks there many times when I was there on a visit.

Loreen Jones	Stevenson Ranch, CA	2016-12-13	Save our trees....a ways!
Joanne Brancheau	Toledo, OH	2016-12-13	My son and son-in-law live across from that beautiful park. That's just criminal as we are insane. Leave nature alone. That's who else's deeds down.
David Ferre	Dardanelle, AR	2016-12-13	This is a beautiful area right across the street from my brother and brother-in-law's house. There's no reason whatsoever to spoil this natural beauty.
Dan E. Joy	Colorado Springs, CO	2016-12-13	Our forests, our parks, our animals, our planet needs to be protected. We need to make a change. I want to be apart of the solution, not the problem.
Matthew Kramer	Loomis, CA	2016-12-13	I love visiting here and the trees and wildlife deserve to keep their homes.
Frank Moore	San Francisco, CA	2016-12-13	I live in Mt. Davidson. Hasn't anyone thought to sue CCSF to prevent this from going forward based on damage to property by erosion? Anyone out there organizing such an effort?
Jenny Mosseray	Bruxelles, Belgium	2016-12-13	Just love a nature.
Nancy Stton	Mountain View, CA	2016-12-13	I grew up on the slopes in Maroma park. The forest was a wonderful resource for us, a real gem in the middle of all the concrete. I'm saddened to see the possibility that it could be destroyed.
Ron Proctor	San Francisco, CA	2016-12-14	I have concerns about the focus on "restoration" of native plants in "Natural Areas", which has in the past caused destruction of natural - but non-native - vegetation including thousands of trees, increasing use of pesticides including some that are banned elsewhere, and access restrictions for recreation.
Ron Proctor	San Francisco, CA	2016-12-14	I have concerns about the focus on "restoration" of native plants in "Natural Areas", which has in the past caused destruction of natural - but non-native - vegetation including thousands of trees, increasing use of pesticides including some that are banned elsewhere, and access restrictions for recreation.
Robyn Sherrer	San Francisco, CA	2016-12-14	San Francisco Forest Alliance!
Amy Van der Wyk	San Francisco, CA	2016-12-14	The Mt. Davidson forest is filled with healthy, mature trees and is home to beautiful birds of prey. At my home garden, near Mt Davidson, I have planted many Californian natives, but I wholeheartedly disagree with the notion that a vibrant ecosystem such as the Mt Davidson forest should be replaced, threatened or in any way harmed. These are mature, thriving, towering trees. We've entered an era of ongoing climate change and drought. Keep our urban forests!
Lana Gaperin	San Francisco, CA	2016-12-14	I love Mount Davidson and want to keep it as is.
Betty Ellis	Valejo, CA	2016-12-14	A rare treasure surrounded by cement, tall buildings, a large busy city, freeways, etc.
Richard Drechsler	San Francisco, CA	2016-12-14	Save San Francisco's tall trees and the animals who rest on, on and beneath them.
Amy Johnson	Berkeley, CA	2016-12-14	I like those trees and I like that familiar landscape and I utterly disagree with the proposition of the use of Roundup.
Amy Johnson	Berkeley, CA	2016-12-14	I like those trees. I like that familiar San Francisco landscape. I utterly disagree with the proposition of Roundup.
Bonita Seaman	San Francisco, CA	2016-12-14	I'm signing this petition because I believe that the beauty of Mount Davidson and its trees is paramount to the beauty of the City of San Francisco. This mountain is one of the reasons that I chose to live in this area. It is a beautiful area that brings peace and tranquility, a wonderful hiking area and a place of refuge for people as well as all the wildlife.
Nathaniel Mer	San Francisco, CA	2016-12-14	I believe that all nature is sacred. Delete the housing, not the plants.

eleanor facon	Stockton, CA	2016-12-14	We need the trees for healthy living.
daniel mer	Valeta, CA	2016-12-14	care
Angela Weiman	Madison, WI	2016-12-14	This is astonishing! Removal of 1600 trees. Poses extreme environmental hazard and long term destabilization.
Liane Alves	João Pessoa, Brazil	2016-12-14	Eu apoio tudo que for para salvar o nosso mundo.
Jessica Codspot	Oakland, CA	2016-12-14	Parks are integral to the community shared by humans and animals alike.
jean barbra	San Francisco, CA	2016-12-14	Protect nature. What do we do when birds bring a seed from a non-native tree?
Frances Brady	San Francisco, CA	2016-12-14	I'm signing because I love Mt Davidson. In its current forested glory. I hike up to everyday with my dog and would be devastated if senseless people tore the trees out especially if it came from my taxpayer dollars.
Ken Nangle	San Francisco, CA	2016-12-14	The city should leave this area alone!
Susan Heinen	Oakland, CA	2016-12-15	Please do not cut 1600 more trees slated for logging. It is a human refuge as is. Susan Heinen
Anthony Catchatourian	San Francisco, CA	2016-12-15	Mt Davidson is important.
Roche Towers	Oakland, CA	2016-12-15	No!
Bernice Doner	San Francisco, CA	2016-12-15	I do not want the tragic loss of trees on Mt Davidson to happen!!!
Tiffany Trujillo	San Francisco, CA	2016-12-15	Who the heck cuts down trees anymore?? Heard of global warming? I understand eucalyptus is not native and that there is concern with that, but there simply MUST be a restoration plan to INCREASE the number of trees in SF, and honestly across the state and country. Also, toxic herbicides and insecticides should NEVER be used. I find this shocking in such a so-called progressive city. The planning dept would do well to take refresher courses in Environmental Science and Biodynamic Gardening. To say I am disappointed with this plan is a gross understatement.
Sarah Kottmeier	San Carlos, CA	2016-12-15	This just can't happen
Suzanne Howar-Carter	Alameda, CA	2016-12-16	we need trees to absorb carbon!!
Heather Janssen	Alameda, CA	2016-12-16	We need to protect what's left of this naturally beautiful area
Anat Markosian	Cupertino, CA	2016-12-16	To cut 1600 trees to make it as it used to be in 1700? This is crazy, needs to be stopped!
Lee Mazmanian	Day City, CA	2016-12-16	Let's erase ourselves from San Francisco, just leave what was born, grew, here. No more irritation than cutting down immigrant vegetation. Morons.
Nina Potepan	San Francisco, CA	2016-12-16	It's so important to have nature in a city
Benjamin Aguilar	San Francisco, CA	2016-12-16	As a native San Franciscan who has lived in the neighborhood for over 20 years, Mt Davidson has served as a wonderful retreat for my family and I. I attended Maroma Elementary, just a few blocks away, and still remember hiking up to the cross and picking plant strawberries in the area. Please save this amazing space.
reyes sydney	Burkegame, CA	2016-12-16	love sf
payton carro	San Francisco, CA	2016-12-16	Because I grew up running around this beautiful place and so should any young person raised in the city... We need to preserve green space as much as possible.
Raymond Goyette	Dracut, MA	2016-12-16	These trees should be saved for many good reasons.
Macom Catchatourian	South San Francisco, CA	2016-12-17	The most beautiful view in San Francisco. The venerable Mount Davidson Cross

Name	Location	Date	Comment
Christine Hs	Day City, CA	2016-12-29	As a native San Franciscan, I want to keep something of old San Francisco intact. It's bad enough our cross-section of our history due to an insensitive city government and a few disgruntled residents. What happened to major tyru es?
Ga Spanger	Besse, MI	2016-12-29	We need to keep the forest and preserve our historic forest.
juanne cerget	Graham, WA	2016-12-30	It must be saved!
stacey pettitt	Kingsburg, CA	2016-12-31	It would be bad for the environment to cut down the trees and use pesticides to prevent their return. The public doesn't want these trees removed. It would be costly, bad for the air, dangerous to leave the logs on the mountain, and a danger to the land/homes below due to instability from deforestation (mudslides). It's ridiculous to even consider your removal of perfectly good trees.
RubyAnne Kobaba	Edmonton, Canada	2016-12-31	If you don't stop killing my Trees, I will suffocate us all! You could make hemp a cash crop for paper requirements.
Gunny Messer	Fanning Waters, WV	2016-12-31	We need forests on our planet. Trees do so much to help our Environment. Without them we would be goners
Mary Jones	Akron, OH	2017-01-01	we need to preserve our trees, they are one of our great natural resources, that are not easily replaced. we need their shade, their oxygen, the humidity they add to the air- and the shelter they give to wildlife. please do not do this!
Michelle Jacques-Menegaz	San Francisco, CA	2017-01-02	Parks and green space are a necessity. We desperately need this natural oasis, and another, in the midst of our urban environment; this one of the things that is so wonderful about San Francisco. Please do not destroy it for the sake of returning the area to its original condition; after all, it will never be the same, and so many birds and animals, and humans, have adapted along with it. Thank you.
Mark Drafah	Oskaloosa, IA	2017-01-05	wow, I can't believe this, this is gone so far, how did some dept. get power to terminate trees like that, I believe this, what year is this, don't we really need trees bad, I mean really bad, and we have the people who protects it wanting to kill it, everyone needs to read this, I won't tell you, it's very very long, but very interesting, then please sign but please read it all the way thru
Maranna Coode	San Francisco, CA	2017-01-06	This doesn't make sense why they want to cut down so many healthy trees. I wonder what the real reason behind this is. A that Round-up poison is increased by disturbing.

Subject: Rescind Certification of EIR for SNRAMP: it is a "whitewash"
Date: Tuesday, February 21, 2017 8:58:22 PM

**Attention SF
Board of
Supervisors:**

The EIR for the SNRAMP is a "whitewash" From wikipedia: To whitewash is a metaphor meaning "to gloss over or cover up vices, crimes or scandals or to exonerate by means of a perfunctory investigation or through biased presentation of data"

Fact 1:

You cannot cut down 18,500 trees and "replace" them with grass and shrubs without a huge release of greenhouse gas and a loss of future carbon sequestration.

Fact 2:

You cannot close 28% of our City's parkland to public access and claim there is no impact on our recreation.

Fact 3:

You cannot say implementing a plan that is totally dependent on herbicides will not increase herbicide spraying in our parks.

Fact 4:

You cannot ban bicycles from 1/3 of our park areas and say there is no impact on bicyclists.

Fact 5:

Yet this is what the EIR claims.

Conclusion:

Reject the certification of the EIR and send it back to Planning for an honest evaluation of the impacts of the SNRAMP. While that is happening, halt RPD's premature implementation of the Plan.

Signed:

suchiu lo

Subject: EIR DOES NOT identify the impacts of SNRAMP implementation, mitigation needed
Date: Tuesday, February 21, 2017 4:08:39 PM

**Attention SF
Board of
Supervisors:**

There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. As a homeowner with property adjacent to Mt. Davidson, I am greatly concerned about removal of trees and the resulting erosion. Consider other areas where wholesale forest reduction has resulted in landslides. Our years of drought have made us complacent - but recent heavy rains should give all of us a wake-up call. Trees stabilize the soil, leave them alone. Here are 10 issues I am also concerned about:

- 1. Public access restrictions:** Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.
- 2. Increase in greenhouse gases:** You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.
- 3. Increase in herbicides:** The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.
- 4. CEQA process violations:** The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.
- 5. Trail closures:** The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.
- 6. No required tree replacement in Project area:** The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.
- 7. Project implementation before EIR violates CEQA:** The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.
- 8. Bicyclists singled out:** The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.
- 9. Impact of** The NAP's implementation of the SNRAMP in advance of the EIR

fencing ignored: demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.

10. Evidence of bias: Bias in the EIR is demonstrated by the inclusion of “alternate facts”, such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

Subject: Proposed Plan to drain wetlands
Date: Saturday, February 18, 2017 6:49:34 PM

Dear Board Members:

Subject:

Please protect wetlands and reject any SNRAMP that includes golf course redevelopment

Dear San Francisco Board of Supervisors:

I am writing to strongly urge you to reject the Final Environmental Impact Report (FEIR) for the proposed Significant Natural Resource Areas Management Plan (SNRAMP), unless and until the Sharp Park Golf Course redevelopment is removed from the plan. The vast majority of California's wetlands have been drained, degraded and destroyed. Sharp Park is home to federally protected, endangered California Red-Legged Frogs (*Rana draytonii*), California's official state amphibian. The Board of Supervisors should work to protect, rather than to kill, harm and harass these frogs, which is what happens when the City pumps the Sharp Park Wetlands out to sea, causing the frogs' egg masses to be stranded on dry land. Although not a Californian, I do wholeheartedly oppose any usage of taxpayer funds that results in the destruction of rare wetland ecosystems anywhere in North America.. Using taxpayer dollars to drain wetlands for non-essential purposes is thoroughly unethical. Again, I request that you not approve any version of a Significant Natural Resource Areas Management Plan that condones or funds such activities. Please see www.savethefrogs.com/sharp-park for more info, and remember that there are over 1,000 other golf courses in California.

We, as humans, all lose whenever we allow crucial eco-systems to be compromised for short term monetary gain or for selfish group interests. Thank you for your consideration of the above.

Subject: Please Deny Appeal and Approve the Natural Areas Plan!
Date: Saturday, February 18, 2017 6:12:22 PM

Dear Supervisors,

I am a San Francisco resident, a Sharp Park golfer, and a supporter of the Rec & Park Department's Natural Areas Plan, which among other things includes the Department's Laguna Salada Restoration Plan, to improve habitat in the Sharp Park wetlands for frogs and snakes, while maintaining the historic 18-hole golf course.

The Natural Areas Plan was approved December 15 by the Planning and Rec & Park Commissions, following a 20-year process of study, public input, and environmental review. But now the same anti-golf groups that have for years been trying unsuccessfully to close the golf course, have appealed the Commissions' decisions to your Board. Please vote to deny that appeal.

Sharp Park is a beautiful, historic public course, built by one of history's greatest golf architects, Alister MacKenzie. Each year since 1932 it has provided reasonably-priced enjoyment, healthy outdoor exercise and a community gathering-place for tens of thousands of diverse men, women, senior, and junior golfers. It is also convenient—just a 15-minute freeway drive from the City's southern neighborhoods. Please do not allow the anti-golf groups to obstruct the City's plans to improve habitat while maintaining the golf course. Their delaying tactics have been going on for years, and their arguments have been repeatedly rejected -- by the Rec & Park and Planning Departments, as well as the Corps of Engineers, the US Fish & Wildlife Service, the California Coastal Commission, and state and federal trial and appellate courts in San Francisco and San Mateo County.

It is time to move forward. Please vote to deny the appeal, and to approve the Natural Areas Plan. Support your Recreation and Park Department's carefully-developed and balanced plan to recover frog and snake habitat in the Sharp Park wetlands, while saving the beautiful, popular, and historic 18-hole golf course.

Thank you for your service to the community and for considering my request.

Subject: EIR DOES NOT identify the impacts of SNRAMP implementation, mitigation needed
Date: Wednesday, February 22, 2017 10:34:25 AM

**Attention SF
Board of
Supervisors:**

I rarely get involved in issues such as this one but feel it is critical for me to do so now. There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. I have spent more time in Glenn Canyon Park than most and have seen different management and usage policies come and go. I have seen the feral cats leave and the coyotes move in. I have seen the owls grow scarcer and much of the bee population collapse. I have seen fences and trails added and removed. Nothing comes close to the utter and totally irrevocable changes proposed by the EIR and those that manipulate its implementation in order to impose their vision of what the park should look like. I still don't understand how such a small group of people can get so much authority to implement a plan that is murky in its true intentions and completely without the type of oversight that will allow us to recover from any mistakes or abuse of authority that this ill-conceived plan allows for. Why does their need to be a sweeping vision to return everything to a time when there were no human inhabitants? Why do we need any BIG PLAN at all? Isn't it enough to maintain and improve our beautiful parklands without having to give them a 100% facelift? What was so wrong? Were there a lot of complaints that there were too many trails or trees? Did anyone say that we need to use dangerous pesticides because we need to make changes to the landscape quickly? Is the entire trail systems collapsing that they need to be redone and many closed? Yes, we need to manage our parks responsibly. But I don't think that responsible management includes major and irrevocable changes to landscape--sure sounds like a vanity project of a very select few. Here are 10 issues I am concerned about:

- | | |
|---|--|
| 1. Public access restrictions: | Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact. |
| 2. Increase in greenhouse gases: | You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong. |
| 3. Increase in herbicides: | The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use. |
| 4. CEQA process violations: | The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR. |
| 5. Trail closures: | The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public |

recreation the EIR fails to address.

6. No required tree replacement in Project area:	The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.
---	---

7. Project implementation before EIR violates CEQA:	The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.
--	---

8. Bicyclists singled out:	The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.
-----------------------------------	---

9. Impact of fencing ignored:	The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.

There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:

1. Public access restrictions:

Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.

2. Increase in greenhouse gases:

You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.

3. Increase in herbicides:

The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.

4. CEQA process violations:

The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.

5. Trail closures:

The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.

6. No required tree replacement in Project area:

The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.

7. Project implementation before EIR violates CEQA:

The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.

8. Bicyclists singled out:

The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.

9. Impact of fencing ignored:

The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.

10. Evidence of bias:

Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

 Subject: EIR DOES NOT identify the impacts of SNRAMP implementation, mitigation needed
 Date: Tuesday, February 21, 2017 8:44:50 PM

Attention SF Board of Supervisors:	There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:
1. Public access restrictions:	Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.
2. Increase in greenhouse gases:	You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong. Not only that, the massive cutting of trees planned for Sharp Park will destabilize current bird populations as well as other wildlife who depend upon the trees for habitat. The cutting of trees will be so massive, it is also going to result in soil movement, as well as much greater water runoff--even now with our rainfall this year, you can anticipate mudslides, as well as runoff that will flood the lower areas near the rifle range. This could lead to runoff of the area's soil contamination into neighborhoods and proximate to people and their pets, not to mention wildlife.
3. Increase in herbicides:	The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use. Not only will there be an increase in herbicide use, the remnant stumps and brush become areas where mosquitoes can breed, exposing the public to heightened risk for West Nile Virus, Zika and other mosquito borne illnesses.
4. CEQA process violations:	The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.
5. Trail closures:	The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.

| Attention SF Board of Supervisors: | There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about: |
| 1. Public access restrictions: | Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact. |
| 2. Increase in greenhouse gases: | You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong. |
| 3. Increase in herbicides: | The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use. |
| 4. CEQA process violations: | The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR. |
| 5. Trail closures: | The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address. |
| 6. No required tree replacement in Project area: | The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area. |
| 7. Project implementation before EIR violates CEQA: | The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks. |
| 8. Bicyclists singled out: | The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false. |
| 9. Impact of fencing ignored: | The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP. |
| 10. Evidence of bias: | Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure. |

Subject: EIR DOES NOT identify the impacts of SNRAMP implementation, mitigation needed
Date: Wednesday, February 22, 2017 11:42:04 AM

**Attention SF
Board of
Supervisors:**

There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:

**1. Public access
restrictions:**

Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.

**2. Increase in
greenhouse
gases:**

You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.

**3. Increase in
herbicides:**

The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.

**4. CEQA
process
violations:**

The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.

**5. Trail
closures:**

The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.

**6. No required
tree
replacement in
Project area:**

The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.

**7. Project
implementation
before EIR
violates
CEQA:**

The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.

**8. Bicyclists
singled out:**

The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.

**9. Impact of
fencing
ignored:**

The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.

**10. Evidence of
bias:**

Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Being able to continue the legacy of making an Alister MacKenzie designed golf course at an affordable price for SF residents is a great privilege, which would be a shame to lose. There has been a lot of efforts to balance preservation of the habitat while maintaining golf course access and continued appeals are not a productive use of our tax paying dollars.

Please deny the appeals from the Commission's decision.

Best regards,

Dermot Stratton

DATE: Wednesday, February 22, 2017

RE: One Youth Commission action at the February 21, 2017 meeting: Support YC Motion 1617-AL-03 [Motion Urging the Board of Supervisors to Remove Sharp Park Golf Course Redevelopment Project from the Natural Resource Areas Management Plan Environmental Impact Report]

At its **Tuesday, February 21, 2017 meeting**, the Youth Commission voted to support the following motions:

To support YC Motion 1617-AL-03 - [Motion Urging the Board of Supervisors to Remove Sharp Park Golf Course Redevelopment Project from the Natural Resource Areas Management Plan Environmental Impact Report]

This matter refers to Board of Supervisors File No. 17044. A record of their response is attached to this document.

Youth Commissioners thank the Board of Supervisors for their attention to this issue. If you have any questions, please contact our office at (415) 554-6446, or your Youth Commissioner.

FILE NO.

MOTION NO. 1617-AL-03

1 [Motion Urging the Board of Supervisors to Remove Sharp Park Golf Course Redevelopment Project
2 from the Natural Resource Areas Management Plan Environmental Impact Report]
3

4 The San Francisco Youth Commission urges the removal of the Sharp Park Golf Course
5 redevelopment project from the Natural Resource Areas Management Plan Environmental Impact
6 Report (EIR). The Sharp Park Golf Course is a liability for San Francisco taxpayers and the General
7 Fund and deserves closer scrutiny by the public and the Board of Supervisors. The San Francisco
8 Recreation and Park Department (RPD) previously indicated the need for a separate review.
9

10
11 In 2009, in response to public scoping comments on the EIR, the RPD stated:

12 “Because redesigning or eliminating the Sharp Park Golf Course is a separate proposal being
13 studied by SFRPD, it will not be included or evaluated as part of the proposed SNRAMP
14 project analyzed in the EIR. Should changes to the Sharp Park Golf Course be proposed, they
15 would undergo a separate regulatory review, including CEQA environmental review.”
16

17 We are concerned about the inclusion of a Pacifica-based Sharp Park Golf Course redevelopment
18 project within the San Francisco “natural areas plan.” The golf course has lost more than \$1.75 million
19 in the last 11 years, drawing scarce resources away that could instead be invested within San
20 Francisco in neighborhood parks and recreation programs.
21

22 However, the draft EIR includes a golf course redevelopment project. This redevelopment is estimated
23 to cost the City \$11 million, and is expected to lead to future sea wall upgrades, potentially costing
24 millions more.
25

1 Scientists from institutions such as the University of California and San Francisco State University
2 have criticized the Sharp Park Golf Course redevelopment project, stating that it harms endangered
3 species and damages the wetlands. The golf course was built upon wetlands, and the RPD pumps
4 freshwater from the natural areas into the ocean, wasting more than 100 million gallons of fresh water
5 each year.

6
7 The Sharp Park Golf Course, which is located outside San Francisco, indicates the need to realign our
8 scarce funds towards those facilities, programs, and services relied upon by young people and
9 residents of our neighborhoods. We urge the San Francisco Board of Supervisors to ensure the golf
10 course redevelopment is subject to further review by removing the Sharp Park Golf Course
11 Redevelopment from the EIR.

Dear Supervisors and Clerk --

Please accept and add this letter of support to the record for the upcoming hearing of the
Appeal of Certification of EIR for Recreation and Parks' SNRAMP by Planning Commission.

Thank you for your attention on this matter.

Yours,
DogPAC of SF

Appeal of Certification of EIR for Recreation and Parks' SNRAMP by Planning Commission

The EIR does not do what it is supposed to do, reveal the significant negative environmental impacts of the Plan. Please send it back to Planning to make it right, so when we adopt the Plan, everyone knows what we are committing to and mitigation measures are put in place to minimize the negative impacts.

Over the past 15 years the Natural Areas Program has operated without accountability. They have spent millions and millions of dollars furtively implementing the SNRAMP in the guise of their "Urban Trails" and "Trail Improvement" projects. Trails have been closed, fences erected, trees cut down and native plants installed. Have they accomplished anything positive? Are the changes the Plan proposes for our parks sustainable, or do they require constant human intervention and a never ending flow of money and herbicides? Does the EIR help us answer these questions?

We are, specifically, concerned about the ignorance of the federal advisory of harm in removing so many registered dog-play areas without replacement or relocation after we spent so many years in developing and tax dollars to support and provide for over 150,000 dogs and their parents. This is unconscionable and dismissive, especially, with the looming closures at GGNRA.

- The EIR hides the fact that the NAP Management Plan will close 95% of natural areas to public access. Since NAP controls one-third of all Rec-and-Park-managed land, that's a significant access closure that is not adequately addressed in the EIR.

- The EIR did not adequately address impacts of the closure of 15% of the total legal off-leash space in SF city parks. It did not consider impacts as the population of people and dogs increases over the years.

- The EIR did not adequately address impacts if NAP insists on closing up to 80% of the total, legal off-leash space in SF city parks that are located either within or immediately adjacent to natural areas. This worst-case scenario should have been studied, but wasn't.

- The EIR said NAP's off-leash closures, when combined with proposed closures in the GGNRA, would have a significant impact, but the EIR did not identify any mitigations to address the impact. An obvious mitigation -- for every acre lost, new off-leash areas

would be created. But it won't work if large off-leash areas at Bernal Heights and McLaren Park are reduced, and the lost off-leash acreage is replaced with multiple, small off-leash areas in other parks. People want the experience of hiking with their dog, which they have in the current off-leash areas at Bernal and McLaren, and they can't get that in the much smaller Dog Play Areas in most other parks. The visitor experience must be the same in any replacements.

I) The EIR did not adequately address the impact on public safety in the parks if people with dogs are forced out of large areas of our parks. Paws in the park are eyes in the park. A well-used park is a safe park.

We do not want our parks closed and turned into nature preserves where all we can do is walk through them on a few trails. This is what the SNRAMP intends. It restricts public access to on-trail only. Before we surrender 25% of our parkland to this Plan there should be a real discussion. The EIR sweeps this issue under the carpet.

The SNRAMP is completely dependent on the use of Tier 1, most hazardous, herbicides to kill unwanted trees and plants. The EIR claims implementation of the SNRAMP will not require herbicide use. Think about it. In fact, new evidence revealed just last week shows there may have been some abnormalities with regards to relationships between the private sector and government agencies.

http://www.theecologist.org/News/news_analysis/2988645/suppressed_epa_toxicologist_it_is_essentially_certain_that_glyphosate_causes_cancer.html

We want our city to “walk the walk” on climate change. If we are going to cut down 18,500 trees, there better be a good reason. This is going to release a lot of methane and carbon dioxide and destroy future carbon sequestration. Somehow the EIR claims the Plan will reduce greenhouse gas emissions. Let's have an honest discussion please.

City surveys have demonstrated the public wants more hiking trails. The SNRAMP plans closure of 26% of our trails. As if that was not bad enough, in parks where the NAP has already implemented its “Trail Improvement Projects,” over 50% of the trails have been closed. According to the EIR, this is not a significant impact on public recreation. It is.

We do not want RPD spending our money to build fences, close trails, spray herbicides and cut down healthy trees. From January through October 2016, the Natural Areas Program made 85% of SFRPD's herbicide applications.

RPD's new Equity Metrics count money spent on those things as a benefit to disadvantaged park neighbors. The park areas closed under the SNRAMP continue to be counted as a benefit to the Equity populations. This turns the Equity Metrics into a tool for environmental racism.

If the EIR had presented an honest picture of the significant environmental impacts of the SNRAMP, mitigation measures would have been required to minimize the harm caused by the program. We need those now. The actions of the Natural Areas Program must be measured to insure compliance with the Plan and with the mitigation measures.

-The Plan calls for cutting down an average of 14 trees per month in San Francisco. The NAP should be required to maintain a log of what they cut down. That would be easy. If the NAP cuts more, we have a right to know.

-The EIR claims the NAP will replant a native tree for every tree they cut down. This is woefully inadequate. Whatever the final commitment, trees planted must be logged and their survival tracked.

-Trail additions and trail closures must be tracked via the trail maps contained in the SNRAMP. We do not want our trails to secretly disappear.

-Is the program accomplishing anything? Are any of the "restored" areas actually able to survive on their own? A sustainable plan should actually be able to reduce maintenance to promote ecology. If perpetual human intervention is required, the program should be scaled back to reduce the environmental damage and spend the money on something that produces a benefit.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Bruce Wolfe', enclosed within a hand-drawn oval.

Bruce Wolfe, M.S.W, President

Subject: EIR DOES NOT identify the impacts of SNRAMP implementation, mitigation needed
Date: Thursday, February 23, 2017 10:29:17 AM

Attention SF Board of Supervisors:	There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:
1. Public access restrictions:	Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.
2. Increase in greenhouse gases:	You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.
3. Increase in herbicides:	The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.
4. CEQA process violations:	The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.
5. Trail closures:	The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.
6. No required tree replacement in Project area:	The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.
7. Project implementation before EIR violates CEQA:	The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.
8. Bicyclists singled out:	The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.
9. Impact of fencing ignored:	The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.
10. Evidence of bias:	Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

I will be affected by and am especially concerned about changes planned to Mt Davidson and Glen Canyon, but I believe changes planned from this report are not in the best interests of the whole city.

**Attention SF
Board of
Supervisors:**

There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:

**1. Public access
restrictions:**

Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.

**2. Increase in
greenhouse
gases:**

You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.

**3. Increase in
herbicides:**

The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.

**4. CEQA
process
violations:**

The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.

**5. Trail
closures:**

The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.

**6. No required
tree
replacement in
Project area:**

The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.

**7. Project
implementation
before EIR
violates
CEQA:**

The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.

**8. Bicyclists
singled out:**

The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.

**9. Impact of
fencing
ignored:**

The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.

**10. Evidence of
bias:**

Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

Dear John and Brent,

The following four organizations have sent letters of endorsement of our Appeal that should be included in the packet being created tomorrow and Friday for the supervisors.

Thank you for your all your assistance!

Cordially,

Dee Seligman
San Francisco Forest Alliance
H: 415-668-6308

Resolution Calling for the Removal of Forested Areas from NAP and Implementation of the Maintenance Alternative for the Program

WHEREAS, The Natural Areas Program (NAP) of the San Francisco Recreation and Park Department intends to remove existing habitat on one-quarter of the City's parkland and replace it with native plants (arbitrarily defined as those here before European colonization); and

WHEREAS, The proposed Management Plan for NAP has been undergoing an Environmental Impact Review, which is likely to come before the Planning Commission for certification sometime in December 2016 or after the first of the next year; and

WHEREAS, The Recreation and Park Commission intends to hold a session to officially accept the NAP Management Plan on the same day that the Planning Commission certifies the NAP EIR; and

WHEREAS, After hearing presentations by Recreation and Park Department staff supporting NAP and the San Francisco Forest Alliance opposing it at its May 21, 2012 meeting, the West of Twin Peaks Central Council (WTPCC) voted to submit a letter opposing NAP to the Planning Commission on June 4, 2012 as part of public comment on the NAP Draft EIR; and

WHEREAS, That letter expressed WTPCC's concerns about NAP's plans to cut down 18,500 trees in parks controlled by the SF Recreation and Park Department, including removing 1,600 trees on Mt. Davidson, as well as our concerns about NAP's repeated applications of toxic herbicides to keep non-native plants from growing back, as well as our concerns about the loss of access to large areas of our neighborhood parks and the closure of 9.2 miles of trails; and

WHEREAS, That letter also called on the Recreation and Park Commission to rethink its support of NAP; and

WHEREAS, Appendix F of the NAP Management Plan, which gives details of the NAP Management Plan's urban forestry plans, refers to existing trees in parks like Mt. Davidson as "invasive," adding: "The long-term goal of urban forest management in MA-1 and MA-2 areas [which compromise most of NAP's areas] is to slowly convert those areas to native scrub, and grassland habitats or oak woodlands" (p. F-1); and

WHEREAS, The Miraloma Park Improvement Club, a member organization, sent a letter to Mayor Edwin Lee on January 27, 2014, opposing any expansion of NAP on Mt. Davidson, and in particular, calling for management of the forested areas of Mt. Davidson be removed from NAP's control and returned to the control and maintenance of the Recreation and Park Department's Forestry Division; and

WHEREAS, The MPIC letter also opposed implementation of the NAP General Management Plan as written and supported the implementation of the Maintenance Alternative identified in the NAP EIR, an alternative that allows NAP to continue to manage native habitat that has already been created, but does not support any additional destruction of existing habitat for replacement with native plants; and

WHEREAS, UC Berkeley Professor of Urban Forestry Joe McBride, sent a letter to Recreation and Park General Manager Phil Ginsburg on June 29, 2013, stating that, “I conclude that the Significant Natural Resource Areas Management Plan for the removal and thinning of different portions of the eucalyptus plantation on Mt. Davidson is not justified”; now, therefore be it

RESOLVED, That, the West of Twin Peaks Central Council urges the Mayor, the General Manager of the SF Recreation and Park Department, the Board of Supervisors, the Planning Commission, and the Recreation and Park Commission to remove all forested areas such as at those in Sharp Park, and, in particular, the forested areas of Mt. Davidson, from NAP control and give management control of forested areas to the Recreation and Park Department’s Forestry Division’s trained arborists for routine maintenance, and prohibit the removal of any trees in NAP-managed areas except for reasons of hazard abatement or construction of buildings (but not habitat restoration); and, be it

FURTHER RESOLVED, That the West of Twin Peaks Central Council urges the Mayor, the General Manager of the SF Recreation and Park Department, the Board of Supervisors, the Planning Commission, and the Recreation and Park Commission to restrict NAP to implementing only the Maintenance Alternative identified in the EIR; and, be it

FURTHER RESOLVED, That the West of Twin Peaks Central Council urges the Mayor, the General Manager of the SF Recreation and Park Department, the Board of Supervisors, the Planning Commission, and the Recreation and Park Commission to prohibit all Tier 1 and Tier 2 [the most toxic] herbicide use by NAP to ensure public safety in all park areas.

Golden Gate Heights Neighborhood Association
P.O. Box 27608
San Francisco, CA 94127

February 20, 2017

San Francisco Board of Supervisors
1 Dr. Carlton B. Goodlett Place
City Hall, Room 244
San Francisco, CA 94102

Dear Supervisors,

The Golden Gate Heights Neighborhood Association (GGHNA) represents over 400 households in the Golden Gate Heights Neighborhood of San Francisco (bounded by 19th Avenue, Santiago St, 9th Ave, and Kirkham St.). Our neighborhood is composed of primarily single-family homes (mostly homeowners, not renters) densely packed together. We have four parks in our neighborhood, all with natural areas in them – Grandview and Golden Gate Heights Parks, Hawk Hill, and the Rock Outcrop. In every park in our neighborhood except Golden Gate Heights Park, the Natural Areas Program (NAP) controls 100% of the park. All of the natural areas in the parks in our neighborhood are located on steep slopes. It's not just our neighborhood that will see major impacts from NAP. Fully one-third of all RPD land, including Sharp Park, falls under the Natural Areas Program's control.

In 2011, GGHNA submitted a comment on the Draft EIR for NAP that outlined our primary concerns with the Program: 1) impacts from drifting sand due to the parks' slopes and the removal of non-native plants that hold the sand in place; 2) impacts from NAP tree management, especially tree removals and "limbing" proposed at Grandview Park; 3) impacts from introducing sensitive species into natural areas, especially impacts on adjacent private property; and 4) impacts from poor maintenance of NAP areas. None of our concerns were adequately addressed in the NAP EIR.

For example, the response to our maintenance concern – that NAP staff do maintenance in parks every day – completely missed our point that the Program schedules less than one maintenance day per month in half of the natural areas. This lack of repeated, continual maintenance results in dead plants, ugly brush piles, and an aesthetic eyesore rather than an inviting neighborhood park. Saying that NAP staff work on maintenance somewhere each day is not an adequate response to the concern we expressed in our comment.

In our comment, GGHNA also asked that "scattered, open sand" be removed as a criterion for the natural areas in our neighborhood. In 2006, a home on 14th Avenue was red-tagged after a major landslide smashed into it. The house was immediately adjacent to the Rock Outcrop where non-native iceplant had recently been removed. At a neighborhood association meeting several years ago, homeowners who live adjacent to Grandview Park complained about damage to their backyards from sand that had drifted in from the park after iceplant was removed. NAP staff responded that they had no "legal" responsibility for damage that occurred outside the park. This is why we asked that "scattered, open sand" be removed from our neighborhood parks. Our concerns about "scattered, open sand" were not addressed in the EIR.

GGHNA is also concerned about the inadequate and incorrect analyses of greenhouse gas emissions from the removal of 18,500 trees and thousands more saplings, and from an inadequate analysis of the increased use of herbicides needed to keep all those removed trees and saplings from re-sprouting.

GGHNA therefore supports the San Francisco Forest Alliance's appeal of the certification of the NAP EIR. GGHNA asks that you send the EIR back to the Planning Department to address the concerns raised by our association and by the Forest Alliance. These issues are too important and the scale of land controlled by NAP too large for any controversy about the NAP EIR to be accepted. Please de-certify the NAP EIR and send it back to Planning so that all these issues can be adequately, accurately, and impartially addressed.

Sincerely,

Carla Kozak
Secretary, Golden Gate Heights Neighborhood Association

February 9, 2017

San Francisco Board of Supervisors
1 Dr. Carlton B. Goodlett Place
City Hall, Room 244
San Francisco, CA 94102

Dear San Francisco Board of Supervisors,

The Center for Environmental Health (CEH) protects children and families from dangerous chemicals in the air, food, and water by working with communities, consumers, workers, government, and the private sector to demand and support practices that are safe for public health and the environment. CEH is concerned that cutting down over 18,000 trees without adequate replacement per the Natural Resource Areas Plan will hurt human and environmental health by worsening air pollution.

The Environmental Impact Report (EIR) for the Significant Natural Resource Areas Management Plan states that the deforestation "would result in significant unavoidable air quality impacts as a result of exceeding the BAAQMD thresholds for NO_x pollutant emissions." (EIR pages 438-440). It concludes that "cumulative impacts associated with criteria air pollutants would be significant and unavoidable."

CEH urges the SF Board of Supervisors to please send the EIR back to the SF Planning Department for further air quality mitigation measures.

Thank you for your help and consideration.

Sincerely,

Michael Green
Chief Executive Officer
Center for Environmental Health

February 14, 2017

San Francisco Board of Supervisors
1 Dr. Carlton B. Goodlett Place
City Hall, Room 244
San Francisco, CA 94102

Dear SF Board of Supervisors,

Stand.earth, formerly ForestEthics, is a leading environmental organization based in San Francisco.

We are concerned that the Natural Resource Areas Management Plan will create climate change because it fells over 18,000 large trees without adequate replacement.

The Environmental Impact Report for the plan contains math errors, incorrect assumptions, and outdated science. For example, the Greenhouse Gas calculations confuse rates with stocks, assume that 90% of the existing trees are not absorbing carbon, and presume that all new trees will survive. The tree replacement rate for the entire plan is only 0.19. Correcting these problems in accordance with best available science shows that the Natural Resource Areas Management Plan creates significant Greenhouse Gas Emissions for the San Francisco Bay Area that must be mitigated.

Please refer the EIR back to the Planning Department so that it can provide an accurate picture of Greenhouse Gas Emissions under the California Environmental Quality Act and include further mitigation for the environmental harm to climate and public health. Please ensure that the City of San Francisco continues to be a global leader in the fight for climate resilience.

Thank you for your help and consideration.

Sincerely,

Subject: EIR DOES NOT identify the impacts of SNRAMP implementation, mitigation needed
Date: Wednesday, February 22, 2017 4:17:38 PM

Attention SF Board of Supervisors:	There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:
1. Public access restrictions:	Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.
2. Increase in greenhouse gases:	You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.
3. Increase in herbicides:	The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.
4. CEQA process violations:	The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.
5. Trail closures:	The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.
6. No required tree replacement in Project area:	The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.
7. Project implementation before EIR violates CEQA:	The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.
8. Bicyclists singled out:	The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.
9. Impact of fencing ignored:	The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.
10. Evidence of bias:	Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

Subject: Rescind Certification of EIR for SNRAMP: it is a "whitewash"
Date: Wednesday, February 22, 2017 4:03:37 PM

**Attention SF
Board of
Supervisors:**

The EIR for the SNRAMP is a "whitewash" From wikipedia: To whitewash is a metaphor meaning "to gloss over or cover up vices, crimes or scandals or to exonerate by means of a perfunctory investigation or through biased presentation of data"

Fact 1:

You cannot cut down 18,500 trees and "replace" them with grass and shrubs without a huge release of greenhouse gas and a loss of future carbon sequestration.

Fact 2:

You cannot close 28% of our City's parkland to public access and claim there is no impact on our recreation.

Fact 3:

You cannot say implementing a plan that is totally dependent on herbicides will not increase herbicide spraying in our parks.

Fact 4:

You cannot ban bicycles from 1/3 of our park areas and say there is no impact on bicyclists.

Fact 5:

Yet this is what the EIR claims.

Conclusion:

Reject the certification of the EIR and send it back to Planning for an honest evaluation of the impacts of the SNRAMP. While that is happening, halt RPD's premature implementation of the Plan.

I lived in the Bay Area for 30 years and am getting ready to return after coming back to care for elderly parents. These kinds of issues concern me, especially since they would never have been even considered during the years I lived there. Please, for the love of all that is holy and special about SF and the Bay Area, do not implement this! Thank you.

Subject: Rescind Certification of EIR for SNRAMP: it is a "whitewash"
Date: Monday, February 20, 2017 3:41:58 PM

**Attention SF
Board of
Supervisors:**

In these politically unstable times, when federal funding of sanctuary cities is threatened, is it really the wisest choice of finances to cut down perfectly HEALTHY trees to cater to a FEW people who want to see San Francisco restored to pre-colonial contact sand dunes??? This is completely unreasonable and highly IRRESPONSIBLE on your part if you let this happen on your watch! Why not focus time and resources to remove DEAD pine trees in the parks and natural areas, as there are plenty due to drought and bark beetle infestation. Removing dead trees that actually pose a threat to park visitors makes sense! Removing healthy trees at great expense and then having to use ridiculous amounts of toxic herbicide after the fact does NOT. Be financially prudent and ecologically safe, Supervisors!!!

- Fact 1:** You cannot cut down 18,500 trees and "replace" them with grass and shrubs without a huge release of greenhouse gas and a loss of future carbon sequestration.
- Fact 2:** You cannot close 28% of our City's parkland to public access and claim there is no impact on our recreation.

7. Project implementation before EIR violates CEQA:

The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.

8. Bicyclists singled out:

The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.

9. Impact of fencing ignored:

The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.

10. Evidence of bias:

Bias in the EIR is demonstrated by the inclusion of "alternate facts", such as the explanation for the bench removal at Mt. Davidson and the Glen Canyon Miraloma trail closure.

Signed:

I am particularly concerned about plans to ruin trees and use pesticides in the Mt. Davidson area. It is ridiculous. Spending money to risk residents' safety and quality of life is insane. We live here because the forest exists. It provides safety from landslides and fire, and wind. Pesticide use is already affecting the people who live in the neighborhood. Please stop.

Subject: EIR DOES NOT identify the impacts of SNRAMP implementation, mitigation needed
Date: Monday, February 20, 2017 4:00:35 PM

Attention SF Board of Supervisors:

There are procedural violations of CEQA and SF Admin code involved in bringing the EIR from DEIR to FEIR. There is a question whether the EIR properly identifies the impacts of SNRAMP implementation. Here are 10 issues I am concerned about:

1. Public access restrictions:

Public access will be confined to on-trail only, or less than 5% of the access we currently enjoy. The EIR does not identify this impact.

2. Increase in greenhouse gases:

You do not have to be a scientist to realize that cutting down 18,448 trees and replacing them with grass and shrubs will have the opposite effect. The EIR calculations are wrong.

3. Increase in herbicides:

The SNRAMP is dependent on the use of herbicides to kill the roots of felled trees and unwanted plants. The EIR claims the Plan will not require additional herbicide use.

4. CEQA process violations:

The process utilized by Planning violated CEQA, thereby preventing proper vetting of the EIR.

5. Trail closures:

The SNRAMP plans closure of 26% of our trails. Actually, the NAP has closed more than 50% of the trails in parks where they have executed "trail improvement" projects. This is a significant impact on public recreation the EIR fails to address.

6. No required tree replacement in Project area:

The EIR analysis of impacts on air quality, greenhouse gas emissions, aesthetics, wind and hydrology hinge on a false premise, that every tree removed in the Project area would be replaced with a new tree somewhere in the Project area.

7. Project implementation before EIR violates CEQA:

The EIR claims the SNRAMP is not being implemented ahead of the EIR certification. Yet, we have already had our trails closed and fences strewn across our parks.

8. Bicyclists singled out:

The EIR claims, "The SNRAMP does not single out bicyclists as a concern and does not include actions directed specifically at bicycle use." Signage installed by RPD in 2015 proves this to be false.

9. Impact of fencing ignored:

The NAP's implementation of the SNRAMP in advance of the EIR demonstrates that their use of fences will be much more extensive than what is disclosed in the SNRAMP.

Subject: Support for a Full and Separate EIR for Sharp Park, Pacifica's Environmental Family
Date: Tuesday, February 21, 2017 11:37:30 AM
Attachments: [Pacifcas Environmental Family Support for Full and Separate EIR for Sharp Park 2 2017.docx.pdf](#)

Dear Members of the San Francisco Board of Supervisors and Clerk of the Board,

Below and attached please find a request from Pacifica's Environmental Family in support of a full and separate EIR for Sharp Park versus moving forward with the project as part of the overall Natural Area Management Plan.

Thank you for your consideration.

Re: Please conduct a separate regulatory review, including CEQA environmental review, of Sharp Park.

Dear San Francisco County Board of Supervisors,

Thank you for your ongoing research and study in support of environmental stewardship. **We are writing to urge you to remove the Sharp Park Golf Course redevelopment from the Natural Resource Areas Management Plan's EIR.**

We are concerned that a multi-million dollar redevelopment plan for Sharp Park Golf Course has been inserted into the City's Natural Resource Areas Management Plan. When the scope of the Natural Resource Areas Management Plan's EIR was defined, Recreation and Park Department promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review."

Despite this promise, the golf course redevelopment project was inserted into the EIR and was not subject to mandatory public hearings or early, formal oversight by regulatory agencies. We feel strongly that this additional review is necessary to ensure protections for the endangered San Francisco Garter Snake and California Red-legged frog.

Please preserve the public trust in City government and ensure that San Francisco is making the best informed environmental decisions possible.

On February 28, please vote to remove the Sharp Park Golf Course redevelopment from the Natural Resource Areas Management Plan's EIR and ultimately authorize a separate regulatory review, including CEQA environmental review.

Sincerely,

Cindy Abbott
President, Pacifica's Environmental Family
For the Board of Directors

Re: Please conduct a separate regulatory review, including CEQA environmental review, of Sharp Park.

Dear San Francisco County Board of Supervisors,

Thank you for your ongoing research and study in support of environmental stewardship. **We are writing to urge you to remove the Sharp Park Golf Course redevelopment from the Natural Resource Areas Management Plan's EIR.**

We are concerned that a multi-million dollar redevelopment plan for Sharp Park Golf Course has been inserted into the City's Natural Resource Areas Management Plan. When the scope of the Natural Resource Areas Management Plan's EIR was defined, Recreation and Park Department promised: "Should changes to the Sharp Park Golf Course be proposed, they would undergo a separate regulatory review, including CEQA environmental review."

Despite this promise, the golf course redevelopment project was inserted into the EIR and was not subject to mandatory public hearings or early, formal oversight by regulatory agencies. We feel strongly that this additional review is necessary to ensure protections for the endangered San Francisco Garter Snake and California Red-legged frog.

Please preserve the public trust in City government and ensure that San Francisco is making the best informed environmental decisions possible.

On February 28, please vote to remove the Sharp Park Golf Course redevelopment from the Natural Resource Areas Management Plan's EIR and ultimately authorize a separate regulatory review, including CEQA environmental review.

Sincerely,

Cindy Abbott
President, Pacifica's Environmental Family
For the Board of Directors

Subject: Some District 3 history on the Sharp Park question
Date: Tuesday, February 21, 2017 10:07:38 AM

Dear Supervisor Peskin,

Please accept my belated congratulations on your election as our City Supervisor in District 3. My name is Mike Wallach, I am a 30+ year San Francisco resident, 20+ years in District 3 on Russian Hill, a Director on the Board of the 999 Summit Owners Association, an enthusiastic but bad golfer and a patron of San Francisco's historic landmark municipal public golf treasures at Lincoln, Harding, and Sharp Park.

I am writing in support of the certified EIR prepared for the Significant Natural Resource Area Management Plan developed by our San Francisco Recreation and Park Department. As you know, there is an appeal pending on this EIR, that will heard by the Board of Supervisors on February 28th. I urge you to reject the appeal, support the plan and not waste the enormous time, effort, and taxpayer funding our hard-working and environmentally committed SF RECPARK employees have invested in this plan over the last 20 years.

I have been following the Sharp Park story closely over the last 10 years, including [commentary on my blog](#), some of which has been cited by more conventional media (Example: [Nevius at the Chron](#)).

I am sure you and your staff will be looking at the issues surrounding Sharp Park carefully, and I won't belabor here the environmental and recreational issues that have already been litigated and studied ad nauseum over the years. You'll be bombarded by conflicting and inaccurate information from those who would destroy the course. They will be flogging technicalities and legal sophistry to obfuscate their objectives, but they have only one end goal. They intend to force the City to turn over to the Feds 400 acres of coastal parkland that belongs to the people of San Francisco - by any means necessary. I ask you - Do you want to risk our park being managed and controlled by Donald Trump's National Park Service?

I'll leave you with one important additional point.

This vote basically boils down to one question for you and your fellow Supervisors: ***Who do you trust?*** Do you trust our City RECPARK union employees, managers, directors and commissioners - committed environmentalists one and all - who have invested decades in time, effort and funding into forging a plan which will make our City proud? Or do you trust the representations of a small group of eco-litigators like the Wild Equity Institute and Center for Biological Diversity who have repeatedly sued the City and cost SF taxpayers millions defending against their failed lawsuits?

I am confident you will choose wisely.

Thank you for considering my views.

Regards,

Mike Wallach
999 Green St. #1501
San Francisco, Ca. 94133
415-271-4072

Addendum: Included below please find my previous correspondence with your predecessor David Chiu on this issue. Subsequent to this last exchange [Supervisor Chiu voted with the majority of the board 7-4](#) to support SF RECPARK common sense efforts to enhance the habitat while preserving the historic legacy and affordable recreational opportunities at Sharp Park.

----- Forwarded Message -----

Subject: In support of the environmentalists in our RECPARK Department and their efforts to improve the endangered frog habitat at Sharp Park

Date: Mon, 17 Mar 2014 23:08:58 -0700

From: mw

To: David Chiu <David.Chiu@sfgov.org>
CC: info@sfpublishgolf.com

Supervisor Chiu,

As President of the Board of Supervisors you have cultivated a reputation for seeking collaborative solutions, putting reasonable compromise ahead of ideology, and forging practical real world solutions for the City. In your campaign for the State Assembly, it will be even more important that you are perceived by your potential constituents as a practical problem solver rather than a doctrinaire ideologue. On March 25 you will have another opportunity to demonstrate that capacity. On the Board's calendar is an appeal by Wild Equity Institute against unanimous decisions of the RECPARK and SF Planning Commissions to approve a *Mitigated Negative Declaration* and proceed with the long delayed *Sharp Park Safety, Infrastructure, and Habitat Improvement Project*.

But I am ahead of myself. My name is Mike Wallach. I am a 30 year resident of San Francisco, live in District 3 on Russian Hill, an enthusiastic but bad golfer, and a frequent patron of the San Francisco municipal golf courses. I have corresponded with you before about Sharp Park (see below). I was very disappointed with [your December 6, 2011 vote for the John Avalos ordinance on Sharp Park](#). It was clearly intended to start the City down a path that would destroy the Sharp Park golf course and give the federal government control of 400 acres of coastal park land that belongs to the people of San Francisco. On March 25 you will have an opportunity to rectify the public perception created by that vote.

There is much I can say about this issue, but will limit myself here to one simple point. The controversy about Sharp Park is usually framed as "environmentalists" vs. "golfers". It is an easy narrative to understand, but is simply not true.

The controversy surrounding Sharp Park is more accurately understood in terms of being about "environmentalists" vs. "environmentalists". On the one hand we have practical problem solving environmentalists and conservationists like the dedicated and hard working employees of San Francisco Rec & Park who have the best interest of the Sharp Park wildlife at heart. They want nothing more than to move ahead with improving the managed habitat on which these creatures depend. But they have been blocked by ideologically motivated environmental litigation specialists like the Wild Equity Institute for whom the frog and snake are simply a means to an end. Their end goal, their only goal, is to destroy the legacy Alister MacKenzie course and force the people of San Francisco, by any means necessary, to give up control of a beautiful 400 acre coastal park that belongs to the people of San Francisco.

We've had golf course operations at Sharp Park for 80 years. The golf course created the fresh water habitat at Laguna Salada for the California Red Legged Frog to thrive. It is a managed habitat, and it is our responsibility to continue to manage it and improve it. The most important aspect of the plan in question on March 25 is that it will take necessary steps to improve the habitat for both the endangered frog and snake. This is what we've learned during this controversy, this is what the scientists who know the most about the frog and snake at Sharp Park have told the Board of Supervisors over the past several years. For example - this is from a [presentation by Karen Swaim to the San Francisco Government Audit and Oversight Committee in December 2009](#). Karen Swaim is a field biologist who has worked for over 20 years with the frog and snake habitat at Sharp and Mori Point. She is still regarded as a local expert by all state, local, and federal agencies with an interest in survival of the species. Here is what she said:

"Golf is not what is responsible for the decline of the San Francisco garter snake... the frogs are prolific west of highway one, they are not in any trouble at all west of highway one... You need to protect the sea wall. You need to have a fresh water managed habitat currently for this species to recover it, and that is all there is to it."

Her opinion was confirmed in Federal Court last year when WEI tried to secure a preliminary injunction to stop golf operations at Sharp Park. After hearing the arguments, this is what [Judge Susan Ilston found in her ruling denying the WEI plaintiffs](#) a preliminary injunction and ultimately dismissing their lawsuit:

"Experts for both sides agree that the overall Frog population has increased over the last 20 years.. Neither side disputes that the number of egg masses found last winter in Sharp Park was the highest ever recorded... Plaintiffs have failed to meet their burden of showing irreparable harm to

the California Red Legged Frog or the San Francisco Garter Snake absent the issuance of a preliminary injunction on defendants' activities at Sharp Park. Accordingly, the motion for a preliminary injunction is DENIED."

Do not be distracted by the baseless claims of the Wild Equity Institute lawyers. Let's move forward and start a process which will improve the managed habitat for the frog and snake at Sharp Park, and incidentally also for the golfers. Thank you.

Sincerely,

Mike Wallach

COMMENTS:David, As my representative on the Board of Supervisors, I am writing to ask your support for continuing Sharp Park as a golf course, as

outlined by the recently released report from the Dept of Parks and Recreation. This course is used by many retirees in your district as well as young people of all cultures across the bay area. It is a unique landmark course that with a little love could be an enormous draw for San Francisco. Please join with your fellow supervisor Sean Elsbernd, Pacifica Mayor Julie Lancelle, Congresswoman Jackie Speier, State Assembly Whip Fiona Ma, Assemblyman Jerry Hill, San Mateo County Supervisors Carole Groom and Adrienne Tissier, and San Francisco City Attorney Dennis Herrera in support of Sharp Park Golf. Unfortunately Ross Mirakimi has put The City in a position of being intimidated by a well funded group of out of state eco-extremists who brag about intimidating municipalities with lawsuits (The Center for Biological Diversity). They have no interest in finding common ground between the recreational interests of your constituents and the wildlife. Only destroying the course will satisfy them, which makes a lawsuit inevitable. We have a lot of problems in The City, but a shortage of top drawer legal talent is not among them. We need to stand up to these bullies and do what is right for the residents of San Francisco and Pacifica. - Mike Wallach

Subject: reject any SNRAMP that includes golf course redevelopment
Date: Monday, February 20, 2017 2:41:33 PM

Dear San Francisco Board of Supervisors:

I am writing to urge you to reject the Final Environmental Impact Report (FEIR) for the proposed Significant Natural Resource Areas Management Plan (SNRAMP), unless and until the Sharp Park Golf Course redevelopment is removed from the plan. The vast majority of California's wetlands have been drained, degraded and destroyed. Sharp Park is home to federally protected, endangered California Red-Legged Frogs (*Rana draytonii*), California's official state amphibian. The Board of Supervisors should work to protect, rather than to kill, harm and harass these frogs, which is what happens when the City pumps the Sharp Park Wetlands out to sea, causing the frogs' egg masses to be stranded on dry land. I wholeheartedly oppose any usage of taxpayer funds that results in the destruction of rare wetland ecosystems or the degradation of important wildlife habitat. Using taxpayer dollars to drain wetlands for non-essential purposes is thoroughly unethical. As such, I again request that you not approve any version of a Significant Natural Resource Areas Management Plan that condones or funds such activities. Please see www.savethefrogs.com/sharp-park for more info, and remember that there are over 1,000 other golf courses in California.

Subject: REJECT Significant Natural Resource Areas Plan or SEVER Sharp Park Golf Course Redevelopment
Date: Friday, February 17, 2017 12:18:01 PM

Esteemed Supervisors:

The purpose of this communication is to advise you to reject the Significant Natural Resource Areas Management Plan as it is proposed. This Plan relies upon oversight by the San Francisco Recreation and Parks Department. The Department's management, at present, has a track record of wasteful overspending of taxpayer money, interlocks with privatization interests, and proven disinterest in responsible stewardship of our environmental resources.

Profit over planet is poor decision-making. I would encourage you to, at the very least, recommend severing the Sharp Park Golf Course redevelopment from the SNRAMP. The Sharp Park Golf Course redevelopment plan will have a significant and irreversible impact on an environmentally sensitive area in and around the Coastal Zone. Both the California Red-Legged Frog and the City's namesake San Francisco Garter Snake, both listed under the Endangered Species Act, will be further threatened, extirpated, or suffer extinction. No public servant should have species extinction on their record.

In similar Coastal Zone projects, SFRPD has shown disregard for contractual obligations stipulated by FEIR. There is no reason to assume that the Sharp Park Golf project would be any different.

Further, residents of an adjacent apartment complex have suffered displacement as their homes have been renovated and, as rents have subsequently nearly doubled due to those renovations, they have been forced out by increased housing costs. Remaining tenants live with the the threat that they might be next.

In addition, the Carlyle Group has invested in coastal property also adjacent to the golf course. They stand to benefit substantially from the City's investments in Sharp Park. It is now an open secret that SFRPD's donors, who have become the proprietors of our parks, are well-invested in real-estate.

That an elite few should rule over the interests of many-many of whom are your constituents, is bad governance.

It would be still worse governance, if monetization of property in the public trust were to outweigh the naturally occurring complex interrelationships between living things which yield diversity, beauty, aesthetic appreciation, and grace.

Reject the SNRAMP. As a compromise, take golf course redevelopment out of it.

Sincerely,
Mike Murphy
Director, San Francisco Watershed Protection Alliance
Resident, Outer Sunset District

Re: Support Natural Areas Program and Golf at Sharp Park
Urge Supervisors to deny appeal of Natural Areas Final EIR
Case No. 2005.0912E
Hearing: Feb. 28, 2017

Dear Supervisors,

I support the Planning Commission's approval of the Final EIR for the Rec & Park Department's Natural Areas Plan, which includes habitat recovery for frogs and snakes, while maintaining the historic 18-hole Sharp Park Golf Course.

Please deny the appeals from the Commission's decision.

I am an avid golfer but more importantly an avid environmentalist. We have a tremendous community asset in Sharp Park Golf Course, and I want to assure that it will continue to have this as a resource and recreation area for generations to come.

I urge your commissions to approve the Final EIR for Rec & Park's Natural Areas Program, which includes the department's balanced plan to save the beautiful and historic 18-hole Sharp Park Golf Course, while recovering frog and snake habitat in the wetlands.

Sharp Park Golf Course, "the poor man's Pebble Beach," is one of San Francisco's great public recreation spaces and architectural treasures. It is designated a Historical Resource Property under CEQA, a City of Pacifica Historical Site, and one of the 50 "Best Municipal Courses" in America by Golfweek Magazine. It is friendly, beautiful, and reasonably-priced, and was built in 1932 by history's greatest golf architect, Alister MacKenzie. It is a true melting pot: the golfers are a diverse collection of men, women, seniors, juniors and students, including all categories of age, gender, race, and social class.

Anti-golf activists have tried for years to close the golf course and to obstruct and delay Rec & Park's Sharp Park Plan. Their current call to "sever" Sharp Park from the Natural Areas Final EIR is their latest tactic. A virtually identical effort to "sever" Sharp Park from the EIR failed at the Board of Supervisors in December, 2012. To sever Sharp Park at this point – after years of work, countless public hearings, and millions of dollars of staff time, consultants, and

public expenditure (including the \$10 Million Pacifica Recycled Water Project, completed in 2012, which provides recycled irrigation water to the golf course), would be an extravagant, ridiculous waste of public time, money, and effort.

On at least a dozen occasions over the past several years, numerous public agencies and courts have rejected attempts to delay and hinder Rec & Park's Sharp Park Plan. Among them the San Francisco Rec & Park Commission, Parks, Recreation and Open Space Advisory Committee (PROSAC), Planning Commission, Public Utilities Commission, Mayor's Office, the US Fish & Wildlife Service, Army Corps of Engineers, California Regional Water Quality Control Board, California Coastal Commission, San Francisco Superior Court, San Mateo County Superior Court, US District Court for the Northern District of California, and the Ninth Circuit US Court of Appeals. In their decisions, all of these local, state, and federal agencies and courts have rejected similar arguments by the same golf opponents who now ask you to "sever" Sharp Park from the Natural Areas Final EIR.

Please reject the arguments to sever Sharp Park. Please approve the Natural Areas Final EIR, and approve the Natural Areas Plan.

Thank you for your service to the community and for considering my request.

Jim Williams

Subject: Appeal of California Environmental Quality Act (CEQA) Certification of Final Environmental Impact Report - Significant Natural Resource Areas Management Plan

Dear Ms. Seligman, Ms. Bose, Mr. Borden, and Mr. Plater:

The Office of the Clerk of the Board is in receipt of memoranda dated January 10, 2017, and January 20, 2017, from the Planning Department regarding their determinations on the timeliness and standing of your filings of appeal of the California Environmental Quality Act certification of the Final Environmental Impact Report for the proposed Significant Natural Resource Areas Management Plan.

The Planning Department has determined that both appeals were filed in a timely manner and have standing with the exception of Save the Frogs!, whom did not submit comments on the Draft EIR. See the attached memorandum from the Planning Department for more information.

The appeal filing period closed on Monday, January 17, 2016. Pursuant to Administrative Code, Section 31.16, a hearing date has been scheduled for **Tuesday, February 28, 2017, at 3:00 p.m.**, at the Board of Supervisors meeting to be held in City Hall, 1 Dr. Carlton B. Goodlett Place, Legislative Chamber, Room 250, San Francisco, CA 94102.

Continues on next page

Please provide to the Clerk's Office by noon:

20 days prior to the hearing: names and addresses of interested parties to be notified of the hearing, in spreadsheet format; and

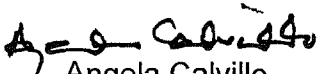

11 days prior to the hearing: any documentation which you may want available to the Board members prior to the hearing.

For the above, the Clerk's office requests one electronic file (sent to bos.legislation@sfgov.org) and two copies of the documentation for distribution.

NOTE: If electronic versions of the documentation are not available, please submit 18 hard copies of the materials to the Clerk's Office for distribution. If you are unable to make the deadlines prescribed above, it is your responsibility to ensure that all parties receive copies of the materials.

If you have any questions, please feel free to contact Legislative Clerks John Carroll at (415) 554-4445, Brent Jalipa at (415) 554-7712, or Lisa Lew at (415) 554-7718.

NOTICE OF PUBLIC HEARING

BOARD OF SUPERVISORS OF THE CITY AND COUNTY OF SAN FRANCISCO

NOTICE IS HEREBY GIVEN THAT the Board of Supervisors of the City and County of San Francisco will hold a public hearing to consider the following appeal and said public hearing will be held as follows, at which time all interested parties may attend and be heard:

Date: Tuesday, February 28, 2017

Time: 3:00 p.m.

Location: Legislative Chamber, City Hall, Room 250
1 Dr. Carlton B. Goodlett, Place, San Francisco, CA

Subject: **File No. 170044.** Hearing of persons interested in or objecting to the certification of a Final Environmental Impact Report for the proposed Significant Natural Resource Areas Management Plan identified in Planning Case No. 2005.0912E, issued by the Planning Commission through Motion No. 19825 dated December 15, 2016. (Appellants: Dee Seligman, Rupa Bose, and Tom Borden, on behalf of the San Francisco Forest Alliance, and Brent Plater of Wild Equity Institute, on behalf of the Sierra Club's San Francisco Bay Chapter, the National Parks Conservation Association, the Golden Gate Audubon Society, and the Sequoia Audubon Society) (Filed January 5, and January 17, 2017)

In accordance with Administrative Code, Section 67.7-1, persons who are unable to attend the hearing on this matter may submit written comments prior to the time the hearing begins. These comments will be made as part of the official public record in this matter and shall be brought to the attention of the Board of Supervisors. Written comments should be addressed to Angela Calvillo, Clerk of the Board, City Hall, 1 Dr. Carlton B. Goodlett Place, Room 244, San Francisco, CA, 94102. Information relating to this matter is available in the Office of the Clerk of the Board and agenda information relating to this matter will be available for public review on Friday, February 24, 2017.

SAN FRANCISCO PLANNING DEPARTMENT

MEMO

DATE: January 10, 2017
TO: Angela Calvillo, Clerk of the Board of Supervisors
FROM: Lisa Gibson, Acting Environmental Review Officer *LG*
RE: Appeal Timeliness Determination – Natural Resources
Management Plan, Planning Department Case No. 2005.0912E

1650 Mission St.
Suite 400
San Francisco,
CA 94103-2479

Reception:
415.558.6378

Fax:
415.558.6409

Planning
Information:
415.558.6377

An appeal of the Certification of the Final Environmental Impact Report (FEIR) for the Natural Resources Management Plan (formerly the Significant Natural Resources Area Management Plan), Planning Department Case No. 2005.0912E, was filed with the Office of the Clerk of the Board of Supervisors on January 5, 2017 by the San Francisco Forest Alliance (Appellant). As explained below, the Planning Department finds the appeal to be timely filed.

Date of FEIR Certification	30 Days after FEIR Certification	Appeal Deadline (Must Be Day Clerk of Board's Office Is Open)	Date of Appeal Filing	Timely?
December 15, 2016	Saturday, January 14, 2017	Tuesday, January 17, 2017	January 5, 2017	Yes

Timeline: On August 31, 2011, the Planning Department published the Draft Environmental Impact Report (DEIR) for the Natural Resources Management Plan (NRMP) with a public review and comment period from August 11, 2011 through October 31, 2011. On October 6, 2011, the Planning Commission held a duly advertised public hearing on the DEIR. On April 27, 2012, the Planning Department opened a second public review and comment period which ran from April 27, 2012 through June 11, 2012. The Responses to Comments document was issued on November 16, 2016. On December 15, 2016, the Planning Commission held a duly noticed hearing to consider certification of the Natural Resources Management Plan Final EIR (NRMP FEIR). The Planning Commission certified the NRMP FEIR on December 15, 2016.

Appeal Deadline: Section 31.16(a) and (c) of the San Francisco Administrative Code states that any person or entity that has submitted comments to the Planning Commission or the Environmental Review Officer on a DEIR, either in writing during the public review period, or orally or in writing at a public hearing on the EIR, may appeal the Planning Commission's certification of the FEIR up to 30 days after the certification of FEIR. The 30th day after the certification of the FEIR is Saturday, January 14, 2017. The next date when the Office of the Clerk of the Board is open is Tuesday, January 17, 2017 (Appeal Deadline).

Memo

Appeal Filing and Timeliness: The Appellant had submitted written comments on the DEIR and therefore the Appellant has standing to appeal the certification of the FEIR.¹ The Appellant filed the appeal of the FEIR on January 5, 2017, prior to the Appeal Deadline and therefore the appeal is considered timely.

¹ The San Francisco Forest Alliance had submitted written comments on the DEIR, albeit under the name of a different President.
