

BOARD of SUPERVISORS

City Hall
1 Dr. Carlton B. Goodlett Place, Room 244
San Francisco 94102-4689
Tel. No. 554-5184
Fax No. 554-5163
TDD/TTY No. 554-5227

MEMORANDUM

TO: Naomi Kelly, City Administrator, Office of the City Administrator
Barbara A. Garcia, Director, Department of Public Health
Deborah Raphael, Director, Department of the Environment
John Rahaim, Director, Planning Department

FROM: Erica Major, Assistant Clerk, Public Safety and Neighborhood Services
Committee, Board of Supervisors

DATE: July 3, 2017

SUBJECT: SUBSTITUTE LEGISLATION INTRODUCED

The Board of Supervisors' Public Safety and Neighborhood Services Committee has received the following substitute legislation, introduced by Supervisor Sheehy on June 27, 2017:

File No. 170763

Ordinance amending the Environment Code to require certain retailers of raw meat and poultry to report the use of antibiotics in such products to the Department of the Environment, and require City departments to report the use of antibiotics in raw meat and poultry purchased by the City to the Department of the Environment.

If you have any comments or reports to be included with the file, please forward them to me at the Board of Supervisors, City Hall, Room 244, 1 Dr. Carlton B. Goodlett Place, San Francisco, CA 94102.

c: Lynn Khaw, Office of the City Administrator
Greg Wagner, Department of Public Health
Colleen Chawla, Department of Public Health
Guillermo Rodriguez, Department of the Environment
AnMarie Rodgers, Planning Department
Aaron Starr, Planning Department

1 [Environment Code - Antibiotic Use in Food Animals]

2
3 **Ordinance amending the Environment Code to require certain retailers of raw meat**
4 **and poultry to report the use of antibiotics in such products to the Department of the**
5 **Environment, and require City departments to report the use of antibiotics in raw meat**
6 **and poultry purchased by the City to the Department of the Environment.**

7 NOTE: **Unchanged Code text and uncodified text** are in plain Arial font.
8 **Additions to Codes** are in *single-underline italics Times New Roman font*.
9 **Deletions to Codes** are in *strikethrough italics Times New Roman font*.
10 **Board amendment additions** are in double-underlined Arial font.
11 **Board amendment deletions** are in ~~strikethrough Arial font~~.
12 **Asterisks (* * * *)** indicate the omission of unchanged Code
13 subsections or parts of tables.

14 Be it ordained by the People of the City and County of San Francisco:

15 Section 1. The Environment Code is hereby amended by adding Chapter 27, entitled
16 "Antibiotic Use in Food Animals," consisting of Sections 2701 through 2709, to read as
17 follows:

18 **CHAPTER 27: ANTIBIOTIC USE IN FOOD ANIMALS**

19 **SEC. 2701. FINDINGS.**

20 *(a) The overuse of antibiotics, also known as antimicrobial drugs, in human medicine and in*
21 *meat and poultry production poses a pressing environmental and public health threat by allowing*
22 *antibiotic-resistant bacteria to multiply and spread. In 2013, the Centers for Disease Prevention and*
23 *Control ("CDC") identified antibiotic resistance as one of the top five health threats facing the country*
24 *in the near future.*

25 *(b) In a 2013 report on antibiotic resistance threats in the United States, the CDC estimated*
that every year at least 2 million people contract antibiotic-resistant infections, and at least 23,000

1 people die as a result of these infections. Some researchers have estimated these infections cost the
2 United States as much as \$55 billion annually due to excess healthcare costs and lost productivity.

3 (c) Increasingly, antibiotic-resistant bacteria are leading to infections that can be difficult to
4 treat, require longer and more expensive hospital stays, and are more likely to be fatal than non-
5 resistant bacterial infections. Without effective antibiotics, procedures such as chemotherapy,
6 dialysis, and many surgeries become much riskier for patients because of the high risk of bacterial
7 infections associated with these procedures.

8 (d) While improper use of antibiotics in the healthcare sector is a contributing factor,
9 organizations such as CDC, the Food and Drug Administration ("FDA") and the World Health
10 Organization ("WHO") recognize that the overuse and misuse of antibiotics in food animals is a
11 major source of the antibiotic-resistant bacteria that affect humans. In a 2015 American Academy of
12 Pediatrics ("AAP") technical report, the authors stated that the "use of antimicrobial agents in
13 agriculture can harm public health, including child health, through the promotion of resistance."

14 (e) Scientists recognize a growing "reservoir" of antibiotic resistance in our communities and
15 environment. A significant portion of antibiotics administered to livestock are excreted in urine and
16 manure, which are then spread as fertilizer on agricultural land. From there, antibiotics can run off
17 into waterways and spread in other ways through the environment. This can lead to the proliferation
18 and spread of resistant bacteria.

19 (f) Antibiotic-resistant bacteria have been found in drinking water near livestock facilities, in
20 the top soil of dairies, and in the air downwind from industrial swine facilities and cattle feedlots. In
21 addition to traveling off farms in water, air, and soil, antibiotic-resistant bacteria can be found on
22 fruits and vegetables where manure has been applied to crops. Furthermore, insects and rats can
23 carry resistant bacteria away from farms. Workers can also unwittingly carry antibiotic-resistant
24 bacteria from livestock production facilities or processing plants into their communities. Antibiotic-
25 resistant bacteria can pass their resistant genes on to other bacteria. This allows some bacteria,

1 including bacteria in the human gut, to become resistant to antibiotics that they have never
2 encountered. Several recent studies indicate that living near livestock operations or near fields
3 treated with manure can increase individuals' risk of contracting antibiotic-resistant infections or
4 being colonized by antibiotic-resistant bacteria.

5 (g) In addition, scientists and governmental agencies routinely find antibiotic-resistant
6 bacteria on animals at slaughter and on raw meat in grocery stores. In 12 years of testing through the
7 National Antimicrobial Resistance Monitoring System ("NARMS"), the FDA has identified
8 antibiotic-resistant bacteria that can cause illness on retail pork, chicken, ground beef, and ground
9 turkey every year. For example, in the most recent reported testing in 2012, 33% of Salmonella, 60%
10 of Enterococcus faecium, 30% of E. coli and, 11% of Campylobacter coli found in chicken were
11 multidrug resistant (resistant to at least three antibiotic classes). WHO and CDC have deemed
12 antibiotic-resistant infections from food pathogens a serious threat.

13 (h) A recent example illustrates the risks of injudicious use of antibiotics. In 2015, a study in
14 China identified plasmid encoded colistin resistance (mcr-1), which is easily transferable to other
15 bacteria, in a significant fraction of pig samples that had been collected for routine surveillance.
16 Scientists believe the resistance was a result of colistin in animal feeds. The same colistin resistance
17 was detected in hospital patients. A couple of months later, alarmed scientists around the world had
18 discovered the same colistin resistance in 19 countries, including in child and elderly patients, in the
19 guts of healthy humans, in water, on retail meat, and in animals. Because the colistin gene was
20 detected more often in animals than in people, the authors of the original study say it is likely that this
21 form of colistin resistance originated in animals and spread to people.

22 (i) In January 2017, FDA completed implementation of its Guidance 213, enacting rules
23 requiring veterinary approval for a host of antibiotics that were previously available over the counter
24 for growth promotion purposes. It also announced the withdrawal of approval for a portion of new
25 animal drug applications that indicated the use of antibiotics for growth promotion for animals used to

1 produce meat and poultry. However, antibiotics in every medically important class that was approved
2 for growth promotion in livestock production will remain available for use at similar or the same
3 doses for disease prevention. Even under Guidance 213, antibiotic products could continue to be
4 administered to animals that are not sick in low doses on a routine basis in their feed and/or water
5 prophylactically. Furthermore, Guidance 213 does not require use reduction targets or a means to
6 track progress toward reduction of the use of antibiotics in livestock operations.

7 (j) According to 2009-2014 domestic sales and distribution data collected from
8 pharmaceutical companies by the FDA, sales of medically-important antibiotics for food animals have
9 increased every year and by 23% over the five-year period. From 2013 to 2014, the first year for
10 voluntary implementation of Guidance 213, antibiotic sales of medically-important antibiotics
11 increased by 3%.

12 (k) Both the Netherlands and Denmark have achieved significant reductions in livestock
13 antibiotic use only after both routine disease prevention and growth promotion uses were banned.
14 According to the government of the Netherlands, antibiotic use in the Dutch livestock industry fell by
15 59% between 2009 and 2014. Between 1992 and 2008, Denmark reduced antibiotic use in swine
16 production by almost 50%, while still experiencing a nearly 50% increase in production.

17 (l) There is no federal program in the United States to collect comprehensive and
18 representative data on antibiotic use in livestock or poultry, nor any federal regulatory proposal to do
19 so. The only information available is sales data that does not break down use by species or medical
20 reason for use.

21 (m) In 2015, Governor Brown signed SB 27, a first-in-the nation law, which puts all
22 medically-important antibiotics under veterinary oversight and restricts prophylactic use of antibiotics
23 in livestock so that antibiotics may not be administered routinely. In addition, SB 27, codified at
24 Section 14400 et seq. of the California Food and Agriculture Code, directs the California Department
25 of Food and Agriculture to monitor antibiotic use, sales, and antibiotic resistance. However, the law

1 applies to livestock and poultry produced in California only.

2 (n) The marketplace remains fragmented and confusing for consumers. Other than for
3 products labeled "Organic" or "No Antibiotics Administered," antibiotic use practices remain
4 opaque or misleading. For example, meat and poultry products may have been produced with regular
5 use of antibiotics yet labeled "natural," and products may claim to be produced without the use of
6 "growth-promoting antibiotics" while using antibiotics routinely for disease prevention with
7 growth-promoting effects. Should producers choose to label their products as compliant with SB 27,
8 such labels will add to this confusing mix.

9 (o) San Francisco can play a pivotal role in addressing the inappropriate use of antibiotics in
10 meat production by increasing transparency of antibiotic use practices by collecting, analyzing, and
11 explaining the myriad policies on antibiotic use for raising livestock and poultry and the implications
12 of different levels of antibiotic use for environmental health, antibiotic resistance and public health.

13 **SEC. 2702. DEFINITIONS.**

14 For the purposes of this Chapter 27, the following definitions apply:

15 "Antibiotic" means any antimicrobial drug that works against bacteria, is approved by the
16 United States Food and Drug Administration ("FDA"), and is currently marketed for use in or on
17 Meat or Poultry animals as approved in 21 C.F.R. §§ 558.55 et seq. and identified in the FDA's 2014
18 Summary Report On Antimicrobials Sold or Distributed for Use in Food-Producing Animals and
19 subsequent annual reports.

20 "Antibiotic Not Currently Medically Important" means any antibiotic and its associated class
21 that does not belong to a class that is listed as "important," "highly important," or "critically
22 important" in Appendix A of FDA's Guidance for Industry #152 and subsequent revisions to that list.
23 Antibiotics Not Currently Medically Important are listed in the FDA's 2014 Summary Report On
24 Antimicrobials Sold or Distributed for Use in Food-Producing Animals, and subsequent FDA annual
25 reports.

1 "Antibiotic Use Policy" means a description of the antibiotic use practices, whether or not
2 written or formalized, of a Producer of each Product Group sold in a Grocer's stores.

3 "City" means the City and County of San Francisco.

4 "Brand" means a distinguishing symbol, mark, logo, name, word, sentence or a combination
5 of these items that companies use to distinguish their product from others in the market.

6 "Department" means the Department of the Environment.

7 "Director" means the Director of the Department of the Environment or his or her designee.

8 "Disease Control" means metaphylaxis, i.e., the administration of an antibiotic to a group of
9 animals that are in contact with an animal or animals showing clinical signs of illness to protect the
10 group from the spread of the disease.

11 "Disease Prevention" means prophylaxis, i.e., the administration of an antibiotic to animals,
12 none of which are exhibiting clinical signs of disease.

13 "Grocer" means a person, firm, corporation, partnership, or other entity that owns and/or
14 operates in the City a grocery store, whether general or specialty, as defined in Planning Code
15 Section 102, and also owns or operates 25 or more grocery stores anywhere.

16 "Growth Promotion" means the administration of antibiotics to an animal to increase the
17 animal's weight gain or growth, to increase feed efficiency, or for other production purposes not
18 related to Disease Control, Prevention, or Treatment.

19 "Meat" means the edible part of the carcass of any mammal, such as cattle, calf, sheep, lamb,
20 goat, rabbit, buffalo, or swine.

21 "Medically Important Antibiotic" means any antibiotic that belongs to a class that is listed as
22 "important," "highly important," or "critically important" in Appendix A of FDA's Guidance for
23 Industry #152 and subsequent revisions to that list.

24 "Poultry" means the edible part of the carcass of any bird.

1 "Producer" means a person or entity who establishes management and production standards
2 for the maintenance, care, and raising of Meat and/or Poultry animals, and either: (1) operates a
3 business raising Meat and/or Poultry animals that are used to produce any Product Group sold by a
4 Grocer; or (2) purchases or otherwise obtains live Meat and/or Poultry animals that it slaughters,
5 and/or sells for slaughter, for production of any Product Group sold by a Grocer.

6 "Product Group" means Raw Meat or Poultry of the same species of animal(s), brand, and sub-
7 brand.

8 "Raw" means not cooked or cured.

9 "Routine Use" means regular administration of Antibiotics for Disease Prevention and/or
10 Growth Promotion.

11 "Sub-brand" means a brand whose attributes are distinct, yet related to a broader main
12 brand.

13 "Third-Party Certification" means certification by an organization that is not affiliated with the
14 Grocer and that addresses antibiotic use by producers of a Product Group sold by the Grocer. The
15 following third party certifications are accepted under this Chapter: U.S. Department of Agriculture
16 ("USDA") Organic, USDA No Antibiotics Administered Process Verified (or equivalent USDA
17 "process verified" claim), Global Animal Partnership, Certified Responsible Antibiotic Use, Humane
18 Certified, and Animal Welfare Approved. The Director may, from time to time via regulations, add to
19 this list of acceptable certifications.

20 "Treatment" means the administration of Antibiotics to animals when they are sick, i.e.,
21 exhibiting clinical signs of bacterial disease.

22 **SEC. 2703. ANTIBIOTIC USE REPORTS—REPORTING AND DOCUMENTATION OF**
23 **ANTIBIOTIC USE POLICIES FOR RAW MEAT PRODUCTS.**

24 (a) Beginning 180 days after enactment of this Chapter 27 and annually thereafter, each
25 Grocer shall report to the Department on a form prescribed by the Director the Antibiotic Use Policy

1 for each Product Group sold in the City during the previous year. The form shall require reporting of
2 information including, but not limited to, the different purposes for which antibiotics are used, whether
3 the use has a Third-Party Certification, the average number of days of antibiotic use per animal, the
4 percentage of animals treated with antibiotics, the number of animals raised, and the total volume of
5 antibiotics administered. The reporting shall distinguish between use of Medically Important
6 Antibiotics, and Antibiotics Not Currently Medically Important. If there is no change to the Antibiotic
7 Use Policy information from the previous year for a Product Group, the Grocer may report that fact in
8 its response on the Department's form. A Grocer shall fill out a separate form for each distinct retail
9 banner or subsidiary store operated and/or owned by the Grocer.

10 (b) Upon a written petition from a Grocer showing, based on substantial evidence, that the
11 reporting of certain required information is not feasible without significant hardship, the Director may
12 exercise reasonable discretion to waive reporting of the relevant information for a period of time
13 specified by the Director. Any waiver shall be crafted as narrowly as possible, to maximize disclosure
14 as required by this Chapter 27. If a petition is granted, in responding to the form for the relevant
15 Product Group, the Grocer shall indicate that it has a waiver for the relevant portions of the form. All
16 petitions the Department receives shall be publicly posted on the Department's website for a minimum
17 of 30 days. The Department shall, during a designated comment period, receive and post on its website
18 written comments from the public for the Director to take under advisement in ruling on each petition.
19 Where a written petition receives no response from the Director within 60 days, the petition shall be
20 deemed approved to grant a waiver for one year. Once each year, the Director shall provide an
21 opportunity for input on the petition review and approval process at a public meeting, and shall
22 respond to the public input on each waiver for which concerns are raised.

23 (c) Grocery stores and butchers that do not meet the definition of "Grocer" may elect to
24 participate in the reporting process set forth in this Section 2703, and the Department shall encourage
25 such participation.

1 (d) Five years from enactment of this Chapter, the Director shall evaluate whether the
2 reporting program continues to provide useful information to the public. Such review shall occur every
3 two years thereafter.

4 (e) Each Grocer shall retain documentation of the Antibiotic Use Policy for each Product
5 Group sold in its stores. The following shall be sufficient documentation:

6 (1) A written statement from the Producer of each Product Group that provides
7 information sufficient to address the queries in the Department's form;

8 (2) A Third-Party Certification that confirms the Producer's responses to the
9 Department's form; and/or

10 (3) A store-wide Antibiotic Use Policy that applies to all Meat and Poultry products
11 sold in the store, or that applies to all products in a particular category of Meat or Poultry sold in
12 the store, such as chicken, turkey, pork, or beef; and the process, in writing, by which the Grocer
13 enforces this policy, including any Third-Party Certifications used, written statements from
14 Producers, purchasing specifications, or equivalent information that demonstrates enforcement of
15 the store-wide policy.

16 For a Product Group for which there has been no change to the Antibiotic Use Policy from the
17 previous year, the Grocer shall retain documentation establishing that there has been no change.

18 **SEC. 2704. ANTIBIOTIC USE REPORTS—ANALYSIS AND PUBLICATION OF FINDINGS.**

19 The Department shall analyze the antibiotic use reports collected pursuant to Section 2703, to
20 educate the public about the Antibiotic Use Policies associated with different Meat and Poultry Product
21 Groups and their availability in different grocery stores, distinguish between Medically Important
22 Antibiotics and Antibiotics Not Currently Medically Important, and inform the public's purchasing
23 decisions. The Department shall publish its findings on its website, and may disseminate its findings
24 through other means it deems appropriate.

25 **SEC. 2705. ANTIBIOTIC USE REPORTS—ENFORCEMENT AND PENALTIES.**

1 (a) The Director shall administer and enforce this Chapter 27.

2 (b) If the Director determines that a Grocer has violated this Chapter 27 or a regulation
3 adopted pursuant thereto, the Director shall send a written warning, as well as a copy of this Chapter
4 and any regulations adopted pursuant thereto, to the Grocer, specifying the violation. The Grocer
5 shall have 30 days after receipt of the warning to correct the violation.

6 (c) If, after having received a warning in accordance with subsection (b), the Grocer fails to
7 correct the noticed violation within 30 days after receipt of the warning, the Director may impose
8 administrative penalties, including fines for violations of this Chapter 27 and/or of any regulation
9 adopted pursuant thereto, and/or suspension or revocation of any permits held. Administrative
10 Code Chapter 100, "Procedures Governing the Imposition of Administrative Fines," as amended, is
11 hereby incorporated in its entirety and shall govern the imposition, enforcement, collection, and review
12 of administrative fines imposed to enforce this Chapter or any rule or regulation adopted pursuant to
13 this Chapter. Each day a Grocer fails to correct a violation shall constitute a separate violation for
14 these purposes. Grocers and Producers shall be jointly and severally liable for delays in submitting
15 required reports and for false statements made in reports to the Director or in the documentation
16 required to comply with this Chapter.

17 (d) The City Attorney or a Grocer may bring a civil action to enjoin violations of or compel
18 compliance with any requirement of this Chapter 27 or any rule or regulation adopted pursuant to this
19 Chapter, as well as for payment of civil penalties and any other appropriate remedy. The court shall
20 award reasonable attorney fees and costs to the City Attorney or Grocer that is the prevailing party in
21 a civil action brought under this subsection (d). A Grocer may institute a civil action under this
22 subsection (d) only if:

23 (1) The Grocer has filed a complaint with the Director containing sufficient information
24 for the Director to assess its accuracy;

1 (2) 90 days have passed since the filing of the complaint without the Director issuing a
2 warning or otherwise initiating remedial action;

3 (3) After the 90-day period referenced in subsection (d)(2) has passed, the Grocer has
4 provided 30-day written notice to the Director and the City Attorney's Office of its intent to initiate civil
5 proceedings;

6 (4) By the end of the 30-day period referenced in subsection (d)(3), the City Attorney's
7 Office has not provided notice to the Grocer of the City's intent to initiate civil proceedings; and,

8 (5) The Grocer has executed an agreement indemnifying and holding harmless the City
9 in connection with the action, in a form approved by the City Attorney's Office.

10 (e) Any Grocer who knowingly and willfully violates the requirements of this Chapter 27 or any
11 rule or regulation adopted pursuant to this Chapter is guilty of a misdemeanor and upon conviction
12 thereof is punishable by a fine of not less than \$50 and not more than \$500 for each day per violation,
13 or by imprisonment in the County Jail for a period not to exceed six months, or by both such fine and
14 imprisonment.

15 (f) Any Grocer in violation of this Chapter 27 or any rule or regulation adopted pursuant to
16 this Chapter shall be liable to the City for a civil penalty in an amount not to exceed \$1,000 per day per
17 violation. Each day in which the violation continues shall constitute a separate violation. A civil
18 penalty shall not be assessed pursuant to this subsection (f) for the same violation for which the
19 Director assessed an administrative penalty pursuant to subsection (c).

20 (g) In determining the appropriate penalties, the court or the Director shall consider the extent
21 of harm caused by the violation, the nature and persistence of the violation, the frequency of past
22 violations, any action taken to mitigate the violation, and the financial burden to the violator.

23 (h) No criminal, civil, or administrative action under this Section 2705 may be brought more
24 than four years after the date of the alleged violation, except where evidence of the violation has been
25 hidden or was otherwise unavailable in the exercise of reasonable diligence.

1 **SEC. 2706. CITY PROCUREMENT OF RAW MEAT—REPORTS OF CURRENT PRACTICES**
2 **AND PUBLICATION OF RECOMMENDATIONS.**

3 (a) No later than 90 days after enactment of this Chapter 27, all City departments procuring
4 Raw Meat and/or Poultry shall both conduct an audit of their Meat and Poultry purchases in the
5 previous calendar year and submit a report to the Department of the Environment with the following
6 information:

7 (1) Percentages of Meat and Poultry procured that were produced with and without the
8 Routine Use of Antibiotics, distinguishing between Meat and Poultry raised without any Antibiotics and
9 Meat and Poultry raised without Routine Use of Medically Important Antibiotics whenever feasible;

10 (2) A list of current suppliers, and whether those suppliers currently offer Meat and/or
11 Poultry raised without the Routine Use of Antibiotics, distinguishing between Meat and/or Poultry
12 raised without any Antibiotics and Meat and/or Poultry raised without Routine Use of Medically
13 Important Antibiotics, and whether the suppliers could cease Routine Use of Medically Important
14 Antibiotics within three years' time;

15 (3) The estimated cost of obtaining Meat and/or Poultry raised without the Routine Use
16 of Antibiotics, distinguishing between Meat and/or Poultry raised without any Antibiotics and Meat
17 and/or Poultry raised without Routine Use of Medically Important Antibiotics; and

18 (4) The expected timeline if the department were to transition to procurement of only
19 Meat and/or Poultry raised without the Routine Use of Medically Important Antibiotics.

20 (b) No later than 180 days after enactment of this Chapter 27, the Department of the
21 Environment shall compile the departmental reports required by this Section 2706 and publish an
22 analysis regarding opportunities for and feasibility of a City-wide procurement policy for Meat and
23 Poultry raised without the Routine Use of Medically Important Antibiotics. The Department shall
24 submit a copy of its analysis to the Board of Supervisors and the Mayor.

25 **SEC. 2707. RULEMAKING.**

1 (a) The Director, after a public hearing, shall adopt and may amend guidelines, rules,
2 regulations, and/or forms as the Director deems necessary to implement this Chapter 27.

3 (b) No later than 90 days after enactment of this Chapter 27, the Department shall issue
4 regulations specifying the contents and format for the form required by Section 2703.

5 **SEC. 2708. UNDERTAKING FOR THE GENERAL WELFARE.**

6 In enacting and implementing this Chapter 27, the City is assuming an undertaking only to
7 promote the general welfare. It is not assuming, nor is it imposing on its officers and employees, an
8 obligation for breach of which it is liable in money damages to any person who claims that such breach
9 proximately caused injury.

10 **SEC. 2709. SEVERABILITY.**

11 If any section, subsection, sentence, clause, phrase, or word of this Chapter 27, or any
12 application thereof to any person or circumstance, is held to be invalid or unconstitutional by a
13 decision of a court of competent jurisdiction, such decision shall not affect the validity of the remaining
14 portions or applications of the chapter. The Board of Supervisors hereby declares that it would have
15 passed this chapter and each and every section, subsection, sentence, clause, phrase, and word not
16 declared invalid or unconstitutional without regard to whether any other portion of this chapter or
17 application thereof would be subsequently declared invalid or unconstitutional.

REVISED LEGISLATIVE DIGEST

(Substituted, 6/27/2017)

[Environment Code - Antibiotic Use in Food Animals]

Ordinance amending the Environment Code to require certain San Francisco retailers of raw meat and poultry to report the use of antibiotics in such products to the Department of the Environment, and require City departments to report the use of antibiotics in raw meat and poultry purchased by the City to the Department of the Environment.

Existing Law

San Francisco law does not currently require any disclosures regarding the use of antibiotics in meat or poultry products. Article 10 of the Health Code, regarding Meat and Meat Products, sets forth standards related to meat inspection and transport, and use of dyes, chemicals, and other substances in meat or meat products.

Amendments to Current Law

The proposal is an ordinance that would amend the Environment Code to require grocers of a certain size selling raw meat and/or poultry in the City to report to the Department of the Environment (the "Department") the producer's antibiotic use policy for each line of meat and poultry products sold. Grocers would also be required to retain documentation of these antibiotic use policies. The Department would publicly report on its website the antibiotic use policies of different meat and poultry brands sold by the covered grocers, and would be responsible for enforcement of the reporting requirements. Under the proposal, grocers for whom compliance would be infeasible may apply to the Department for a waiver from some or all reporting requirements.

The proposal would also require City departments procuring raw meat to conduct an audit of their meat purchases of the year prior to this proposal's enactment. These City departments would be required report to the Department information regarding the use of antibiotics in the purchased meat, and an estimate of when and whether they may be able to transition to procurement of meat raised without the routine use of antibiotics.

Background

This legislative digest accompanies a substitute version of this ordinance introduced on June 27, 2017. This proposal was initially introduced before on the Board of Supervisors on June 20, 2017.
