RESOLUTION NO.

1	[Urging the City to Expand the Vulnerable Population Definition]
2	
3	Resolution urging the City and County of San Francisco to expand the definition of
4	vulnerable populations for services for people experiencing homelessness during the
5	COVID-19 crisis.
6	
7	WHEREAS, As of the latest Point in Time Count, there were 8,035 people experiencing
8	homelessness in San Francisco, 64% or 5,180 of whom are unsheltered; and
9	WHEREAS, The coronavirus (COVID-19) pandemic is a growing threat to the health
10	and safety of all San Franciscans; and
11	WHEREAS, On March 6, 2020, the San Francisco Health Officer issued a Declaration
12	of Local Health Emergency Regarding Novel Coronavirus 2019 (COVID-19), which was
13	preceded by a March 4, 2020, Proclamation of a State of Emergency issued by Governor
14	Gavin Newsom and a February 25, 2020, Proclamation by the Mayor Declaring the Existence
15	of a Local Emergency; and
16	WHEREAS, Shelter at Home is a core public health intervention that, along with
17	isolation of cases, quarantine of contacts, social distancing, and widespread testing, interrupt
18	the community spread of the novel coronavirus thereby reducing illness and severe disease,
19	reducing demands on the health care system, and reducing social and economic disruption
20	for in San Francisco; and
21	WHEREAS, According to the Interim Guidance on Unsheltered Homelessness from the
22	Centers for Disease Control and Prevention, sleeping on the streets often does not provide
23	protection from the environment, adequate access to hygiene and sanitation facilities, or
24	connection to services and healthcare necessary to adequately comply with health orders;
25	and

WHEREAS, According to the U.S. Department of Housing and Urban Development,
 "People experiencing homelessness often have a higher risk for exposure to communicable

3 diseases and have little access to health care systems and treatment in their communities;"

4 and

WHEREAS, According to the Centers for Disease Control and Prevention, older adults
(65 years and older) and people of any age who have serious underlying medical conditions
are at higher risk for being hospitalized from COVID-19; and

8 WHEREAS, According to the Center for Disease Control and Prevention, risk of getting 9 severely ill from COVID-19 increases as you get older; in fact, 8 out of 10 COVID-19-related 10 deaths reported in the United States have been among adults aged 65 years and older; and 11 WHEREAS, According to the latest San Francisco Point in Time Count, 35% of those 12 experiencing homelessness in are over the age of 51 and 74% have one or more health 13 conditions; and

14 WHEREAS, According to a report from the San Francisco Department of Public Health 15 on homeless mortality, 275 people experiencing homelessness died in San Francisco in 2019; 16 the average age of people experiencing homelessness who died between 2016 and 2018 17 was 51, 30 years shorter than the life expectancy for the City's general population; and 18 WHEREAS, At the March 17, 2020, Board of Supervisors meeting, the San Francisco Health Officer Dr. Tomas Aragon stated that during the COVID-19 Pandemic: "From a 19 20 disease-transmission perspective, absolutely having your own room is the best;" and 21 WHEREAS, On April 14, 2020, our Board of Supervisors unanimously passed an 22 emergency ordinance to require the City to secure 8,250 private rooms, including 7,000 rooms 23 for people experiencing homelessness, by April 26, 2020; and 24 WHEREAS, As of July 7, 2020, an estimated 40,000 vacant hotel rooms in San

25 Francisco; the City is currently leasing 1,121 hotel rooms that remain unoccupied; and

WHEREAS, Currently the City has defined vulnerable populations for the purpose of
 Shelter in Place hotel eligibility as "asymptomatic people experiencing homelessness who are
 60 or older or have been diagnosed with a COVID-vulnerable;" and

4 WHEREAS, Since the Emergency Ordinance requiring the City to house homeless 5 persons in hotels requiring the City to house homeless persons in hotels was passed 6 unanimously by the Board of Supervisors, the departments responsible for housing homeless 7 people during the State of Emergency, including but not limited to the Emergency Operations 8 Center, the Human Services Agency, the Homelessness and Supportive Housing 9 Department, and the Department of Public Health, have limited eligibility for Shelter in Place 10 hotel rooms to homeless individuals who meet the definition of vulnerable, specifically, those 11 who 60 or older or have been diagnosed with a COVID-vulnerable condition; and

WHEREAS, The intake for the Homelessness Response System, which is the overall system of programs and housing opportunities for adults experiencing homelessness, is conducted through an assessment process administered by the Homeless Outreach Team, qualified homeless service providers, and at Access Points where clients are entered in the Adult Coordinated Entry System; the Department of Supportive Housing and Homelessness currently does not know the age or health conditions of the majority of the unsheltered estimated 5,180 people on the street because they have not been entered into the Adult

19 Coordinated Entry System; and

20 WHEREAS, Research on geriatric homelessness including but not limited to the UCSF 21 Center for Vulnerable Populations, University of Pennsylvania, New York University, Boston 22 University, University of California - Los Angeles, and the University of Delaware asserts that 23 older homeless adults have medical ages that far exceed their biological ages; unsheltered 24 individuals experience geriatric medical conditions such as cognitive decline and decreased

25

mobility at rates that are on par with those among their housed counterparts who are 20 years
older; and

WHEREAS, According to data set forth in the Gerontologist, a leading publication on
geriatrics, people experiencing homelessness 50 years and older and housed adults 70 years
and older may have similar risks of severe illness due to COVID-19; now, therefore, be it

6 RESOLVED, That based on research showing unsheltered individuals experience 7 geriatric conditions at rates that are on par with housed individuals 20 years older, the Board 8 of Supervisors urges the City to expand its definition of "vulnerable person" to include those 9 who are 45 years of age or older for the purposes of hotel eligibility and any other COVID-19 10 related services currently limited to vulnerable populations; and, be it

11 FURTHER RESOLVED, That the Board urges the Mayor, Emergency Operations 12 Center, the Department of Homelessness and Supportive Housing, the Human Services 13 Agency and the Department of Public Health to develop a plan and conduct outreach to 14 people experiencing homelessness to identify the number of clients who meet the lowered 15 age requirement, including directing the Homeless Outreach Team (HOT) or other qualified 16 entities to assess and offer to register every unsheltered individual currently living on the 17 street in the Adult Coordinated Entry System and do intake for the Homelessness Response 18 System; and, be it

FURTHER RESOLVED, That the Board urges the San Francisco Human Services
 Agency and Department of Homelessness and Supportive Housing to immediately begin
 transporting older unsheltered people over the amended vulnerable age into Shelter in Place
 hotel rooms; and, be it

FURTHER RESOLVED, That the Clerk of the Board, upon passage of this Resolution,
 shall transmit copies of this Resolution to Mayor London N. Breed, and the Directors of the

1	San Francisco Human Service Agency, Department of Public Health, and Department of
2	Homelessness and Supportive Housing.

Response for COVID Vulnerable Populations

Government Audit & Oversight Committee

September 17, 2020

Shelter in Place Hotels

• What are Shelter in Place (SIP) hotels?

- SIPS are indoors, individuals are provided their own bathroom, food, and onsite services are available (medical, CM and behavioral health)
- People follow rules of masking, social distancing, screening, and when they can come and go.

• Why SIP hotels?

- Decrease risk of infection for people who are at high risk for poor outcomes from COVID: death
- Decrease hospitalizations and use of ICU beds

COVID Vulnerable (CDC List)

INCREASED RISK (FEMA Reimbursable)

- 1. Severe illness from COVID-19 increases with age, with older adults at highest risk
- 1. Chronic kidney disease
- 2. COPD (chronic obstructive pulmonary disease)
- Immunocompromised state (weakened immune system) from solid organ transplant
- 4. Obesity (body mass index [BMI] of 30 or higher)
- 5. Serious heart conditions, such as heart failure, coronary artery disease, or cardiomyopathies
- 6. Sickle cell disease
- 7. Type 2 diabetes mellitus
- 1. Children: medically complex; neurologic, genetic, metabolic; congenital heart disease

ADDITIONAL CCSF CRITERIA (non-FEMA Reimbursable)

1. Age 60 as cut off, prioritizing people of older age

Additional High risk medical conditions

- 1. *Uncontrolled HIV (with CD4<200/14%, detectable VL)
- 2. *Pregnancy
- 3. *< 1 year old
- 4. *Type 1 diabetes
- 5. *End stage liver disease
- 6. *oxygen dependent

Risk for severe illness due to COVID-19 increases with age

• San Francisco – 86% of deaths in SF are age 60+

- 51% of all deaths in SF are age 81 and older
- 20% of all deaths in SF are age 71-80
- 15% of all deaths are age 60-70
- California 74% of deaths are age 65+
- United States 79.3% of deaths are age 65+
- 1% of San Francisco deaths are individuals identified as experiencing homelessness
- 3% of cases in San Francisco are among people experiencing homelessness

COVID-19 Deaths San Francisco = 87 Data through 9/6/20

Verity et al. Estimates of the severity of coronavirus disease 2019: a model-based analysis. Lancet 2020, https://doi.org/10.1016/S1473-3099(20)30243-7 1; Kang et al. Age-Related Morbidity and Mortality among Patients with COVID-19. Infect Chemother. 2020 Jun;52(2):154-164

FEMA Reimbursement Criteria¹

- For the COVID-19 pandemic, FEMA Public Assistance will cover up to 75% of all eligible costs, and the City's cost share will be 25%.
- FEMA-eligible population for non-congregate sheltering, e.g. hotels:
 - COVID+ who do not require hospitalization (including those exiting from hospitals);
 - exposed to COVID-19 and do not require hospitalization; and
 - asymptomatic high risk individuals (people over 65 and people with certain underlying health conditions)
- City must obtain pre-approval of FEMA's continued support for non-congregate shelter every 30 days.
- Large financial risks to the City: FEMA / the federal government can decide to end their support with 30 days of notice.

1 https://www.caloes.ca.gov/RecoverySite/Documents/COVID-19%20Noncongregate%20Shelter%20FAQ.pdf

Controller's Office Estimated Costs

- Currently, there are 2,295 total SIP units, costing \$179M this FY.
- According to the Point in Time Count, about 3,000 PEH are between age 45-59.
- Serving an additional 3,000 clients could range from an additional \$250M 495M and extend the occupancy of hotel sites into FY 2022-23.
- Actuals would depend the mix of backfilled rooms versus new hotel bookings and the pace at which the City is able to exit clients into alternate housing and shelter placements.
- Estimates assume we can maintain current per night cost levels and no FEMA reimbursements.

Thank You

Thank you, John.

Please add to the legislative file the below SFDPH Health Advisory that was created by the SF Human Rights Commission in our capacity as EOC Equity Officers in partnership with DPH. This Health Advisory was released on June 2, 2020. The Advisory expands upon the definition of vulnerable populations, by including people experiencing homelessness and unstable housing (please see Section 2). This guidance is already in place for clinicians, health care providers and systems of care.

Introduction Referral Memo – July 15, 2020

POPULATION HEALTH DIVISION SAN FRANCISCO DEPARTMENT OF PUBLIC HEALTH

Health Advisory:

Prioritizing Populations with Structural Barriers to Health in COVID-19 Care Response

June 2, 2020

SITUATIONAL UPDATE

Emerging data indicates populations experiencing structural oppression bear a disproportionate burden of COVID-19 disease and death, have a higher prevalence of predisposing co-morbidities, and are more likely to experience conditions that may facilitate the spread of infection. SFDPH aims to provide additional support and resources, particularly to vulnerable populations, to prevent COVID-19 infections and hospitalizations, and slow transmission within the community.

Keeping individuals and families healthy is essential to the City's resilience during our COVID-19 response and recovery. The Centers for Disease Control and Prevention (CDC) describes "people at higher risk for severe illness" only along clinical parameters. This approach risks under-investment in populations that need greater focus and resources due to structural oppression. San Francisco must prioritize access and quality care for people with structural barriers to healthy outcomes in order to achieve more equitable outcomes and prevent death among the populations most susceptible to death from COVID-19. This is the right thing to do at any time and more so during this pandemic when our health is connected to the health of each person and community in San Francisco.

[For a discussion on structural barriers and local health inequities, see References below.]

IDENTIFYING VULNERABLE POPULATIONS

Clinicians are encouraged to identify patients at risk of **(1) severe illness** and **(2) increased transmission** of COVID-19 that incorporates consideration of structural oppression. In addition to medical vulnerability (see San Francisco's definition at: <u>https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/coronavirus-2019-information-for-healthcare-providers/#1588177474028-0d12059c-ca47), there are structural conditions which put some individuals and groups at higher risk. The following populations are at higher risk because of **structural inequities** (i.e. experiences of racism, poverty, housing insecurity, etc.).</u>

1. **Severe Illness**: Populations at increased risk of severe illness and death from COVID-19 due to structural inequities

- People experiencing marginalization, systemic inequity, and health inequities:
 - Racial and ethnic groups (see: https://www.cdc.gov/coronavirus/2019-ncov/need-extraprecautions/racial-ethnic-minorities.html):

- Black/African American Community
- Latina/o/x Community
- Native Americans/Indigenous Community
- Pacific Islander Community
- Immigrant and undocumented people
- People with disabilities
- People experiencing homelessness

2. **Increased Transmission:** The following populations experience conditions that facilitate the spread of infection and may be at higher risk of developing COVID-19.

• People Living in High Density Situations

- Congregate care settings, such long-term care facilities
- Congregate living settings, such as shelters, navigation centers, single room occupancy (SRO) hotels, or correctional facilities
- Homelessness and unstable housing
- Low-income housing
- Multi-generational households where isolation is difficult
- Racially segregated and/or densely populated neighborhoods

• People with High-Risk Economic/Work Conditions

- Essential Workers who have extensive contact with the public
- People without paid sick leave and/or health insurance
- Sex Workers
- Low-income people who must go out in public for resources frequently

INCREASING CARE AND SUPPORT

Healthcare providers and systems of care are encouraged to increase monitoring and support for individuals from vulnerable populations in the following ways:

- Focused outreach. Engage in focused outreach to link vulnerable communities with necessary health services
- Encourage testing.
 - Provide multilingual printouts and flyers on COVID-19 and testing: <u>https://sf.gov/outreach-toolkit-coronavirus-covid-19</u>
 - Have high index of suspicion for COVID-19 when assessing symptoms
 - Ensure testing for identified populations is easily accessible and non-coercive. SFDPH encourages clinicians to test individuals with any <u>one</u> symptom concerning for COVID-19, asymptomatic close contacts of lab-confirmed COVID-19 cases, and asymptomatic frontline or essential workers.
- **Increased vigilance.** Maintain close monitoring of such patients to alert to disease progression.
- **Partner with community**. Partner with community-based organizations (CBOs) and faithbased organizations (FBOs) to reduce cultural barriers to care for patients in identified populations

• Support isolation and quarantine.

- Refer and link patients to community resources, especially for patients who require Isolation and Quarantine. See "Isolation and Quarantine Directives: Frequently Asked Questions for Healthcare Providers:" <u>https://www.sfcdcp.org/wp-</u> <u>content/uploads/2020/05/COVID19-FAQ-IQ-Providers-FINAL-05.14.2020.pdf</u>
- Encourage patients to call 311 or go to <u>SF.GOV</u> to get connected to resources
- Support contact tracing.
 - When disclosing results to a new positive case, ask about who else lives in the household and link household members to immediate testing resources.
 - Encourage patients to talk with case investigators and contact tracers, if called. Explain how this work to keeps their neighbors and friends safer.
- Fill out the demographics sections of the CMR. Providers are the sole source for many of these data that help us understand which populations are at higher risk and may need additional resources and support to stay healthy
- **Contextualize data.** Include context when highlighting disparity data to avoid inadvertently perpetuating harmful myths and stereotypes.
 - Data on socioeconomic status (SES) could be reported alongside racial data. Complementary SES information will clarify how racial and class forces are intertwined
 - Explanations for how discrimination and marginalization impact health should be offered alongside any racial disparity data
- Partner with SFDPH. SFDPH welcomes feedback on how we can continue to work with providers to improve support for vulnerable patients. Contact: <u>dph.doc.ops.medical@sfdph.org</u>

Public comment submitted via electronic mail

Re: File #200738—Urging the City to Expand the Vulnerable Population Definition—SUPPORT

Dear Supervisors,

On behalf of GLIDE, I write in strong support of Supervisor Preston's resolution to expand the vulnerable population definition.

As a leading service provider in the Tenderloin, each day at GLIDE we see the physical effects of living on the street and the toll it takes on our clients, well over half of whom are currently homeless and disproportionately Black and Brown.

On April 1, the City announced that vulnerable populations on the street would be prioritized for hotel rooms; however, to date, it has not moved all vulnerable people into safe isolation, and has instead been selectively triaging individuals for care using an inadequate model.

The definition that the City has been using for vulnerable populations during the COVID-19 crisis is one that relies on an age limit that fails to distinguish between people who are housed and unhoused.

We who work with people experiencing homelessness know firsthand how rapidly that condition ages a body. Unsheltered individuals experience medical ages, unique health concerns, and higher rates of comorbidities that far exceed their biological ages on an equivalent scale with housed individuals who are 20 years their senior. They are also at higher risk for exposure to COVID-19.

Adequate housing could help ameliorate these effects and lead to decreased rates of costly and burdensome acute medical care.

With the COVID-19 pandemic an ongoing threat, recent dangerous air generated by wildfires, and with colder and rainier months approaching, living outdoors will prove no kinder to our unhoused neighbors and loved ones.

And we should not forget that by not providing safe sheltering options for the unhoused, frontline workers, too, are placed at an unnecessary greater risk.

As such, we urge you to strongly recommend that the City expand its definition of "vulnerable person" for the purposes of hotel eligibility and any other COVID-19 related services currently limited to vulnerable populations.

Sincerely,

mh

Wesley Saver Policy Manager, GLIDE
