SFBOS

I would like to send my support for items 4 and 5 on the agenda

200776 - Essential workers face in all occupations increased difficulty and lacking efforts by management to allow for time to clean or use and provide essential cleaning and wearable equipment. From small part time jobs to full time governmental positions it is critical to ensure labor and workplace safety is being checked and verified.

201061 - side show concerns are a big issue in D11 waking people improper driving on city streets and endangering pedestrians and personal and city property. As this has gone on for some time community service would be highly recommended for the offender to spend there saturdays and sundays or sleeping hours spent cleaning graffiti or trash off sidewalks and roadways. Maybe implementing sidewalk safety signage or assisting crosswalk duties of the sfmta ? Anything to deter the ongoing issues and include a personal work related component besides impoundment of cars is recommended. Or u may have the culprits driving junk cars with more risk on streets...

Thank you for forwarding these comments to the supervisors for the upcoming meeting.

Sincerely

A.Goodman D11
